EDUCATION

New York Institute of Technology, Manhattan, New York – United States

Master of Science in Data Science

EXPECTED: DEC 2026

New York Institute of Technology, Manhattan, New York – United States

Bachelor of Science in Computer Science

G.P.A: 3.86/4

EXPECTED: DEC 2025

Academic Honors: Presidential Honor List (2021 – Present) and Dean’s Honor List (2021 – Present)

TECHNICAL SKILLS

Programming Languages: Java, Python, C#, C++, MATLAB, HTML, CSS, JavaScript, React Native, Node.js
Tools & Technologies: REST APIs, Docker, AWS, S3, Postman, GitHub, CI/CD
Database: SQL, MongoDB, PostgreSQL, DynamoDB, Firebase

WORK EXPERIENCE

Interlinked

Back End Developer Intern

JULY 2025 - Present

- Designed and scaled backend APIs and real-time data pipelines, ensuring high performance and seamless integration across AI, infrastructure, and product layers.
- Collaborated with cross-functional teams to deliver production-grade features by contributing to system design and optimizing backend performance and scalability, resulting in a 50% reduction in API response times and improving deployment frequency by 30%.
- Leveraged AWS services to build scalable storage solutions and optimize data accessibility, improving system reliability and enabling efficient management of large-scale datasets.

InterSoft Associates, Inc.

Software Developer

JAN 2025 - JULY 2025

- Developed web and client-server applications in the .NET environment, improving functionality and reducing bugs by 40%.
- Created and optimized stored procedures in Microsoft SQL Server, resulting in a 25% increase in query efficiency and faster data processing.
- Collaborated with senior developers to design software requirements, including integration with third-party systems, and produced detailed reports using SQL Server Reporting Services.

New York Institute of Technology

Supplemental Instructor

JAN 2024 - Present

- Conducted weekly SI sessions to assist 45 students in reviewing challenging course material, employing effective strategies learned from training workshops to enhance their comprehension and retention.
- Provided critical support to students by reinforcing complex concepts through group study sessions, engaging discussions, practice quizzes, and guidance on effective study techniques.

National Institute of Technology

Cloud Computing Engineer Intern

JUN 2023 - AUG 2023

- Implemented Mobile Cloud Computing using encryption and decryption for data security and data processing.
- Utilized Network Simulator 2 (NS2) to evaluate and compare different protocols, identifying the most scalable and efficient solutions for database access in various scenarios.
- Compared different protocols to handle database scalability and provide users with efficient access.

New York Institute of Technology

Peer Tutor

SEP 2022 - Present

- Tutored Computer Science and Calculus courses by simplifying complex concepts and adapting teaching methods to individual learning styles, resulting in a 95% improvement in student performance.
- Developed tailored learning materials and exercises, leading to improved student outcomes, with over 90% of tutees reporting increased confidence and understanding of course content.

PROJECTS

[Rently AI](#)

- Developed a secure peer-to-peer rental app integrating AI-powered chatbot for item recommendations, rental agreements, item tracking, and a 5-star rating system.
- Led a cross-functional team of 5 through the full development lifecycle, overseeing planning, task delegation, and progress tracking to ensure timely delivery of the rental app.

[Beyond Language](#)

- Developed a cross-platform language-learning app with interactive features like audio lessons, progress tracking, and parental monitoring to enhance user engagement and learning outcomes.
- Successfully deployed the app using agile development methodologies, resulting in a 30% increase in user retention and positive feedback on usability and effectiveness.

[Smart Attendance Application](#)

- Developed an Android application using Java and Firebase to automate attendance for educational institutions, leveraging the FusedLocationProviderClient API for 95% accurate location tracking and verification.
- Implemented secure user authentication with the Bcrypt algorithm for password hashing, enhancing data security and reducing authentication errors by 40%.
