

SRI SURYA GANESH YANAMADALA

DATA ANALYST

+1(786)-535-0141 | ssgyanamadala@gmail.com | <http://linkedin.com/in/sri-surya-ganesh-yanamadala> | <https://github.com/suryayanamadala>

Professional Summary

As a Data Analyst with over 3 years of experience, I specialize in transforming complex data into actionable insights that drive business decisions. I have successfully analysed data sets of up to 5 million rows, identifying key trends and patterns to optimize processes and improve performance. Proficient in tools such as Excel, SQL, Python, and Tableau, I have contributed to increasing operational efficiency by 15-20% in previous roles. I excel in generating detailed reports and visualizations, and I collaborate with cross-functional teams to meet business objectives, consistently delivering data-driven solutions that enhance decision-making and boost productivity.

Skills

Data Analysis & Visualization	Excel (Advanced functions, Pivot Tables, VLOOKUP), Google Analytics, Tableau, Power BI, Python (pandas, NumPy, Matplotlib, Seaborn, Plotly)
Programming Languages	Python, SQL, R
Databases & Storage	MySQL, SQL Server (Complex Queries, Joins, Stored Procedures), Microsoft SQL Server
Cloud Technologies	Microsoft Azure (Azure Functions, Data Factory, Storage Services), Databricks
Geospatial Tools	ArcGIS Pro, ArcGIS online, QGIS
Data Science Skills	Feature Engineering, ETL, Data Mining, Model Selection and Evaluation, Exploratory Data Analytics, Statistics, Regression, Classification, Time Series Analysis
Microsoft Power Platform	PowerApps (Canvas, Model Driven), Power Automate, Dataverse, SharePoint
Development & Collaboration Tools	Jupyter Notebook, PyCharm, Anaconda, Google Colab, Visual Studio Code, Git, Agile & Scrum Methodologies
API & Version Control	API & Version Control
Soft Skills	Strategic Planning, Problem Solving, Analytical Thinking, Communication, Data Storytelling, System Thinking, Innovation, Quality Improvement

Work Experience

Florida International University, Miami, FL.	SEP 2024 – Present
Data Analyst	
- Developed a Python-based image processing system to detect and classify bird nests from high-resolution aerial images, enhancing the accuracy and speed of nest identification. - Designed an automated system to identify and mark bird nests, eliminating manual tagging, reducing human error, and improving consistency across datasets. - Designed and implemented an automated dashboard in ArcGIS Online to monitor real-time buoy data, visualizing key metrics like salinity, pH, chlorophyll levels, and battery health for efficient data-driven decision-making. - Built a Python-based automation pipeline integrated with OpenAI API and LLM workflows to automate data ingestion, processing, and real-time updates to the ArcGIS dashboard without manual intervention. - Integrated OpenAI API with Python workflows to automate data processing and ensure seamless, intelligent decision-making for updating dashboards and reports, reducing manual overhead. - Developed a LLM-based system to automatically trigger dashboard updates in ArcGIS Online, ensuring real-time data synchronization without manual effort, thus enhancing operational efficiency. - Designed and developed interactive dashboards in Power BI to visualize complex datasets, enabling stakeholders to derive actionable insights from real-time data. - Integrated Python scripts within Power BI to automate advanced data manipulations and streamline repetitive tasks, ensuring efficient and accurate data processing. - Experienced in using Python (Pandas, NumPy) for data cleaning, transformation, and analysis of large datasets, improving data quality and accuracy. - Utilized Python APIs and LLM-driven workflows to automate data uploads and streamline system interactions, enabling efficient and reliable data flow across platforms.	
Crypton Technosoft, Miami.	AUG 2023 – AUG 2024
Data Analyst	
- Analysed large datasets to identify trends, patterns, and insights, supporting data-driven decision-making processes. - Developed and maintained dashboards and reports using tools like Excel, Power BI, or Tableau to visualize key performance metrics. - Collaborated with cross-functional teams to understand business needs and translate them into data analysis requirements. - Cleaned, processed, and transformed raw data to ensure accuracy and consistency for reporting purposes.	

- Conducted exploratory data analysis (EDA) to uncover hidden opportunities for business improvements, identifying key areas that contributed to a 10% increase in overall operational efficiency.
- Automated data collection and reporting processes, reducing manual effort by 40% and enhancing operational workflows.
- Provided actionable recommendations based on data analysis, helping to optimize business strategies and increase revenue by 8% year-over-year.
- Utilized SQL and other database tools to query and extract data from relational databases, handling over 1 million records monthly.
- Assisted in the development of predictive models and performed data validation to ensure model reliability.
- Monitored data quality and integrity, identifying and resolving discrepancies in datasets.
- Created ad hoc reports and conducted detailed analyses for special projects, meeting client and business requirements.

Datanet Techno Solutions , Bengaluru, India.

AUG 2020 – DEC 2021

Junior Data Analyst

- Collected, cleaned, and analysed large datasets to identify trends, patterns, and insights for business decision-making.
- Assisted in the creation and maintenance of databases, ensuring data integrity and accuracy.
- Developed and generated regular reports on key performance indicators (KPIs) and business metrics for stakeholders.
- Collaborated with cross-functional teams to understand data requirements and deliver actionable insights.
- Utilized tools like Excel, SQL, and Python for data manipulation, increasing data processing efficiency by 25%.
- Performed exploratory data analysis (EDA) on datasets with more than 1 million rows, identifying critical trends and data anomalies.
- Created and maintained dashboards and visualizations in Power BI, improving stakeholder decision-making time by 15%.
- Supported senior analysts in data-driven projects, contributing to the optimization of internal processes, resulting in a 10% reduction in process time.
- Participated in data validation and quality assurance for projects, ensuring 99% data accuracy for client-facing reports.

Projects

Cricket Data Analytics [[Github](#)]

- Conducted an in-depth analysis of the cricket T20 World Cup (2022) data to optimize a best 11 players team using advanced Bright Data web scraping techniques and comprehensive datasets from ESPNcricinfo.
- Applied advanced analytical techniques, including statistical analysis, data modelling, and machine learning algorithms, to extract meaningful insights and identify patterns.
- Leveraged Power BI for data visualization to create interactive dashboards, providing granular insights into player performance, team composition, and comparative analysis. Enabled stakeholders to make informed, data-driven decisions by delivering clear, visual representations of analysis results, improving engagement and understanding.

Emergency Room Visits Dashboard [[Tableau](#)]

- Engineered an interactive Tableau dashboard to analyse and visualize emergency room (ER) visits data, leveraging advanced data visualization techniques.
- Generated comprehensive insights into patient demographics, wait times, satisfaction scores, and departmental referrals through data aggregation and visualization.
- Enabled healthcare administrators to identify trends, optimize resource allocation, and enhance patient care strategies by applying advanced analytical methodologies.
- Improved healthcare operations by enabling data-driven strategies and optimizing patient care delivery through actionable visual analytics.

Helping Hands Website [[Report](#)]

- Designed and implemented a comprehensive platform for aid and support connections, ensuring a seamless user experience with a dynamic front-end.
- Utilized HTML5, CSS3, AngularJS, Bootstrap, and JavaScript to create a responsive and interactive user interface, enhancing user engagement and accessibility.
- Developed a robust back-end using Node.js, Express.js, Django, and Python, optimizing performance and ensuring secure data handling and storage with MongoDB.
- Employed Git for version control, facilitating efficient team collaboration and maintaining code integrity throughout the development process.

Education

Master's in Computer Science

Florida International University, Miami, Florida

Jan 2022 – DEC 2023

Certifications

- Google Data Analytics Professional Certificate [[Coursera](#)]
