PROFESSIONAL SUMMARY

Highly skilled **Data Engineer** with **4+ years** of hybrid-cloud expertise in designing, building, and optimizing scalable data solutions across **Azure (ADF, Databricks, Synapse)** and **AWS (Glue, EMR, Redshift)**. Specializes in end-to-end ETL/ELT, **streaming pipelines (Kafka, PySpark, Apache Spark)**, and dimensional data warehousing. Enhanced deployment efficiency and achieved **99.9% reliability** through **CI/CD automation (Azure DevOps, Terraform)** and robust monitoring. Leveraged **BI platforms (Power BI, Tableau)** to deliver actionable data for business analytics.

Key Skills

Azure (ADF, Synapse) | AWS (Redshift, Glue) | Apache Spark/PySpark | Python/SQL | Snowflake | Kafka | Terraform/CI/CD | Dimensional Modeling

TECHNICAL SKILLS

Cloud Platforms: Azure (Data Factory, Synapse Analytics, Databricks), AWS (S3, Glue, EMR, Redshift, Lambda), GCP

Programming/Scripting: Python, SQL, Java, Scala, Bash, Shell Scripting

Big Data & Processing: Apache Spark, PySpark, Hadoop, Hive, Kafka, Databricks

Data Warehousing & DBs: Snowflake, Amazon Redshift, Azure SQL Database, SQL Server, PostgreSQL, MySQL

ETL & Orchestration: Azure Data Factory (ADF), Apache Airflow, AWS Glue, Informatica, SSIS, Talend, DataStage

DevOps & CI/CD: Azure DevOps, Terraform, Jenkins, GitHub Actions, Docker, Kubernetes

Data Architecture: Dimensional Modeling, Star/Snowflake Schema, Data Vault Modeling

Monitoring & BI: AWS CloudWatch, Azure Monitor, Grafana, Prometheus, Power BI, Tableau

Version Control: Git, GitHub, Bitbucket, JIRA, Confluence

PROFESSIONAL EXPERIENCE

Whirlpool Corporation

Michigan, USA

Data Engineer (Azure)

Aug 2024-Sept 2025

- Engineered and optimized modular **ETL/ELT pipelines** with **Python, SQL, and Apache Spark**, resulting in a **30% reduction in job latency** and enhancing data processing scalability.
- Automated data workflows using **Azure Data Factory (ADF)** and Azure DevOps, **decreasing deployment effort by 40%** via **Infrastructure as Code (IaC)**.
- Ensured **99.9% reporting accuracy** and **reduced production defects by 25%** through rigorous quality checks and pipeline tuning.
- Deployed optimized cloud-native solutions on **Azure, AWS, and Snowflake**, achieving **2X faster query performance** for enterprise analytics.
- Established **CI/CD workflows** in **Azure DevOps** for seamless deployment, **increasing release velocity by 20%**.
- Designed dimensional data models using **Dimensional Modeling** for BI and analytics integration with **Power BI**.

Premiere research - Remote

Boston, USA

AWS cloud Data Engineer

Oct 2023- July 2024

- Developed and maintained large-scale data pipelines using core **AWS services (Glue, EMR, S3)**, for high-volume data ingestion and transformation.
- Built serverless ETL solutions with **AWS Lambda**, **reducing infrastructure overhead by 30%** and automating data workflows.
- Designed and deployed **Amazon Redshift** data warehouses, optimizing schemas to **improve query performance by 40%**.
- Implemented **Infrastructure as Code (IaC)** with **CloudFormation and Terraform** to provision scalable AWS environments, **reducing deployment time by 60%**.
- Integrated **Kafka Streams** for near real-time data ingestion, ensuring **99.9% uptime** for data feeds (monitored via CloudWatch).

Infosys Limited

Hyderabad, IND

Systems Engineer(Client: Kraft Heinz)

May 2021-Feb 2023

- Developed and optimized ETL pipelines using **Apache Spark** and **Azure Data Factory (ADF)**, **cutting job runtimes by 35%** and accelerating data availability.
- Integrated enterprise datasets into **Snowflake**, utilizing clustering and indexing to **improve critical query performance**.

by 25%.

- Automated data validation and error handling with **Python/SQL scripting**, **reducing manual monitoring effort by 40%** and ensuring reliable production workflows.
- Improved pipeline scalability through advanced techniques (partitioning, caching, SQL optimization), reducing compute costs.
- Collaborated with global **Agile Scrum** teams environment, utilizing **Git** for version control and enforcing quality standards.

Value Momentum

ETL Developer

Hyderabad, IND

Sep 2020-April 2021

- Designed and developed batch ETL workflows using **Informatica** and **SQL Server Integration Services (SSIS)** for data migration, successfully migrating **15+ critical data marts**.
- Built and standardized reusable ETL mappings and workflows to support business-critical data pipelines, **reducing development time for subsequent projects by 20%**.
- Tuned complex **SQL queries** and ETL jobs for performance, resulting in a **15% reduction in average nightly batch processing time**.
- Automated ETL job scheduling and orchestration with **Control-M**, **eliminating manual nightly job startups** and ensuring timely data delivery.
- Conducted data profiling and quality checks, ensuring **99.5% accuracy and consistency** across key financial reporting datasets used in **Tableau** and **Power BI**.

EDUCATION

Chicago State University

Master of Science in Computer Science Engineering

Jayamukhi Institute Of Technological Sciences University

Bachelor of Technology in Computer Science Engineering

Chicago, USA

June 2023-Dec 2024

Warangal, India

Aug 2017-April 2021

PROJECTS AND CERTIFICATIONS

Data Engineering Projects

- **ETL Pipeline Optimization:** Designed and implemented scalable ETL pipelines (**SQL, Python, Apache Spark**), **reducing latency by 40%** for faster BI reporting.
 - *Purpose:* Resolved critical data delays in financial reporting workflows, ensuring business intelligence insights were delivered within required service-level agreements (SLAs).
- **Cloud Data Engineering with Azure:** Built production-ready data ingestion and transformation workflows using **Azure Data Factory (ADF)**, integrated with **Azure SQL and Snowflake**.
 - *Purpose:* Established a centralized, cloud-native data lake architecture to enable reliable, enterprise-wide reporting and replace outdated, costly on-premises processes.

Academic & AI Projects

- **Facial Emotion Recognition:** Developed a real-time emotion detection system using CNNs, achieving **92% classification accuracy**.
 - *Purpose:* Explored real-time human-computer interaction by classifying user emotional states for potential application in customer service analytics or adaptive teaching systems.
- **Vehicle Tracking using OpenCV:** Created a real-time vehicle detection and speed monitoring system using **YOLOv5**.
 - *Purpose:* Built a proof-of-concept for smart city surveillance to estimate traffic density and vehicle speeds for urban planning and traffic management.

Certifications

- **Microsoft Certified: Azure Fundamentals (AZ-900)**
