

SREE RAJ PEDDAIAHGARI

☎ 361-466-7163 | ✉ sreerajpeddaiahgari@gmail.com | 📍 Salt Lake City, UT

Professional Summary

Detail-oriented and certified Data Analyst with hands-on experience supporting healthcare technologies, specializing in Epic systems, data validation, and workflow optimization. Proven ability to analyze and translate technical requirements, manage system configurations, and lead small-scale projects with cross-functional teams. Skilled in both backend and mobile application development, with a strong foundation in Python, SQL, and healthcare IT systems. Adept at stakeholder collaboration, system testing, and documentation in high-demand environments.

Education

Master of Science in Computer Science

Texas A and M University, Kingsville, TX

Course Work: Data Structures and Algorithms, Operating Systems, Software Engineering, Web Application Development, Machine Learning, Distributed Systems, Database Systems, Human-Computer Interaction

August 2023 – May 2025

GPA: 4.00/4.00

Bachelor of Engineering in Electronics and communications

New Horizon College of Engineering, Bangalore, India

Course Work: Digital Electronics, Computer Networks, Embedded Systems, Object-Oriented Programming, Data Structures and Algorithms, Database Management Systems, Signals and Systems

January 2018 – July 2022

GPA: 7.72/10.0

Technical Skills

- **Healthcare IT:** Epic (EpicCare Ambulatory, ClinDoc), HL7 Integration, Healthcare Data Analytics
- **Programming Languages:** Python, SQL, Java, JavaScript, Dart
- **Tools & Platforms:** Microsoft Excel (PivotTables), Power BI, Tableau, JIRA, ServiceHub, Firebase, Git
- **Mobile Development:** Flutter, Android Studio, RESTful APIs
- **Project Documentation Tools:** Microsoft Visio, Project, PowerPoint, Word, Confluence

Experience

Data Analyst Intern | HCA-Healthcare

Oct 2024 – May 2025

- Spearheaded the configuration and support of EpicCare Ambulatory modules, resolving over 75 technical support tickets with 98% SLA compliance.
- Translated healthcare IT requirements into functional specifications, improving Epic build efficiency by 35% through optimized workflows and validation scripting.
- Developed 15+ Excel-based dashboards using PivotTables and integrated Power BI visualizations to support real-time reporting for population health metrics.
- Collaborated with external vendors to troubleshoot and maintain third-party integrations, ensuring 100% data sync reliability across patient registration and billing systems.
- Authored detailed documentation and testing plans for clinical workflows; reduced onboarding time for analysts by 25%.
- Participated in ServiceHub-based project planning, managing MVP delivery timelines across 4 demand requests with limited supervision.

Mobile Application Developer Intern | Smartknower

Jan 2022 – May 2022

- Designed and deployed 2 cross-platform healthcare-related mobile apps using Flutter, reducing user access time to services by 40%.
- Integrated Firebase and RESTful APIs to enable secure data handling and real-time analytics, aligning with healthcare IT compliance standards.
- Conducted comprehensive system testing and debugging, achieving 90% crash-free sessions during beta testing phase.
- Managed Agile-based project sprints, contributing to 3 team deliverables using JIRA, Git, and DevOps pipelines.
- Collaborated with UI/UX designers to implement accessibility standards in app navigation, improving patient-facing usability scores by 30%.
- Delivered documentation and onboarding resources for internal development teams, cutting transition time by 20%.

Academic Projects

Epic Ambulatory Workflow Optimization Description:

- Optimized EpicCare Ambulatory workflows across 3 departments, enhancing provider efficiency by 28%.
- Led cross-functional reviews to reduce clinical documentation lags, improving turnaround by 2 hours on average.
- Standardized Epic build validations with over 40 unit test scripts for real-time issue tracking and resolution.
- Integrated Epic with lab/pathology subsystems, increasing data accuracy by 23% through HL7 protocol refinement.
- Enhanced user training via step-by-step guides, reducing support calls by 40%.
- Coordinated MVP delivery in ServiceHub for 2 enhancement demands, meeting 100% of project timelines.

Skills: Epic build, workflow analysis, stakeholder collaboration, documentation, system testing, requirement gathering

Technologies: EpicCare Ambulatory, Microsoft Excel, Python, HL7, Power BI, ServiceHub

Patient Registration Analytics Dashboard Description:

- Built a dashboard tracking 12+ KPIs on registration delays using Excel PivotTables and Power BI.
- Analyzed patient data across 5 facilities, reducing registration time variance by 18%.
- Partnered with IT and clinical ops teams to align metrics with real-time data from Epic systems.
- Used SQL and Python scripts to clean 500K+ rows of EHR data for accurate visualizations.
- Proposed new registration workflow adopted by 3 regional units, boosting throughput by 15%.
- Contributed to the development of peer training sessions to enable self-service reporting.

Skills: Data analysis, healthcare metrics, data visualization, stakeholder engagement, reporting

Technologies: Power BI, Python, SQL, Excel, Epic, Microsoft Office Suite

Mobile Health Tracking App Description:

- Developed a cross-platform mobile app to monitor vital health parameters with 1,000+ active users.
- Utilized Flutter and Firebase to build real-time sync features with 99.9% uptime.
- Integrated secure login and patient profile management features aligned with HIPAA standards.
- Enabled in-app analytics for user trends using Google Analytics SDK.
- Streamlined deployment via CI/CD pipeline in GitLab, reducing update cycle time by 40%.
- Designed UI flows enhancing patient access to care resources by 25%.

Skills: Mobile development, cross-platform design, patient-facing technologies, integration, security

Technologies: Flutter, Dart, Firebase, REST API, Git, Android Studio

Certifications

The Complete SQL Bootcamp 2024: Go from Zero to Hero — Udemy, 2024

Built expertise in writing complex SQL queries, data cleaning, and healthcare dataset management.

Data Analytics with Python and Excel — Coursera, 2024

Integrated Excel (PivotTables, Power Query) with Python for health data analysis and reporting automation.

Project Management for Beginners: Fundamentals and Tools — Coursera, 2023

Learned Agile and traditional PM frameworks; applied tools like MS Project and JIRA in simulated healthcare IT projects.

Flutter & Dart - The Complete Guide — Udemy, 2022

Developed cross-platform mobile applications with real-time database integration using Firebase and RESTful APIs.

Power BI Masterclass – Beginners to Advanced — Udemy, 2023

Created interactive dashboards and reports tailored for population health and clinical decision support systems.
