

Sri Charan Reddy Nannuri

Overland Park, KS | nannurisricharan@gmail.com | +1(475)-281-9724 | <https://www.linkedin.com/in/sricharanreddy-nannuri/>

Professional Summary

Highly skilled Full Stack Developer. Proven track record in developing scalable applications and innovative solutions. Adept in strategic planning, technical documentation, and agile methodologies, consistently delivering high-quality solutions in dynamic environments while enhancing productivity and user engagement.

Education

- **Master of Science in Computer Science | Aug 2022- May 2024 | GPA: 3.87/4.0 | University of Central Missouri, Warrensburg, MO**
Relevant Course Work: Cloud Computing & Big Data, Operating Systems, Advanced Web Application & Services Development, Advanced Algorithms, Advanced Database Systems, Machine Learning, Compiler Design, Artificial Intelligence, Programming Foundation in Data Science & AI
- **Bachelor of Technology in Electronics and Communication Engineering | 2016-2020 | GPA: 8.73/10**
Jawaharlal Nehru Technological University, Hyderabad, India
Course Work: C, Database Management System, Java, Php, Internet of Things, Alexa Programming, Device Programming

Skills

- Microsoft PowerApps & Power Automate, Salesforce Platform (Admin, Development)
- Full Stack Development, MVC, Code Review, Technical Documentation, Leadership, SDLC, Strategic, Verbal Communication and Written skills, Critical Thinking, Technical Engineering & Specs, Git, Scrum, Jira, Agile Methodology, Design Problem Solving, Internet of Things, Teamwork, Debugging
- Python, Go, Java, C, C++, Node.js, ReactJS, AngularJS, Servlets, JSP, JavaScript, HTML, CSS, Bootstrap, jQuery, TypeScript, Php, Spring Boot, Microservices, Maven, Jenkins, AWS, Arduino Programming, MySQL, Database Management Systems, MongoDB, Neo4J, REST, Object Oriented Programming, OOPS
- Microsoft Visual Studio Code, Arduino IDE, Eclipse, Proteus, IntelliJ, Spring Tool, Postman. for API testing.

Work Experience

- **PS Engineer Banking | NCR Corporation India Pvt. Ltd. (Jan 2021 – Aug 2022)**
 - Developed an application for creating and maintaining a Product oriented Virtual Customer Profile using Microsoft PowerApps Tool and AngularJS (Canvas, Model Driven, Automate)
 - Demonstrated expertise in full-stack development by integrating AngularJS for platform customization and spearheaded the creation of a dynamic application utilizing Microsoft PowerApps, empowering seamless creation and management of Product oriented Virtual Customer Profiles.
 - Leveraged Canvas, Model Driven, and Automate functionalities to enhance efficiency and productivity.
 - Conducted in-depth analysis of product data utilizing SharePoint, driving actionable insights and informed decision-making processes. Utilized AngularJS to implement custom features and functionalities, enabling dynamic and interactive user interfaces and demonstrated proficiency in data interpretation and presentation, contributing to strategic business initiatives.
 - Employed AngularJS best practices to optimize application scalability and performance, ensuring efficient handling of data and resources. Implemented modular design principles and performance tuning strategies to enhance responsiveness and minimize latency, facilitating smooth and responsive user interactions.
 - Facilitated comprehensive training sessions on the developed application, equipping team members with the necessary skills to leverage its functionalities effectively. Acted as a knowledge resource, providing guidance and support to ensure optimal utilization of tools and platforms. Collaborated closely with team to align application development objectives with organizational goals.
 - Championed a culture of continuous improvement by actively seeking feedback, identifying areas for enhancement, and implementing iterative refinements to optimize application performance and user experience. Committed to staying abreast of emerging technologies and best practices to drive innovation and excellence.
- **Demo Engineer IoT Intern | Salesforce.com India Pvt. Ltd. (Oct 2019 – Feb 2020)**
 - Led the development of impactful IoT demonstrations leveraging Java, Python, and device programming, seamlessly integrating with the Salesforce Platform. Applied expertise in IoT architecture and protocols to create innovative solutions driving business value and customer engagement.
 - Spearheaded projects involving cutting-edge technologies such as Google AIY Voice Kit, Amazon Dash Buttons, and OpenCV. Leveraged these technologies to develop proof-of-concept solutions, pushing the boundaries of innovation and exploring new avenues for technological integration.
 - Demonstrated prowess in leveraging IoT events to trigger actions within the Salesforce organization. Engineered seamless integration between IoT devices and Salesforce, enabling real-time data processing and actionable insights for enhanced business operations.
 - Gained hands-on experience with emerging technologies and platforms, expanding knowledge and skill set in the rapidly evolving IoT ecosystem. Actively contributed to the implementation and experimentation of novel solutions, fostering a culture of innovation and exploration.
 - Collaborated across teams and disciplines to drive the success of IoT initiatives. Engaged in cross-functional collaboration to align technical solutions with business objectives, delivering solutions that are both technically robust and strategically aligned with organizational goals.

- **Software Trainee | E-PAM Systems India Pvt. Ltd.** (Feb 2019 – July 2019)
 - Attended an intensive Industrial-Ready Software Engineer Pre-Education Program with EPAM Systems, delving into crucial topics such as Software Engineering Best Practices, OOP Design Principles, Release Strategies, and Front-end Technologies.
 - Equipped with comprehensive knowledge and practical skills to excel in software engineering roles, with a focus on delivering high-quality solutions and driving continuous improvement.
 - Gained hands-on experience in unit testing, version control with GitHub, and agile methodologies, fostering a strong foundation in collaborative and iterative development processes.
 - Developed proficiency in Java and front-end technologies, enhancing technical versatility and problem-solving capabilities and prepared to effectively contribute to dynamic development teams and adapt to evolving industry standards and practices.
- **Junior IoT Engineer | R&D Center - Keshav Memorial Institute of Technology** (Dec 2017 – Oct 2018)
 - As a Junior IoT Engineer in the School of New Emerging Technologies (SONET) at the R&D Center of KMIT, I developed an end-to-end IoT application for pulse and heart rate analysis using Alexa.
 - This project involved creating an integrated health monitoring system using a pulse oximeter sensor connected to a health kit, operated through a Raspberry Pi microprocessor.
 - I utilized Java to develop a custom jar file that facilitated data transfer from the sensor to the Raspberry Pi.
 - The data was then updated to AWS Cloud via an AWS Lambda function, which continuously accepted data and stored it in an S3 bucket and the system interfaced with a Virtual Alexa Simulator, programmed to report patient data to doctors and relatives upon inquiry.
 - Additionally, the application sent alerts for abnormal patient data via email or SMS to emergency services and related persons, ensuring timely medical intervention.
 - This project demonstrated my proficiency in device programming, cloud services, and voice assistant development, as well as my ability to create automated alert systems for real-time health monitoring.

Projects

- **Employee Management Application**
 - Developed an end-to-end full-stack application using ReactJS for the frontend, incorporating React forms for seamless data input and validation. Implemented Bootstrap for responsive UI design and enhanced user experience across devices, ensuring a visually appealing interface.
 - Leveraged React Hooks to manage state and lifecycle events efficiently, enhancing code readability and maintainability.
 - Utilized Spring Boot in the backend to implement RESTful APIs for CRUD operations, connecting seamlessly with a SQL database for persistent data storage.
 - Integrated comprehensive backend functionalities, ensuring secure data transmission and efficient handling of business logic, showcasing expertise in full-stack development and modern web application frameworks.
- **Interactive Sales Performance Dashboard**
 - Developed an interactive sales performance dashboard using ReactJS, designed to provide a user-friendly interface for monitoring sales data, identifying trends, and making data-driven decisions.
 - Implemented adaptable charts and visualizations to facilitate clear and insightful analysis of organizational sales metrics. ReactJS's component-based architecture ensured responsive and efficient rendering of data, enhancing user experience and interaction.
 - The dashboard enabled seamless integration and visualization of complex sales data, empowering stakeholders to make informed decisions swiftly. Its intuitive design and real-time data updates facilitated agile decision-making and enhanced overall sales management efficiency.
- **Kinect (Xbox 360) Controlled Robotic Device**
 - Developed a gesture recognition system utilizing Kinect Xbox 360 sensor technology to enable real-time detection and interpretation of user gestures. Integrated the gesture recognition system with a robotic platform, allowing the robot to respond dynamically to recognized gestures, enhancing user interaction and control.
 - Employed software development skills to synchronize Kinect sensor data with robotic responses, creating a responsive and intuitive user experience for controlling robotic actions through gestures.
- **Autonomous Colored Object Detector and Follower Robot**
 - Developed a robotic system using PixyMon, Dexter and Raspberry Pi integration for color-based object detection, picking, and segregation tasks. Implemented PixyMon software to enable real-time color recognition and tracking, facilitating precise identification of targeted objects. Utilized Dexter and Raspberry Pi hardware to control robotic movements, enabling automated picking and segregation of detected objects into designated containers based on their color, demonstrating proficiency in robotic vision and automation.

Leaderships

- **Founder & Club Head (2018-2020) of ABHINAYA -The Drama Club, KMIT, Hyderabad.**
Led and managed a club for 2 years, overseeing a diverse group of over 40 students involved in various theatre art forms. Organized workshops and stage show, fostering a collaborative and creative environment that enriched student skills and showcased their talents.
- **Member of Student Council in KMIT (2019-2020), KMIT, Hyderabad.**
Served as a senior coordinator and advisor for the student council at KMIT, collaborating closely with the President and Vice President to establish the Election Commission and successfully organize the 2020 Presidential Election. Played a pivotal role in ensuring transparent and democratic student governance processes.
