PROFESSIONAL SUMMARY

Data Analyst , graduate with a Master's in Computer Science, Motivated and detail-oriented graduate with a Master's degree in Computer Science, seeking an entry-level role in Data Analytics. Skilled in data analysis, data cleaning, and data visualization using tools such as Python (Pandas, Matplotlib, Seaborn), SQL, Excel, and Tableau. Experienced in transforming raw data into meaningful insights and presenting findings through clear and compelling visual dashboards and reports. Strong foundation in statistics, problem-solving, and analytical thinking, with a passion for leveraging data to support strategic decision-making. Adept at communicating technical information to both technical and non-technical audiences and eager to contribute to a data-driven team.

EDUCATION

Master of Science in Computer Science

Wright State University, Fairborn, OH

GPA: 3.8

Graduation: July 2025

Bachelors in Technology in Information Technology

Jawaharlal Nehru Technological University Kakinada - University college of

Engineering Vizianagaram

CGPA: 7.86 / 10.00

Graduation : May 2022

PROJECTS

Multi-Disease Risk Prediction Platform (2025)

- Designed a multimodal healthcare analytics platform predicting risks for 5 chronic diseases (diabetes, heart disease, anemia, kidney, liver) using Python, SQL, and machine learning models (Random Forest, XGBoost, CNN), achieving 88% classification accuracy on a dataset of 50,000 patient records.
- Performed data preprocessing and feature engineering on text (symptoms), numerical (lab results), and image (X-ray) data with Pandas, NumPy, and Scikit-learn, reducing feature redundancy by 40%.
- Integrated generative AI (OpenAI API, LangChain) to build a chatbot handling 100+ daily symptom inputs and generating personalized reports, improving user engagement by 35%.

Sales Analytics Dashboard (2024)

- Analyzed 100,000+ sales records to identify revenue trends and customer segments using Python and SQL, uncovering 15% seasonal revenue growth patterns.
- Built Power BI dashboards tracking 20+ KPIs, enabling 50% faster decision-making for product performance analysis.
- Automated reporting for 5 weekly reports, saving 10 hours of manual effort per week

Customer Churn Analysis (2024)

- Conducted exploratory data analysis on a 25,000-customer dataset using Python, SQL, and statistical modeling, identifying 3 key churn drivers.
- Developed logistic regression models with Scikit-learn, achieving 85% precision in predicting churn for 5,000 high-risk customers.
- Visualized customer segments with Seaborn and Matplotlib, proposing retention strategies that could reduce churn by 20%.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, OCaml, R
- **Data Processing & Analytics:** Pandas, NumPy, Excel (Advanced), Dask
- **Data Visualization:** Tableau, Power BI, Seaborn, Matplotlib, Looker Studio
- **Databases:** MySQL, PostgreSQL, Snowflake
- **Cloud Platforms:** AWS(Red shift, S3), Google Cloud Platform (BigQuery)
- **Tools:** Jupyter Notebook, Streamlit, Git, Google Analytics, Microsoft Office Suite

CERTIFICATIONS

- IBM Data Analytics Professional Certificate, Coursera
- Microsoft Certified: Power BI Data Analyst Associate, Microsoft
- AWS Cloud & AI Practitioner certifications, AWS
