SKILLS

- Technical: Tableau, Power BI, Python, SQL, R Studio, MS Project, NiCE CXone, MicroStrategy, SPSS, Jira, Google Analytics tools, Gemini AI, MS Office
- Soft: Leadership, Public Speaking, Analysis, Organization, Creativity, Collaboration, Strategy, and Communication

ACADEMIC PROJECTS

Predictive Analytics

- **Flight Fare Forecast:** Developed regression models in R Studio to predict flight prices in India, optimizing trip planning and providing cost-effective travel options for the Travel Club, and reducing costs by 2%.
- **Salary Predictor:** Constructed a salary prediction model with 85% accuracy using Python and R Studio, considering factors like experience, job title, and industry, to provide employees with transparent insights into expected earnings.

Data Visualization

- **Organic Produce Outlook:** Assessed organic produce consumption trends across different states in India and America, and found a 23% difference in consumption. Created comparisons using Power BI.

Neural Networks

- **Footwear Classifier:** Developed a Convolutional Neural Network for footwear image classification. Experimented with various architectures and image augmentation techniques, resulting in improved classification accuracy by 30%.

PROFESSIONAL EXPERIENCE

Cinch Home Services – Lifecycle Management: Business Analyst Intern; *Boca Raton, FL*

May 2025 – Present

- Created keywords for the **NiCE CXone** AI tool to classify service cancellations and reduce reliance on categories like “Other.”
- Worked with multiple teams to collect data and track real cancel reasons using **NiCE CXone** AI tool and compared them to what agents chose, finding an improved accuracy of 14% with the AI tool.
- Identified the least-used cancellation reasons and recommended strategies to reduce the number of options agents could choose by 10% to reduce confusion and increase precision.
- Presented my insights/recommendations to the executive board, backed up by reports made in **MicroStrategy** and **Excel**.

GenepowerRx – Data Analyst and Marketing Intern; *Hyderabad, Telangana/Remote*

May 2023 – July 2024

- Conducted a competitor analysis for foreign and Indian competitors using data from websites, traffic checkers, and financial reports. Organized findings using **Excel** and created reports in **Tableau** that influenced the decision to launch a new product.
- Conducted a live study to understand consumer perception of Genomic testing in India using **SPSS** and found that 60% of participants were open to getting a test done.

Wageindicator – Data Analysis and Visualization Intern; *Remote*

May 2022 – July 2022

- Streamlined salary benchmarking by collecting and analyzing global wage data from diverse sources.
- Optimized webpages with **A/B testing** and **Google Analytics tools** to boost engagement by 5%.
- Visualized and maintained salary trends using **Excel**, **Tableau**, **Google Data Studio**, and **Google Trends**, delivering actionable insights.

EXTERNSHIPS & COMMUNITY EXPERIENCE

Extern – Beats by Dre Data Analysis Extern; *Remote*

May 2025 – Present

- Conducted qualitative and quantitative research on Gen Z audio preferences, uncovering 5 key behavioral trends, aiming to boost marketing campaign accuracy by 15%.
- Used **Python** and **Gemini AI** to analyze 10,000+ consumer reviews across 8 audio brands, identifying sentiment patterns to provide decision-making insights to the marketing team.

Nirmaan Organization – Content Creation; *Remote*

May 2021 – July 2021

- Created content on social media platforms like **Instagram** to promote handmade products by underprivileged women, increasing visibility and sales by 7%
