

SREE SUJA KONDAPANENI

Data Analyst | Business Intelligence | SQL & Python Expert

Raleigh, NC, USA | +1 (201)-526-5309 | sreesuja@aogjob.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Data Analyst with 4+ years of experience delivering data-driven insights in healthcare and eCommerce. Skilled in SQL, Python, Tableau, and ETL pipelines, with a strong track record of improving medication adherence, customer retention, and campaign ROI. Proven ability to build predictive models, automate reporting, and translate complex data into actionable strategies for cross-functional teams. Adept at managing large datasets and driving efficiency through analytics across diverse business domains.

EDUCATION

Master of Science in Information Systems

Stevens Institute of Technology

May 2024

Hoboken, NJ

Bachelors of Technology in Instrumentation and Control Engineering

September 2021

Manipal Institute of Technology

Karnataka, India

TECHNICAL SKILLS

Methodologies	Software Development Life Cycle (SDLC), Agile/ Scrum, Waterfall
Language & Databases	R, Python, SQL, Oracle RDBMS, MSSQL Server, NoSQL, MySQL, Snowflake, PostgreSQL, Azure SQL Database
Libraries	NumPy, Pandas, SciKit-Learn, Matplotlib, Seaborn, PyTorch
Data Analytics Skills	Data Manipulation, Predictive Analysis, Data Cleaning, Data Mining, Data Visualization, Statistical Modelling, EDA, Statistics, Data Analysis, Hypothesis Testing, Data Extraction
Cloud	AWS (Redshift, Athena, AWS Glue, S3, EC2, Lambda), Azure (ADF, Databricks, Data Flows, Azure Data Lake, Delta Lake), Docker, Kubernetes
Tools	Power BI, Tableau, Looker Studio, ArcGIS, Alteryx, Talend, Jira, Jenkins, GitHub

PROFESSIONAL EXPERIENCE

Data Analyst | CVS Health, Boston, MA, USA

January 2024 – Present

- Collaborated on a diabetes care program by analyzing claims, pharmacy, and clinical data to identify high-risk patients and prioritize outreach efforts, supporting care for over 400,000 Medicare Advantage members.
- Built and maintained structured datasets from claims, lab results, and EMR extracts, and supported feature development for predictive models including adherence flags, visit history, and biometric trends.
- Enabled care teams to improve outreach efficiency by 15%, leading to a 7% increase in medication adherence across a targeted diabetic cohort.
- Supported a \$75M Medicare campaign analytics initiative during Annual Enrollment Period (AEP), integrating performance data from 5+ sources into a centralized dashboard using SQL and Tableau.
- Developed metrics and reports to track cost-per-acquisition, click-through rates, and enrollment conversions, contributing to a measured ROI increase of 18% over a 3-month campaign period.
- Automated weekly performance dashboards and 20+ ad-hoc reports, reducing manual reporting effort by 70% and saving the team over 40 hours/month.
- Partnered with marketing and care management stakeholders to define KPIs and ensure accurate, timely reporting across multiple business units.

Data Analyst | Sigma InfoSolutions, Bangalore, India

January 2020 – December 2022

- Analyzed over 1M+ customer transactions and product interactions from eCommerce platforms, CRM systems, and Google Analytics to uncover trends that increased sales by 15% and improved customer retention by 12%.
- Utilized SQL, Python (Pandas, NumPy), and Tableau to extract, process, and visualize data; developed interactive dashboards to support real-time decision-making for marketing, sales, and product teams.
- Built predictive models (logistic regression, decision trees) in Python to forecast customer churn, leading to an 18% increase in retention via targeted marketing initiatives.
- Performed customer segmentation using K-means clustering on transactional data via MySQL (AWS RDS) and Scikit-Learn, enabling personalized campaigns and improved targeting.
- Led A/B testing on engagement metrics (bounce rate, cart abandonment); insights drove UX changes that increased platform engagement by 7%.
- Conducted behavioral analysis to identify purchase patterns, contributing to a 10% increase in average order value (AOV) through strategic recommendations.
- Integrated data from various eCommerce sources (CRM, OMS, product databases, web analytics) using Alteryx; applied advanced SQL (CTEs, window functions) to improve reporting efficiency.
- Designed and implemented automated ETL pipelines using Azure Data Factory to ingest data from multiple platforms, enabling real-time inventory updates and improving processing time by 20%.
- Collaborated with cross-functional teams to integrate healthcare product datasets, enhancing inventory management and reducing stockouts through data-driven forecasting.

PROJECT

Restaurant Work Breakdown and Resource Allocation

July 2023

- Acted as a Project Manager, oversaw the construction of 80K “fast” food restaurant within the scope of 11 months. Delivered the project on time and within budget, through effective stakeholder and risk analysis.
