

# Sreeja Peechara

## Data Analyst

Email: [sreejapeechara@gmail.com](mailto:sreejapeechara@gmail.com) Phone: +1 (913) 358-8933 Address: Kansas, United States

### Summary

With over three years of experience in SQL and Python, I specialize in data extraction, transformation, and visualization, improving data processing efficiency by 30%. I have developed 20+ interactive dashboards in Tableau and Power BI, accelerating data-driven decision-making by 50%. My expertise includes designing and optimizing ETL pipelines that handle over 1 million records daily, improving data processing efficiency and cutting processing time by 35%. I have a strong background in working with relational and NoSQL databases, including MySQL and SQL Server, and have improved query performance by 25% through indexing and optimization. Additionally, I am experienced in managing cloud-based data workflows using AWS services like S3, Redshift, and Lambda, ensuring 99.9% uptime for critical data processes. I am well-versed in Agile and Waterfall methodologies, collaborating with cross-functional teams to deliver data solutions twice as fast while ensuring seamless data integration through Databricks, MS Excel, and SDLC processes.

### Education

**University of Central Missouri Warrensburg**  
Masters in Computer Science  
**Jawaharlal Nehru Technological university**  
Bachelor of Technology in Computer Science

**Missouri, USA**  
**Jan 2023 – May 2024**  
**Hyderabad, India**  
**Jul 2018 – Aug 2022**

### Skills

- **Methodologies:** SDLC, Agile/Scrum, Waterfall, Lean, Change Management
- **Data Analysis and statistical tools:** Data Wrangling, Data Cleaning, Data Modelling, Data Mining, Statistical Analysis, Time Series Analysis, Cluster Analysis, Anomaly Detection, Data Segmentation, A/B Testing, Experimentation, Hypothesis Testing
- **Programming Languages:** Python, R, SQL, Scala, SAS.
- **Data Visualization:** Tableau, Power BI, Matplotlib, Qlikview, ggplot2.
- **Reporting & BI:** Power Pivot, Microsoft Excel.
- **ETL & Big Data Tools:** Apache Airflow, Alteryx, SSIS, Amazon Redshift, Google BigQuery, Snowflake, Teradata, Hadoop.
- **Networking & Cloud Security:** VPC, VPN, Cloud(AWS, Azure, GCP), CloudWatch, Splunk, Grafana, Prometheus.
- **Machine Learning and Artificial Intelligence:** NLP, Deep Learning, Scikit-learn, TensorFlow, PyTorch, Keras, Predictive analytics.
- **Database Management:** MySQL, SQL Server, PostgreSQL, MongoDB, Oracle
- **Compliance & Security:** Data Privacy Regulations (HIPAA, HITECH Act)
- **Operating Systems:** Windows, Linux, macOS

### Experience

#### Capital One Financial, USA | Data Analyst | Jan 2024 – Current

- Developed real-time monitoring systems using Grafana and Prometheus, reducing downtime by 90%, standardizing KPIs across 15+ projects, and increasing operational efficiency by 25%.
- Designed 10+ financial insights dashboards with Plotly, Matplotlib, and Seaborn, accelerating data-driven decisions on loan performance and investments by 50%.
- Built and optimized 20+ Tableau and Power BI dashboards, improving data accessibility by 30% and boosting portfolio performance by 20%. Enhanced data visualization strategies to streamline analytics and support key business decisions.
- Leveraged Databricks and Snowflake for high-performance data processing, reducing project timelines by 35% while enhancing fraud detection accuracy by 45%.
- Optimized PostgreSQL databases and implemented Redis caching, reducing query response times by 50% for faster financial risk assessments.
- Integrated Google BigQuery and Azure Synapse, reducing data retrieval time by 40% and enabling real-time analytics for risk management.
- Deployed Apache Kafka to streamline real-time financial transactions, enhancing fraud detection response times by 60% and ensuring seamless banking system integration.
- Ensured 100% compliance with Basel III and GDPR using Collibra for data governance and Alteryx for audit automation, reducing reporting efforts by 35%.

#### Hexaware Technologies, India | Data Analyst | Dec 2020 – Dec 2022

- Applied advanced data analysis techniques such as predictive analytics, customer segmentation, and market basket analysis, leading to a 20% increase in sales forecasting accuracy and a 15% improvement in marketing campaign ROI.
- Automated ETL workflows using AWS Glue and Azure Data Factory, ensuring real-time data updates for reporting and analytics, reducing manual effort by 30% and data processing time by 40%.
- Collaborated with cross-functional teams across marketing, operations, and IT to integrate CRM and PIM platforms, improving customer data accessibility by 35% and enhancing customer experience personalization.
- Guaranteed 100% compliance with GDPR and CCPA regulations, implementing secure data governance strategies that strengthened customer trust and data security.
- Crafted and maintained interactive dashboards and sales performance reports using Tableau, Power BI, and Looker, leading to a 25% improvement in executive decision-making speed and optimizing revenue strategies.
- Engineered machine learning models for customer churn analysis, personalized recommendations, and demand forecasting, reducing attrition by 18% and optimizing supply chain efficiency by 22% through data-driven strategies.
