SUMMARY

Versatile and results-driven **Full Stack Java Developer** with **4+ years of experience** designing, developing, and deploying secure, scalable, and cloud-native applications across finance, healthcare, and e-commerce domains. Expert in **Core Java, Spring Boot, React.js, Node.js, and Azure Cloud**, with deep knowledge of multithreading, memory management, REST/GraphQL APIs, and microservice architecture. Skilled in building CI/CD pipelines using **Azure DevOps, Jenkins, Docker, and Kubernetes**. Strong collaborator with a focus on code quality, performance, and delivering user-centric, production-ready solutions.

SKILLS

Languages: Core Java, Kotlin, Swift, Python, JavaScript, TypeScript, SQL, NoSQL

Front End: HTML5, CSS3, Tailwind CSS, Bootstrap, Context API, Redux, Redux-Saga, Next.js, React Router, Hooks, Lazy Loading

Back End: Java, RESTful APIs, Microservices architecture, Spring Security, OAuth2, JWT, Express.js, GraphQL, Modular Design Patterns, Servlets, Resteasy, Jetty, Node.js

Frameworks & Libraries: Spring Boot, Hibernate, JPA, React, React Native, Next.js, Redux, Redux-Saga, MVC, MVVM, Tailwind CSS, Bootstrap

DevOps & CI/CD: Azure DevOps, Jenkins, GitHub Actions, Docker, Kubernetes, Terraform

Cloud Platforms: Microsoft Azure, AWS, Google Cloud Platform

Mobile: iOS (Swift/Obj-C), Android (Kotlin/Java), Flutter (basic)

APIs & Integrations: Stripe, WebSockets, Server-Sent Events, OpenAI APIs

Messaging & ETL: Kafka, ETL Pipelines, HIPAA Compliance Handling

Testing & Optimization: JUnit, Mockito, Jest, React Testing Library, SWR, Code Splitting, Performance Tuning

Database: MySQL, MongoDB, Cassandra, PostgreSQL, DynamoDB, Redis

AI/ML & LLM: Azure AI/ML services, LangChain.js, Vercel AI SDK

EXPERIENCE

Premier INC., AR | Full Stack Developer

June 2024 - Present

- Designed and implemented distributed **microservices** using **Java 17, Spring Boot, Resteasy, and Jetty**, improving scalability and system reliability by 35%.
- Developed **HIPAA-compliant ETL pipelines** for secure **data transformation** and **synchronization** across **cloud platforms**
- Built **AI-powered frontend interfaces** using **React, Next.js, and Tailwind CSS**, integrated with **OpenAI APIs** and **LangChain.js** to deliver real-time **LLM-based experiences**
- Created backend systems to support **scalable MLOps pipelines** and **real-time model inference** using **Spring Boot** and containerized deployment
- Engineered **WebSocket** and **Server-Sent Events (SSE)** streaming layers with **Kafka** integration to enable **asynchronous messaging** and **live dashboard updates**
- Deployed **containerized microservices** to **Azure Kubernetes Service (AKS)** using **Terraform**, and implemented **CI/CD pipelines** through **Azure DevOps** for continuous delivery
- Applied **accessibility-first design principles** to meet **WCAG standards**, reducing load times by 30% using optimized **React** builds
- Tuned **frontend performance tuning** with **lazy loading** and **code splitting**, reducing initial load times by 40%
- Collaborated in **Agile sprints**, conducted **code reviews**, and participated in **system architecture discussions** to deliver secure, scalable releases.

JPMorgan Chase & Co., AL | Full Stack Developer

April 2023 – Oct 2023

- Delivered high-performing, cross-platform mobile applications using **React Native**, optimizing for Android and iOS ecosystems with device-specific enhancements.
- Engineered and maintained secure, scalable backend systems using **Java, Core Java multithreading, Spring Boot, and RESTful APIs**
- Designed and maintained **CI/CD pipelines** integrated with **Azure DevOps**, enabling rapid and stable deployment.
- Engineered **RESTful APIs** with **Spring MVC** and **Hibernate**, aligned with banking compliance standards and optimized for low latency.
- Collaborated with **ML teams** to integrate model endpoints and telemetry pipelines for intelligent risk and fraud detection.
- Conducted code reviews and validated production workflows using **SQL**, maintaining high data accuracy and regulatory compliance.
- Partnered with security teams to implement **OAuth2** and **JWT** standards for user authorization and access control.

Mphasis, India | Java Developer

Aug 2020 – Aug 2022

- Developed reusable backend modules using **Java** and **Spring Boot**, integrating with frontend systems via **RESTful APIs**.
- Built secure **ETL pipelines** to process and audit financial data in compliance with **SOX** and internal policies.
- Designed and maintained **CI/CD pipelines** using **Azure DevOps** and **Jenkins**, accelerating deployment velocity and reducing release friction.
- Engineered dynamic **React UI components** for internal banking tools, enabling real-time transaction insights with secure API consumption.
- Delivered scalable Android features using **Kotlin**, applying **MVVM**, asynchronous operations, and offline caching strategies.
- Improved reporting speed by **40%** through query optimization with **Hibernate** and **JPA**.
- Introduced smart caching and optimized transaction management, reducing average endpoint latency by **30%**.
- Maintained **schema versioning** across environments using **Liquibase**, ensuring consistent database state.
- Ensured quality through **unit testing (JUnit, Mockito)** and **integration testing (Postman)** workflows.
- Participated in **Agile ceremonies**, peer code reviews, and coordinated UAT and production deployment readiness.

Kheruva, India | Developer

March 2019 – Sept 2019

- Assisted Built and maintained backend modules using **Java**, **Node.js**, and frontend features using **React**, integrating internal tools with relational databases for reporting.
- Developed **dashboard UIs and backend services** using **React** and **Node.js** for internal analytics and reporting.
- Implemented responsive layouts and adaptive designs, ensuring **cross-browser compatibility** and mobile readiness.
- Simplified internal tool UI using modern **HTML/CSS best practices**, improving overall usability.
- Shadowed senior developers and learned core concepts of **software development lifecycle**, **version control**, and **deployment practices** using **Git** and **Visual Studio**.

EDUCATION

Master of Electronics and Computer Engineering

Aug 2022 – April 2024

University of Alabama at Birmingham, AL.

B. Tech in Electronics and Computer Engineering

July 2017 – July 2021

Keshav Memorial Institute of Technology, India.

PROJECTS

E-Commerce Website | React.js, Node.js, Spring Boot, MongoDB, AWS

Architected and developed a **scalable full-stack e-commerce platform** with features such as product management, secure checkout, and role-based user access. Built and integrated **RESTful APIs** for authentication, order management, and payments secured with **JWT** and **OAuth2**, and incorporated **Stripe payment gateway**, **real-time notifications (WebSockets)**, and **AI-powered product recommendations** using **OpenAI APIs**. Deployed on **AWS EC2** using **Docker containers** and automated **CI/CD pipelines** with **GitHub Actions** for continuous integration and zero-downtime deployment, while improving overall site performance and SEO by 35% through **Next.js server-side rendering** and optimization.

CERTIFICATIONS

- Microsoft Certified: Azure Developer Associate
