Summary

Software Developer with industry experience building scalable backend services, RESTful and SOAP APIs, and responsive front-end components using Java, Spring Boot, Angular, and AWS. Experienced in containerization with Docker, deployments on AWS EC2 via Kubernetes, and writing optimized SQL procedures for data-driven applications. Comfortable working in Agile teams and contributing to all phases of the development lifecycle.

Education

George Mason University

Master of Science in Software Engineering

August 2021 - May 2024

Fairfax, VA

Osmania University

Bachelor of Engineering in Computer Science

August 2016 - May 2020

Hyderabad, IN

Experience

Progrite Systems, Inc.

Software Developer | Java, Amazon EC2, SpringBoot

June 2024 – Present

San Jose, CA

- Contributed to the design and development of backend features using Spring Boot, Spring Data JPA, and Hibernate to build and maintain SOAP and RESTful APIs within an MVC framework.
- Assisted in developing responsive front-end components using Angular, added WebSocket support to enable real-time updates and improve user interactivity.
- Supported deployment of containerized services using Docker and Kubernetes on AWS EC2 instances; worked with IAM roles and automated build pipelines using Maven, Gradle, and CI/CD workflows.
- Implemented SQL queries, stored procedures, and JDBC integrations for Oracle-based data access, contributing to reliable and consistent CRUD operations in production systems.
- Collaborated closely with engineers, QA, and product teams in Agile sprints to troubleshoot issues, track progress, and present working features during demos and reviews.

George Mason University

Graduate Research Assistant | Machine Learning, Python, TensorFlow, Django

August 2023 – May 2024

Fairfax, VA

- Collaborated with interdisciplinary research teams to estimate feature development using Python, Django, and Flask.
- Implemented survey-related data extraction pipelines and advanced anonymization techniques, achieving 90% accuracy.
- Conducted machine learning research using TensorFlow and regression models to uncover data trends and correlations.

George Mason University

Graduate Teaching Assistant | Data Structures and Algorithms, Java

January 2024 – May 2024

Fairfax, VA

- Delivered real-time coding support for AIT 512 Data Structures and Algorithms Essentials in Java, expertly guiding over 30+ students to achieve a 90% pass rate.
- Provided guidance on Java build tools such as Maven and Gradle for dependency management and project builds.
- Boosted overall academic performance by 25% through targeted programming assistance and troubleshooting.

Digi Planet Techno Solutions Pvt. Ltd.

Software Developer | Java, SpringBoot, ReactJS, JavaScript, MySQL, Thyme Leaf

January 2020 – July 2021

Hyderabad, TS

- Developed a geolocation-based lending and borrowing web application using ReactJS and Spring Boot within the MVC architecture, integrating scalable RESTful APIs backed by MySQL, which maintained 95% system uptime
- Integrated SMS push notifications using Twilio API for real-time updates, leading to a 20% increase in user interactions
- Established database connections, and managed backend data resulting in a 95% UX improvement and demonstrating expertise in web development and Agile methodologies.

Technical Skills

Languages and Frameworks: Python, Java, Kotlin, Django, C, C++, JavaScript, HTML5, CSS, SQL, PostgreSQL, MongoDB, Angular, SpringBoot, Node.js, Next.js, React.js, Restful API, Flask, Apache Kafka, Apache Hadoop.

Cloud Technologies: AWS Cloud (EC2, S3, Glue, SNS, RDS, Lambda, QuickSight, DynamoDB), Kubernetes, Terraform

Libraries: Pandas, NumPy, PySpark, Scikit-Learn, Keras, TensorFlow, Matplotlib, Sklearn, Seaborn, SciPy, NLTK.

Tools: PyCharm, Postman, Git, Selenium, JUnit Testing, Docker, LaTeX, Jenkins, Splunk, TypeScript, Go, Maven, Gradle

Projects

TaskMaster – Backend Service for Task Management App <i>Node.js, TypeScript, PostgreSQL, Docker</i>	May 2024
• Developed a backend microservice architecture using Node.js and TypeScript with RESTful APIs and Kafka messaging. • Implemented unit and integration tests using JUnit to ensure reliability and maintainability across core backend services • Containerized the app with Docker and deployed to AWS EC2 using CI/CD pipelines via GitHub Actions. • Followed DevSecOps principles by implementing secure API endpoints and validating configuration hygiene using GitHub’s built-in secret scanning.	
Cloud Enhanced Stock Screener <i>Python, Amazon RDS, AWS S3, Amazon QuickSight, AWS Glue</i>	January 2024
• Leveraged AWS Lambda for scalable and cost-effective execution of data processing tasks in a stock screener application • Employed AWS Glue for automated ETL processes to enhance data preparation, integrated Amazon RDS for reliable storage management, and utilized AWS S3 for secure storage of extensive stock data. • Incorporated Amazon QuickSight for interactive data visualization and intuitive exploration of stock trends generation • Optimized data transformation workflows in AWS Glue to reduce latency and improve processing efficiency through format tuning and job parallelization.	
Full Stack Survey Management System <i>Angular, Spring-Boot, MySQL, TailwindCSS, Kubernetes</i>	April 2023
• Optimized a full-stack application to enable users to participate in surveys, achieved a 95% improvement in UX. • Users can access and view responses stored in MySQL databases, resulting in a 90% improvement in user experience. • Deployed a scalable survey platform as containerized microservices via Kubernetes clusters, achieving CI/CD automation and operational resiliency in a cloud-based distributed architecture.	

Certifications and Memberships

• Certification in Spring MVC, Spring Boot and Rest Controllers	November 2023
• Certification in PHP, Java and MySQL Training - IIT Bombay	October 2018
• Computer Society of India, Committee Member – Machine Learning Seminar	July 2016
