

Rupani Srikanth

Azure Data Engineer

sreekanthrupa16@gmail.com | +1 20343 51840

Professional Summary

- Results-driven Azure Data Engineer with 5+ years of experience in designing, developing, and optimizing cloud-based data solutions using Microsoft Azure technologies.
- Proficient in building and managing batch and streaming data pipelines, ETL workflows, and data migration strategies for financial and healthcare domains.
- Skilled in Azure Data Factory, Databricks, Synapse Analytics, Event Hub, Azure Functions, and Data Lake Storage, with hands-on experience in Python, SQL, PySpark, and Shell Scripting.
- Expert in CI/CD automation, and infrastructure as code, including Terraform, Azure DevOps, GitHub, Jenkins, and data governance tools like Informatica Axon, BigID, and Denodo.
- Adept at orchestrating large-scale data workflows, optimizing real-time analytics, and ensuring data accuracy, security, and compliance.
- Strong problem-solving abilities, with a proven track record of reducing data processing time, improving operational efficiency, and minimizing downtime.
- Collaborative team player with a deep understanding of data warehousing, metadata management, and cloud-based analytics, driving business intelligence and data-driven decision-making.
- Experienced in working across Agile and Waterfall methodologies, ensuring seamless end-to-end data integration and high-availability solutions in enterprise environments.

Technical Skills

Scripting & Programming: Python, PySpark, SQL, Shell Scripting, Java, Go, Rust, TypeScript

Azure Cloud Technologies: Azure Data Factory, Azure Databricks, Azure Blob Storage, Azure Data Lake, Azure SQL Database, Azure Synapse Analytics, Azure Functions, Azure Event Hub

Data Platforms: Teradata, Cassandra, MongoDB, Oracle, SQL Server, Snowflake, Azure Data Explorer, ADLS, Palantir Ontology

Tools: Power BI, Apache Spark, Apache Kafka, Azure DevOps, GitHub, Jenkins, Terraform, Informatica Axon, Denodo, Alteryx, Grafana, Tableau

Data Governance & Privacy: Informatica Axon, Informatica EDC, BigID

Orchestration: Azure Data Factory, Tivoli

Methodologies: Agile, Waterfall

Operating Systems: Windows, Linux, Unix, Ubuntu, Mac

Professional Experience

Data Engineer | Indies Technologies Private Limited

Aug 2022 - Sep 2024

Project #1 | Role: Data Engineer | Client: Financial Client

Jun 2023 – Sep 2024

- Migrated data and processes from Teradata and Informatica to Azure Data Lake using Azure Data Factory and Databricks, optimizing migration efficiency.
- Managed ETL scripts to move workflows to Azure Synapse and integrated SQL scripts into Git repositories for version control.
- Streamlined metadata generation for structured and unstructured data, improving data processing efficiency.
- Configured Azure Data Factory pipelines with parameterized datasets for dynamic process management.
- Implemented CI/CD pipelines using Azure DevOps and Terraform, automating backend releases and deployment processes.
- Delivered workflows across environments with high success rates, ensuring seamless data integration.
- Orchestrated containerized workflows using Azure Functions and Kubernetes, ensuring timely execution.
- Scheduled and automated data ingestion workflows, reducing manual intervention and operational costs.
- Performed data validation checks using SQL and Python to ensure accuracy before approval.
- Facilitated data movement across development, test, and production environments, enhancing testing and deployment efficiency.
- Resolved workflow and data pipeline issues, minimizing downtime and improving data reliability.
- Collaborated with cross-functional teams and contributed to leadership meetings to enhance process improvements.

Environment: Azure Data Factory, Azure Databricks, Azure Data Lake Storage, Azure Synapse Analytics, Azure Functions, Python, SQL, Linux, GitHub, Teradata, Informatica.

Project #2 | Role: Data Engineer | Client: Health Care Client**Aug 2022 - Jun 2023**

- Developed and managed batch and streaming data workflows using Azure Data Factory and Azure Event Hub, reducing data processing time.
- Automated data workflows through Azure Data Factory and Azure Functions, improving operational efficiency.
- Led the migration of on-premises data systems to Azure Data Lake and Synapse Analytics, ensuring minimal downtime.
- Enhanced scalability and reduced processing costs by optimizing Azure Databricks pipelines and implementing cost-saving techniques.
- Configured Azure services, including Blob Storage and Data Lake Storage, using Azure CLI and SDK for secure and efficient resource utilization.
- Optimized data pipelines for real-time analytics in healthcare and finance, improving data availability and delivery efficiency.
- Established monitoring, alerting, and logging mechanisms using Azure Monitor and Log Analytics, reducing incident response times.
- Maintained high availability and performance of data systems, ensuring near-zero downtime for critical business operations.
- Collaborated with product teams to define and implement data metrics aligned with business goals.
- Enhanced and debugged data pipelines using Python, SQL, and Spark, increasing system stability and efficiency.

Environment: Azure Data Factory, Azure Event Hub, Azure Databricks, Azure Data Lake Storage, Azure Synapse Analytics, Azure Functions, Python, SQL, Apache Spark, Terraform, GitHub, Jenkins.

Data Associate | Indies Technologies Private Limited**Feb 2020 - Jul 2022**

- Administered Azure Blob Storage and Azure SQL Database, ensuring high availability and reliability.
- Enhanced SQL scripts for optimized analytics in Azure Synapse and built real-time and batch data pipelines using Azure Data Factory and Azure Event Hub, improving data processing efficiency.
- Streamlined monitoring with custom dashboards in Power BI and integrated GitHub workflows, reducing operational issues.
- Scheduled Azure Data Factory pipelines and optimized queries in Azure Data Explorer for actionable insights.
- Automated tasks with Unix shell scripts, reducing errors and improving system uptime with robust monitoring.
- Accelerated issue resolution with efficient tracking using Azure DevOps and validated server updates for smooth performance.

Environment: Azure Data Factory, Azure Synapse Analytics, Azure Blob Storage, Azure SQL Database, Power BI, Python, PySpark, Azure DevOps, GitHub, Terraform, Shell Scripting.

Software Associate | Benki Technologies Pvt Ltd., India**Apr 2019 - Jan 2020**

- Wrote complex SQL Queries, stored procedures, triggers, views & indexes using DML, DDL commands and user-defined functions to implement the business logic
 - Advised optimization of queries by looking at the execution plan for better tuning of the database
 - Performed normalization & denormalization on existing tables for fast query results
 - Involved in the migration of SQL Server 2012 database to SQL Server 2014
-
