

SRIHARIKA UMMAGONI

Dekalb, IL

📞 779-212-2574 ✉ sriharikaummagoni12@gmail.com  [linkedin](#)

Professional Summary

- Experienced Data Analyst and Software Engineer with 4+ years of proven expertise in data integration, analysis, and automation across insurance, pharma, and financial services.
- Skilled in designing and implementing ETL pipelines, reports, and dashboards using tools such as **SQL**, **Python**, **Power BI**, **SSIS**, and **Tableau**.
- Worked across hybrid and cloud environments using **Azure**, **AWS**, and **on-prem SQL/Oracle** systems to support data warehousing and reporting workflows.
- Hands-on experience with business process automation using **Power Automate**, **VBA macros**, and reporting tools to streamline operations and improve accuracy.
- Collaborated cross-functionally with QA, actuarial, underwriting, and product teams in **Agile Scrum** environments to deliver high-quality data solutions.

Education

Northern Illinois University

Master of Science in Computer Science

DeKalb, Illinois

Certifications

- Microsoft Certified: Power BI Data Analyst Associate
- Google Certified: Data Analytics Professional

Experience

State Street Corporation

Jan 2024 – Present

Senior Data Analyst

Chicago, IL, USA

- Spearheading analytics initiatives within the financial compliance and reporting division by building scalable data models, dashboards, and insight pipelines across multi-cloud platforms.
- Developed complex **SQL** queries and views to extract, clean, and validate datasets from **Oracle**, **Snowflake**, and **SQL Server** for regulatory reporting.
- Performed advanced data profiling, cleansing, and transformation using **Python (Pandas, NumPy)** and visualized key trends with **Matplotlib**, **Seaborn**, and **Power BI**.
- Integrated **ETL pipelines** using **Azure Data Factory** and **Databricks** to enrich and normalize incoming data from internal and external data providers.
- Collaborated with business stakeholders and data stewards to define **data quality metrics**, create validation frameworks, and implement anomaly detection rules.
- Built executive dashboards in **Power BI** and **Tableau** enabling senior leadership to monitor operational KPIs and risk indicators in near real time.
- Automated reporting workflows using **Power Automate**, **Jupyter Notebooks**, and integrated pipelines with Microsoft Teams for alerting and insights delivery.
- Maintained documentation of logic flows, data lineage, and transformation rules to ensure transparency and audit readiness.
- Collaborated cross-functionally with finance, risk, and engineering teams to translate business requirements into actionable data solutions.
- Followed **Agile Scrum methodology**, actively participating in daily standups, sprint planning, backlog grooming, and retrospectives.

Novartis India

May 2021 – Dec 2022

Data Analyst

Hyderabad, India

- Supported the Commercial Analytics team in delivering data-driven insights for drug performance, patient adherence, and market segmentation using structured analytics pipelines.
- Extracted and transformed large datasets from **SAP HANA**, **SQL Server**, and **Excel** using **SQL** and **Power Query** for exploratory and statistical analysis.

- Built interactive dashboards in **Power BI** and **Tableau** to visualize sales trends, physician outreach, and territory-level KPI performance.
- Performed data wrangling, imputation, and summarization using **Python (Pandas, NumPy)** and conducted ad hoc analytics for business questions.
- Created automated data refresh schedules and reports using **Power BI Gateway** and **Power Automate** to streamline weekly executive reporting.
- Collaborated with cross-functional teams to validate product-level data from multiple systems and ensure accuracy for downstream analytics models.
- Developed DAX measures, calculated columns, and drill-through pages in Power BI for executive insights and sales leadership consumption.
- Participated in forecasting and segmentation analysis using statistical techniques in **Python (Statsmodels)** and exported results to visualization tools.
- Documented data lineage, transformation logic, and KPIs in Confluence to ensure reusability and compliance.
- Worked within an **Agile environment**, engaging in sprint planning, reviews, and retrospective sessions to prioritize analytics deliverables and ensure stakeholder alignment.

HDFC Life

Mar 2020 – Mar 2021

Analyst/Software Engineer

Mumbai, India

- Contributed to policy analytics and digital claims automation by integrating structured data from insurance systems into reporting and decision-making workflows.
- Designed ETL workflows using **SSIS, T-SQL**, and stored procedures to extract data from **SQL Server**, Oracle, and flat files into reporting databases.
- Developed dashboards and scorecards in **Power BI** to track claim cycle time, policy renewals, agent performance, and fraud indicators.
- Wrote **VBA macros** and automated Excel reports that reduced manual effort by 60% across operations teams.
- Maintained and optimized backend processes for client lifecycle management applications using **C#, ASP.NET**, and **SQL Server**.
- Integrated REST APIs with policy servicing modules to sync data across internal systems, improving data consistency and reducing service lag.
- Collaborated with actuarial and underwriting teams to generate summary reports and validate premium calculations across multiple product lines.
- Participated in monthly data audits and implemented data integrity rules to support compliance with internal audit standards.
- Actively contributed in **Agile sprint cycles**, including daily scrums, retrospective meetings, and task estimation exercises.

Technical Skills

Languages: Python, Java, SQL, Scala, C, HTML/CSS, JavaScript, TypeScript, Bash, R

Cloud Platforms: Microsoft Azure (ADF, Synapse, Databricks, Purview), Amazon Web Services (Glue, Redshift, S3, Lambda, Kinesis), Google Cloud Platform (BigQuery, Dataflow, Composer, Pub/Sub)

Big Data Technologies: Apache Spark, PySpark, Hadoop, Hive, HBase, Kafka, Sqoop, NiFi, Impala, Delta Lake

ETL/ELT Tools: Azure Data Factory, AWS Glue, SSIS, Informatica, Talend

Databases & Warehouses: Snowflake, BigQuery, Redshift, Synapse Analytics, SQL Server, Oracle, MySQL, PostgreSQL, MongoDB

Data Visualization & BI Tools: Power BI, Tableau, Grafana, Matplotlib, Seaborn

DevOps & CI/CD: Azure DevOps, AWS CodePipeline, Jenkins, GitHub Actions, Git, Docker, Kubernetes, Terraform, ARM Templates, CloudFormation

Orchestration & Workflow: Apache Airflow, Cloud Composer, Oozie, Control-M

Data Quality & Testing: Great Expectations, PyTest, Selenium, JUnit, Postman

Developer Tools & IDEs: VS Code, IntelliJ, Eclipse, Jupyter, Android Studio, Notepad++

Operating Systems: Windows, Linux, Ubuntu, CentOS

Other Tools & Platforms: Jira, Confluence, SharePoint, ServiceNow, Power Automate, VBA, WordPress
