SUMMARY:

Results-driven Data Analyst with 3+ years of experience using **SQL**, **Snowflake**, and advanced machine learning to deliver impactful data solutions across **healthcare**, **insurance**, and **fintech**. Proven ability to enhance operational efficiency, streamline workflows, and generate insights using **ETL processes**, **Data exploratory analyses**, and data visualization tools (**Tableau**, **Power BI**, **Looker**). Skilled in collaborating with stakeholders to build predictive models and dashboards, writing, tuning, and troubleshooting SQL queries, and working with Actuaries, driving improved decision-making and measurable business growth.

SKILLS:

- **Programming Language:** Python, R, SAS, MATLAB, JavaScript.
- **Data Analysis Tools:** NumPy, Pandas, Matplotlib, SciPy, OpenCV, scikit-learn, TensorFlow, XGBoost.
- **Database Management:** SQL (MySQL, PostgreSQL), Snowflake, NoSQL (MongoDB), Hadoop, Spark, Oracle.
- **Visualization Software:** Tableau, Power BI, Microsoft Excel, Looker.
- **Cloud Technologies:** AWS (EC2, S3, RDS), Azure, Google Cloud Platform, Snowflake.
- **Data science & Analytics:** Data Analytics, Data Visualization, Data Mining, Data Modeling, Ad Hoc Analysis, Predictive Analytics.
- **Project Management:** Jira, Agile Methodologies, Stakeholder Collaboration.

EXPERIENCE:

Data Analyst – Elevance Health Inc., New York

May 2023 - Current

- Developed and deployed data-driven solutions for **predictive analytics**, optimizing healthcare service offerings and reducing claim processing times by **17%**, leveraging **SQL** and **Python**.
- Designed interactive dashboards using **Tableau** and **Power BI** to track patient outcomes, improving decision-making for health care providers and increasing operational efficiency by **15%**.
- Automated **ETL processes** for healthcare claims data, enhancing data accuracy and reducing data retrieval time by **20%** through cloud-based platforms like **AWS** and **Snowflake**.
- Led **data exploratory analyses** for patient readmissions, decreasing hospital readmissions by **7%** using machine learning algorithms and **predictive analytics**.
- Collaborated with cross-functional teams, including product and engineering, to streamline data workflows using **Jira** within an **Agile framework**, ensuring project milestones were met on time.
- Developed healthcare compliance reports for regulatory bodies, ensuring data integrity and meeting stringent healthcare standards with 100% accuracy using **SQL** and **data visualization**.

Data Analyst – Tata Consultancy Services (TCS), India

Sep 2021 - Aug 2022

- Engaged with internal stakeholders to gather data requirements for patient demographics and claim analysis, ensuring alignment across departments and improving data quality by **10%** through **Salesforce CRM** and **ETL tools**.
- Analyzed and cleaned large datasets related to patient demographics, improving data quality and accuracy by **12%** using **Python** and **R** for **statistical analysis**.
- Created custom reports using **Excel** and **Power BI** to track operational metrics, reducing reporting time by **15%** and increasing visibility into healthcare service performance.
- Collaborated with senior data analysts to refine predictive models for **insurance risk assessments**, reducing patient claims fraud by **10%** through **data mining** and **machine learning techniques**.

Junior Data Analyst – TATA Consultancy Services (TCS), India

Jan 2021 - Aug 2021

- Developed and implemented data models to assess insurance claim risks, improving claim approval efficiency by **15%** through **SQL** and **predictive analytics**.
- Designed business intelligence dashboards in **Power BI** to track customer segmentation and insurance policy performance, leading to a **12%** increase in cross-selling opportunities.
- Automated data workflows to streamline **policy renewal processes**, cutting renewal cycle time by **20%** using **Python** and **ETL frameworks** for **data integration**.
- Designed and deployed **Looker** dashboards to monitor customer segmentation and **fraud detection patterns**, reducing fraudulent claims by **10%** through **data visualization**.
- Worked with Actuaries to enhance claim risk models, improving accuracy in forecasting policy liabilities.

EDUCATION:

University of Massachusetts, Boston

Aug 2022 - May 2024

Master of Science in Business Analytics (Specialization in Big Data Analytics)

GPA - 3.6

Sathyabama University, India

Aug 2017 - May 2021

Bachelor of Engineering in Electronics and Communication Engineering

GPA - 3.8

CERTIFICATIONS:

AWS Cloud Practitioner, AWS

RedHat Certified System Administrator, RHCSA

Microsoft Azure(AZ-900), Microsoft

PUBLICATION:

- IEEE: "Development of open-CV framework for minutiae Extraction and matching of fingerprints" at the 3rd International Conference on Smart Systems and Inventive Technology (ICSSIT 2020). [Publication](#)
