Professional Summary

- Accomplished Data Analyst with over 7 years of experience in transforming raw data into actionable insights, driving strategic decision-making and business growth across industries including consumer products, BFSI, logistics, and healthcare.
- Proficient in programming languages and tools such as Python (NumPy, Pandas, Matplotlib, Scikit-learn), R, SQL, Tableau, and Power BI, with expertise in creating predictive models, performing statistical analysis, and building interactive dashboards.
- Demonstrated ability to handle datasets exceeding 5 million records, implementing data cleaning, preprocessing, and transformation techniques to improve data quality and ensure accuracy analysis.
- Proven track record in optimizing processes through automation, ETL pipelines, and workflow integrations, achieving up to 50%-time savings in reporting and data processing tasks.
- Skilled in predictive analytics and machine learning techniques, including regression, clustering, classification, and NLP, achieving 90% forecast accuracy and improving business KPIs.
- Expertise in data visualization and storytelling, delivering over 20 dynamic Tableau and Power BI dashboards to monitor KPIs, sales performance, and market trends, leading to informed and timely decision-making.
- Experienced in conducting customer segmentation and churn analysis using clustering techniques, improving engagement and retention rates by developing targeted marketing strategies.
- Adept at collaborating with cross-functional teams, defining KPIs, and aligning analytics solutions with organizational objectives, resulting in measurable impacts such as a 15% improvement in decision-making efficiency and a \$200K annual cost reduction.
- Knowledgeable in data governance and compliance, ensuring adherence to GDPR and internal policies while handling sensitive consumer data, maintaining 100% audit compliance.
- Strong foundation in project management, requirement gathering, UAT, and agile methodologies, with expertise in creating detailed documentation such as BRDs, SDDs, and user stories.
- Passionate about leveraging data analytics and automation to streamline operations, enhance customer satisfaction, and drive measurable business outcomes.

SKILLS

Programming & Scripting: Python (NumPy, Pandas, SciPy, Matplotlib, Seaborn, Scikit-learn), R programming, SQL (Advanced queries, stored procedures, database optimization), MATLAB, PySpark, VBA for Excel.

Data Management & Processing: Data cleaning and preprocessing, data transformation, feature engineering, ETL (Extract, Transform, Load), data pipelines (Apache Airflow, KNIME), Microsoft Access.

Visualization & Reporting: Tableau, Power BI, dashboards (custom and interactive), Jupyter Notebook, Excel (Advanced Pivot Tables, Lookups, Data Solver, Frontline Solver), Google Data Studio.

Database Management: MySQL, PostgreSQL, Microsoft SQL Server, Hadoop (HDFS, MapReduce), NoSQL databases (MongoDB, Cassandra), Databricks.

Cloud Platforms: Microsoft Azure (Data Factory, Databricks), AWS (Redshift, S3, QuickSight), Google Cloud (BigQuery, Data Studio).

Machine Learning & Predictive Modeling: Regression, clustering, classification, predictive modeling, forecasting, natural language processing (NLP), A/B testing, feature selection, feature

engineering.

Big Data & Automation: Hadoop ecosystem (HDFS, MapReduce), PySpark, Apache Spark, workflow automation with Python.

Analytical & Statistical Tools: SPSS, Excel (Advanced analytics features), Google Analytics.

Collaboration & Version Control: Git, GitHub, GitLab, JIRA, Confluence.

Functional & Analytical Skills: Data analysis, storytelling with actionable insights, dashboards, KPI tracking, sales analysis, market analysis, trend analysis, requirement gathering (interviews, workshops), user acceptance testing (UAT), process optimization, business rule definition, descriptive statistics, data modeling, predictive analytics, prescriptive analytics, documentation (BRDs, SDDs, user stories), agile methodologies.

Domain-Specific Skills: Workflow mapping (Lucidchart, Visio), SEO analysis, resource planning (LINGO), customer segmentation, behavior analysis, supply chain optimization, inventory management.

EXPERIENCE

J&J, Remote

May 2023 - Present

Data Analyst, Consumer Products

- Utilized SQL and Python to extract and clean datasets of over 5 million records from sales, marketing, and supply chain databases, reducing data errors by 30% and ensuring consistency for analysis.
- Designed and maintained 10+ Tableau dashboards that provided real-time insights into sales performance and market trends, leading to a 15% improvement in decision-making efficiency for cross-functional teams.
- Conducted sales trend analysis on a product portfolio worth \$50M, identifying a 20% drop in demand for a key product segment and recommending a revised marketing strategy, resulting in a 10% revenue increase within six months.
- Built predictive models using Python to forecast demand with 90% accuracy, optimizing inventory levels and reducing overstock costs by \$200K annually.
- Partnered with marketing and product development teams to evaluate the performance of 15+ promotional campaigns, identifying high-performing regions and boosting campaign ROI by 25%.
- Analyzed consumer feedback from surveys and social media sentiment, identifying key areas for product improvement that increased customer satisfaction scores by 18%.
- Ensured compliance with GDPR and internal data governance policies while handling sensitive consumer data, achieving 100% audit compliance in quarterly reviews.
- Automated weekly reporting processes in Excel and Python, reducing report preparation time by 50%, saving 10+ hours per month.
- Segmented customer base into 5 distinct categories using clustering techniques, enabling targeted marketing strategies that drove a 12% increase in customer engagement rates.
- Streamlined data workflows by implementing ETL pipelines, reducing data processing time by 40% and enabling faster decision-making.

Algonox Technologies Pvt. Ltd.

January 2017 - May 2022

Business Data Analyst

- Designed and developed interactive dashboards in Tableau and Power BI to track performance metrics, providing actionable insights into chatbot interactions, churn analysis, and operational KPIs.
- Analyzed sensor data and historical logs to identify machinery failure patterns, supporting predictive maintenance strategies through Python, SQL, and Excel-based dashboards and reports.

- Built Power BI dashboards for workforce, material, and energy forecasting using statistical techniques, enabling data-driven decision-making based on historical and market trends.
- Developed Tableau dashboards for a logistics company to track goods and monitor OCR-extracted invoice data, providing shipment statuses and ETA predictions.
- Created churn analysis dashboards for gym members by analyzing attendance, engagement, and usage data using SQL and Python, identifying key churn drivers and suggesting retention strategies.
- Designed tailored workout plans for gym members by analyzing fitness goals, attendance, and workout history, leveraging Python and Excel for advanced data manipulation.
- Performed EDA on large datasets using Python and SQL, identifying trends and anomalies to guide strategic decisions.
- Applied techniques like regression analysis, hypothesis testing, and time-series analysis to uncover trends and patterns in business and operational data.
- Extracted, cleaned, and transformed large datasets from SQL databases, ensuring high-quality data for analysis and reporting.
- Collaborated with cross-functional teams to define KPIs and develop visualizations in Tableau and Power BI, simplifying complex data for stakeholder understanding.
- Automated accounts payable processes for a BFSI company by integrating OCR-based RPA workflows and defining business rules, improving efficiency.
- Contributed to process automation by leveraging OCR and RPA technologies for data collection, transformation, and reporting tasks.
- Delivered insights to enhance business strategies by analyzing large datasets and presenting findings through interactive dashboards and reports.
- Worked with diverse teams to align data-driven solutions with business objectives, ensuring actionable and impactful outcomes.

PROJECTS

- **Bitcoin Price & Trade Strategy Prediction:** Designed a PySpark-based simulation to analyze minute-to-minute Bitcoin pricing, developed an HFT strategy, and assessed performance through backtesting and transaction costs.
- **Semrush Keyword Research & Content Marketing:** Led keyword research and content marketing strategies to boost online visibility and organic traffic using SEMrush analytics.
- **Predictive Model for Housing Prices:** Built a Python-based model to predict housing sales prices after data cleaning and analysis of influencing factors.
- **Customer Personality Analysis:** Analyzed customer purchasing patterns using R to enhance marketing strategies and product offerings.
- **Titanic Survival Prediction Model:** Developed a predictive model using data cleaning, analysis, and testing to estimate Titanic survival chances.
- **Predictive Model for Length of Hospital Stay (LOS):** Built a Python model to predict hospital stay length based on data analysis of influential factors.
- **Inventory Management System:** Designed an SQL-based real-time inventory tracking system to streamline operations.
- **Sleep Health & Lifestyle Analysis:** Performed EDA on sleep and health data to explore correlations between sleep patterns and lifestyle factors.
- **Market Research on Weight-Loss Advertising:** Conducted survey-based research and analyzed results using SPSS to understand the psychological impact of weight-loss campaigns.
- **Industrial Analysis Project:** Analyzed the Food & Beverage industry's performance and created individual reports on financial forecasting, marketing, operations, and logistics for a dairy company.

CERTIFICATIONS

- **BCGX Data Science Simulation (Forage):** Applied Python for hypothesis framing, exploratory data analysis, feature engineering, and predictive modeling (Random Forest) for churn prediction.
- **Quantium Data Analytics Simulation (Forage):** Analyzed customer data and transaction datasets to identify benchmark stores for uplift testing and supported strategic decisions through comprehensive reports.
- **British Airways Data Science Simulation (Forage):** Analyzed customer review data and built a predictive model to identify factors influencing buying behavior.
- **KPMG AU Data Analytics Job Simulation (Forage):** Evaluated demographic data and created dashboards for client customer targeting in data analytics.
- **Cognizant AI Simulation (Forage):** Conducted EDA using Python for Gala Groceries, trained models, and presented results to stakeholders.
- **Google Analytics 4**

EDUCATION

Clark University School of Management

Worcester, MA

Master Of Science In Business Analytics, 3.85 GPA

School of Management Scholarship Recipient
