

SREE VAISHNAVI NAIKOTI

Denton, TX |sreevaishnavinaikoti@gmail.com| [LinkedIn](#)[GitHub](#) 9406298253

“Passionate software developer with experience in full-stack development and Generative AI solutions, eager to apply problem-solving skills in building innovative, scalable applications that tackle complex challenges and drive meaningful outcomes.”

EDUCATION

- University of North Texas- Master's in Computer Science- CGPA - 4.0 (August 2023 - Present)
Courses: Software Engineering Principles, Fundamentals of Database, Operating Systems, Computer Algorithms, Computer Networks, Machine Learning, Fundamentals of AI.
- MLR Institute of Technology- Bachelor's in Computer Science and Engineering - CGPA- 9.04 (August 2019- May 2023)

TECHNICAL SKILLS

Programming Languages : Core Java, C, C++, Python, Java Script, Data Structures & Algorithms, Object-Oriented Design
Web Development: HTML, CSS, Tailwind CSS, Bootstrap, React.js, Angular, Node.js, TypeScript
Backend & Frameworks: Spring Boot, Spring MVC, Flask, Django
Distributed Systems and Databases: MySQL, PostgreSQL, MongoDB, Scalable Storage Systems, SQL
Developer Tools, Cloud & Other: Git, GitHub, REST API, Postman, Microservices Architecture, AWS (EC2, S3, RDS, Lambda)

WORK EXPERIENCE

Software Engineering | Teaching Assistant | University Of North Texas (August 2024- Present)

•Mentored over 80 students on project development and management across diverse technologies such as **Java, Spring Boot, Python**, and **C++**. Assisted in designing full-stack features for a college application using **React.js** and **Spring Boot**. Conducted code reviews, evaluated software engineering methodologies, and provided technical guidance to ensure project success and student growth.

Associate Software Developer | Yellow.ai (September 2022 - March 2023)

•Designed and implemented a **voice bot** for Tata AIG, leveraging **Generative AI** and Java for backend logic to intelligently handle **buzzwords and diverse accents**. This ensured seamless feedback collection for investigations. The bot dynamically generated responses to user queries, improving the process efficiency and enabling real-time decision-making.

•Contributed to the development of a **voice bot** for Hotstar, utilizing **Java for the server-side** integration of the bot, along with **JavaScript** for frontend interactions and **Mongodb** for data storage. Helped users resolve key concerns like login issues, billing queries, and content discovery. Integrated direct navigation links for seamless issue resolution, leading to an **80% improvement in accuracy** and enhanced user engagement.

•Developed a **chatbot** for Skoda Motors, incorporating Generative AI, OTP validation, and Java-based **APIs integration** to implement a location-based feature. This optimized user interactions, provided real-time assistance, and streamlined backend processes for location-aware support.

Web Development Intern | College Ranker (March 2022- May 2022)

• Developed a dynamic Resume Builder web application using **HTML, CSS**, and **JavaScript** to create and customize professional resumes effortlessly.

PROJECTS

• **Shop Dot Com** (September 2024 - February 2025)

Tech Stack: React.js, Tailwind CSS, Spring Boot, PostgreSQL, JWT Authentication

Built a dynamic e-commerce platform with a responsive UI, designed to handle 500+ concurrent users. Utilized **Spring Boot** for building the robust backend, managing product and order data, and integrating with **payment systems**. Implemented a secure payment gateway and **JWT-based authentication** for user security. Integrated **PostgreSQL** for structured product and order management, ensuring fast query response times and smooth user experiences.

• **Teamwork Sync tool** (February 2024- April 2024)

Tech Stack: Angular, Node.js, MongoDB, REST API

Developed a **project management tool** for Agile teams using **Angular** for the frontend and **Node.js** for the backend, integrating **MongoDB** for data storage. Implemented **WebSockets** for real-time updates, optimized **API** performance with caching and pagination, and embedded Scrum framework features like sprint planning, task tracking, and backlog refinement.

• **Parking Management system** (October-2023-January 2024)

Tech Stack: Django, Python, MySQL, XAMPP, Bootstrap

Designed an intelligent parking system with real-time availability tracking. Integrated **online booking** and **digital payments** for hassle-free transactions. Implemented **role-based access control** for users and administrators. Reduced manual intervention by 60% through automated data synchronization.

AWARDS AND CERTIFICATIONS

- AWS Certified Solutions Architect
- Game Hub 36 Hr Hackathon certificate
- Coding Ninjas –Introduction to Python
