

Sree Lakshmi Akella Software Engineer

sreelakshmi.a@ajobguide.com | +1 (202) 280-8887 | GA, USA. | [LinkedIn](#) | [GitHub](#)

SUMMARY

- Software Engineer with 3 years of experience in analysis, development, testing, implementing Web based, Client/Server Applications with Enterprise and Distributed applications across the entire Software Development Life Cycle (SDLC).
- Extensive experience in designing and developing scalable web applications using JEE such as JMS, JDBC, JSP, Servlets, and EJB.
- Experience in building web application using various Spring Framework features like Spring IOC, Spring MVC, Spring AOP, Spring Batch, Spring Boot and Spring Security.
- Proficient in Java/J2EE, Spring Framework (Boot, MVC, Core), Hibernate/JPA for building scalable and efficient backend systems.
- Proficient in crafting scalable and high-performance web applications using Java, Spring Boot, Spring MVC, and Microservices architecture.
- Experienced in database design, optimization, and SQL query writing for efficient data management (MySQL, PostgreSQL, Oracle).
- Experience in Amazon Web Services (Amazon EC2, Amazon S3, Amazon Simple DB, Amazon RDS, Amazon Elastic Load Balancing, Amazon SQS, AWS Identity and access management, AWS Cloud Watch, Amazon EBS and Amazon Cloud Front).
- Strong understanding of CI/CD pipelines, version control (Git), and automation tools (Jenkins, Maven) for streamlined development.

SKILLS

- Languages:** Java, JavaScript, SQL, Python, PL/SQL, HTML5, CSS3
- Databases:** Oracle, SQL Server, NoSQL, MySQL, PostgreSQL, Mongo DB
- Frameworks:** React.JS, React Hooks, JSON, XML, Redux, GraphQL, Angular.JS, Node.JS, Express.JS
- Spring Frameworks:** Spring MVC, Spring Boot, Spring ORM, Spring REST, Spring Web MVC, Spring Security, Spring Cloud
- J2EE Technologies:** Servlets, JSP, JSTL, JSF, JPA, EJB, JMS, JVM, JavaBeans, JDBC, Hibernate
- Microservices & Architecture:** Microservices, Multi-threading, Kafka, REST API, RESTful web services
- Enterprise & Middleware Technologies:** IBM WebSphere, Apache Tomcat, BEA Web Logic, JBoss
- Cloud & DevOps:** AWS (EC2, SQS, SNS, RDS, Cloud Watch), MS Azure, Maven, Gradle, Git, GitHub, Jenkins, Postman
- IDE & Development Tools:** Visual Studio Code, Eclipse, IntelliJ IDEA, Docker
- Software Practices & Methodologies:** SOLID principles, Design patterns, Data Structures & Algorithms, Agile, TDD, Scrum
- Testing Tools:** Junit, Mockito, TestNG, Selenium, Cypress

WORK EXPERIENCE

Citigroup, GA.	July 2024 – Current
Software Engineer	
- Led the full development lifecycle of a secure online banking platform, from gathering regulatory-compliant requirements to deploying production-ready services in a fault-tolerant microservices architecture. - Built and launched 12+ core banking APIs using Java and Spring Boot, applying strict authentication and authorization controls to safeguard sensitive financial data. - Designed a responsive customer portal with Angular.js, creating over 15 reusable, ADA-compliant components that standardized the UI, improved accessibility, and cut front-end development time by 20%. - Integrated high-performance services in Node.js to manage asynchronous financial operations using event-driven design, improving system responsiveness and scalability. - Automated reporting and data analysis workflows in Python, generating insights into transaction trends and supporting compliance reporting for regulatory audits. - Architected and deployed cloud-native solutions on AWS, leveraging services like Amazon SQS for asynchronous messaging, S3 for secure storage, and Lambda for serverless processing to optimize cost and scalability. - Implemented a robust CI/CD pipeline with Jenkins, incorporating automated builds, testing, security scans, and compliance checks to cut release cycles from two weeks to two days. - Established a test-driven development (TDD) approach, writing over 200 unit and integration tests with JUnit and creating end-to-end Selenium test suites, achieving 90%+ code coverage and significantly improving application reliability.	
LTI Mindtree, India.	February 2021 – December 2022
Software Engineer	
- Built and integrated more than 20 RESTful APIs with Python and Flask, delivering high-performance middleware that achieved uptime and connected legacy systems with modern cloud-based services. - Created responsive and dynamic user interfaces with React.js for internal and external web portals, simplifying complex data management tasks and cutting end-user task completion time by 30%. - Significantly improved the performance of data-heavy dashboards by connecting React.js frontends to Python services and implementing Redis caching, resulting in a 25% reduction in page load times and 80% decrease in database load. - Automated cloud infrastructure on Azure using Virtual Machines, Blob Storage, and Functions, slashing provisioning time from days to minutes. This serverless, event-driven system handled over 2.5 million events per month, reducing operational costs by \$2,000 annually. - Achieved an 18% reduction in monthly cloud storage costs by strategically implementing Azure Blob Storage access tiers and optimizing virtual machine service plans. - Streamlined the entire software delivery lifecycle by constructing CI/CD pipelines with Azure DevOps to automate testing and deployment, cutting deployment cycles in half and saving over 11 hours of manual effort each week. - Partnered with the QA team to incorporate Pytest and Selenium automated tests into the CI/CD pipeline, boosting regression test coverage from 65% and minimizing the number of bugs reaching production. - Designed and refined complex NoSQL database schemas in MongoDB to support high-volume transactions, improving data retrieval speed by 10% for datasets larger than 20 million records. - Enhanced the platform's data analytics capabilities by developing and integrating machine learning models using PyTorch.	

EDUCATION

- Masters in Computer Science**, George Mason University, Fairfax, VA, USA.
- Bachelors in Computer Science**, Gayatri Vidya Parishad College of Engineering for Women (GVPCEW) Visakhapatnam, India.
