SUMMARY

Experienced **Data Analyst** with **4+ years** of experience specializing in the **extraction, analysis, and visualization** of large data sets to drive business solutions across diverse industries. Proficient in utilizing **advanced analytical** tools like **SQL, Python, Power BI**, and **statistical techniques** to identify trends, develop robust forecasting models, and deliver actionable insights. Demonstrated ability to lead projects and collaborate effectively with **cross-functional teams** to enhance data-driven decision-making and improve operational efficiency.

WORK EXPERIENCE

UVS Infotech Data Analyst

Batimore, MD
May 2024 - Present

- Extracted and mapped customer, quality, and warranty data from **legacy systems** into **SQL Server**, improving data standardization and reducing inconsistencies by **30%**.
- Designed **SQL-based validation scripts** to detect **anomalies** and reconcile **discrepancies**, reducing **billing errors** by 18%. Mapped and analyzed **customer interaction data**, enabling **personalized retention strategies** and boosting renewal rates by 12%.
- Partnered with **cross-functional teams**, including quality, finance, and customer operations to define **7 KPIs** and improve reporting accuracy. **Collaborated** with IT and data engineering teams to ensure seamless data flow into BI tools, improving dashboard refresh rates and performance.
- Built **Power BI dashboards** integrating SQL Server, API data, and Excel, implementing **custom reporting slicers, DAX calculations**, and a **star schema** to enhance customer satisfaction and increase visibility on warranty spending, risk assessment, and improve query performance.
- Built **SSRS-driven** financial reports to track warranty spending and quality metrics, streamlining financial analysis.
- Led **ad-hoc analysis** for leadership, leveraging **SQL** and **Power BI** to uncover trends in amount spent on warranty claims, customer demographics, and customer warranty claim frequency.
- Utilized **Git, Jira**, and **Confluence** to ensure streamlined collaboration with **stakeholders**, version control, and comprehensive process documentation.

ATOMS - UMBC Data Analyst

Baltimore, MD
Jan 2023 - May 2024

- Developed **Python** scripts using **pandas** and **numpy** to clean and transform unstructured university data (student, financial, healthcare, and HR) into structured formats for efficient analysis and reporting.
- Created tables, views, and stored procedures in **SQL Server** to optimize data management and query performance.
- Aggregated data from **multiple sources**, including internal systems, databases, and spreadsheets into a centralized repository using **Azure Data Factory**.
- Built organization-specific **KPIs**(key performance indicators) in consultation with **stakeholders** to track and monitor the performance
- **Optimized** Power BI dashboards by enhancing **data models**, **reducing load times** by 30%, and improving visual insights through efficient **DAX** queries and best practices in data modeling.
- Conducted **ad hoc analyses** and delivered actionable insights to **cross-functional teams**, supporting data-driven decisions in budgeting, enrollment trends, and employee retention strategies.

Protegrity Role: Data Analyst | ETL

Hyderabad, IND
Jan 2021 – July 2022

- Performed **data analysis** on the current cloud usage of the company using **Python** and **SQL**, driving cost optimization initiatives.
- Performed **statistical analysis** to pinpoint 30+ workloads costing >\$500 K per year and redesigned cluster configurations, and cut related EC2 and Databricks costs by 30 %.
- Utilized **Databricks** for large-scale data analysis and pipeline orchestration; integrated version control with **Git** to ensure collaborative, auditable, and reproducible workflows across the team.

- Developed complex **Excel** reports using advanced formulas (**VLOOKUP, INDEX-MATCH, pivot tables**) to streamline data analysis and reporting.
- Defined and tracked **KPIs**, including cloud utilization rate, compute cost per workload, and storage efficiency metrics using **Python** and **SQL** to measure cloud performance effectively.
- Collaborated closely with **stakeholders** to analyze data and recommend improvements, ensuring alignment with **business requirements** and monitoring updated workflows
- Designed and implemented cost breakdown dashboards in **ThoughtSpot**, integrated with Databricks to provide actionable insights on job runs, cluster utilization, and environment setups.

PROJECTS

LLM-Powered Job Matcher & Salary Forecasting (LangChain, GCP)

LLM, GCP, Python, GenAI, Time Series, RAG, Docker, Agents

- Deployed an LLM-powered solution on Google Cloud Run to automate job-skill qualification review, reducing manual workload by 80% and enabling scalable salary benchmarking for executive workforce planning across counties.
- Implemented a pipeline using LangChain and Sentence Transformers to scrape and parse public-sector postings, applying embeddings and a Random Forest model for automated similarity scoring.

Sales Performance & Customer Analytics Dashboard

SQL, Python (Pandas, Matplotlib, Seaborn), Tableau, Power BI

- Conducted EDA using advanced SQL to analyze 18,000+ customer transactions, uncovering that a single product category drove 69% of revenue and identifying churn-risk segments for targeted campaigns.
- Designed Power BI dashboards to visualize KPIs (AOV, Churn, Recency) and supported A/B testing efforts, which led to a 14% improvement in user engagement by guiding the selection of top-performing variants.

AWARDS, RECOGNITION, CERTIFICATIONS

- **Power BI**
- **Databricks**
- **Data Science for Business**
- **Received “Best Associate” for the year 2021 for outstanding contribution to the data conversion team**

Technical Skills

- **Databases:** Snowflake, Microsoft SQL Server, PostgreSQL, MongoDB(NoSQL)
- **Programming Languages:** Python (NumPy, Pandas, Matplotlib, Scikit-learn, Seaborn, Scipy), R (Shiny, ggplot2), SQL, DAX
- **Data Visualization:** PowerBI, Tableau, ThoughtSpot
- **Cloud:** AWS(EC2, S3, Lambda, API Gateway, Redshift, Glue, QuickSight), Azure(ADF, ADLS, Azure SQL, Azure Databricks), GCP(Dialogflow, Looker Studio)
- **Big Data:** Apache Spark, Hadoop, Databricks, Snowflake
- **ETL:** SSIS, Azure Data Factory, AWS Glue
- **Tools:** Microsoft Excel, Docker, Streamlit, JIRA, Postman
- **CI/ CD:** Git, Terraform
- **Machine Learning:** Classification, Regression, Time series models
- **IDEs:** Visual Studio Code, PyCharm
- **Interpersonal Skills:** Problem-solving, Communication Skills, Attention to Detail, Teamwork, Adaptability, Time Management, Root Cause Analysis, and Project Management

EDUCATION

University Of Maryland Baltimore County

Master's in Data Science (GPA: 3.7/4)

Maryland, USA

Aug 2022 - May 2024
