

SRI HARI GANESH REDDY KONALA

Jersey city, NJ, United States | 2018935490 | ganeshreddy1250@gmail.com | [LinkedIn](#) | [Github](#)

PROFILE

Software Engineer with hands-on experience designing and building scalable software components using **Java, Python, and JavaScript**. Experienced in developing **RESTful APIs, backend logic, and responsive web interfaces** with **Spring Boot, React, and Node.js**. Adept at debugging, performance tuning, and collaborating with cross-functional teams in **Agile** environments. Passionate about clean code, structured design patterns, and continuous learning through peer reviews and real-world project delivery.

PROFESSIONAL EXPERIENCE

Infosys Limited

Hyderabad, India

Software Engineer (Java & API Development)

Jan 2022 - Jan 2024

- Built and optimized Spring Boot RESTful services supporting L3 provisioning and network automation systems, improving service response time by 25%.
- Collaborated with senior developers to modularize Java components and implement layered architecture for six enterprise modules, improving maintainability and reusability.
- Integrated APIs with MySQL-backed services, applying indexing and query optimization techniques to reduce data retrieval time by 30%.
- Participated in Agile sprint cycles, providing input during user story refinement, estimating effort, and ensuring smooth feature delivery through code reviews and stand-ups.
- Troubleshoot and debugged production issues using log tracing and database audits, resolving incidents 40% faster through structured root-cause analysis.
- Contributed to CI/CD pipelines in GitLab by writing build scripts and automating unit test execution for backend modules.

NeelBlue Technologies

Hyderabad, India

Software Developer (Backend & Data Systems)

Mar 2019 - Dec 2021

- Developed Node.js microservices and Python-based data pipelines for an AI-enabled financial reporting product, supporting analytics workloads across multiple environments.
- Implemented API integrations between backend services and front-end clients (React, Angular), ensuring 100% functional validation across data flows.
- Designed SQL schemas and created stored procedures to standardize report generation and financial summaries.
- Partnered with senior engineers during code merges and debugging sessions, refining data handling logic and resolving integration bugs before production rollout.
- Automated build and deployment steps using Git and Jenkins, reducing manual release preparation time by 20%.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL

Frameworks: Spring Boot, React, Node.js, Angular

Databases: MySQL, PostgreSQL

Tools: Git, GitHub, Jenkins, Docker, Maven

Concepts: OOP, Data Structures, Algorithms, REST APIs, Design Patterns

Practices: Agile Scrum, Version Control, Code Review, Continuous Integration

PROJECTS

CloudMart Multicloud Project ([GitHub](#))

- Engineered an end-to-end **e-commerce web application** using **Spring Boot, React, and Node.js**, with containerized deployment on **AWS, Azure, and GCP**.
- Implemented **product catalog APIs, user authentication**, and CI/CD workflows through **GitHub Actions** and **Docker**.
- Integrated **AI-based sentiment analysis services** to enhance real-time insights, demonstrating capability to connect external APIs and manage asynchronous data streams.
- Configured **Terraform scripts and Kubernetes clusters** for multi-cloud scalability and zero-downtime deployments.

EDUCATION

Pace University - New York, NY

Master of Science (MS) in Information Systems

01/2024 – 05/2025
