CARRER OBJECTIVE

- Accomplished **Java Full Stack Developer** with **4+ years of end-to-end experience** in designing, developing, deploying, and maintaining **enterprise-grade web and cloud-based applications** using **Java/J2EE, Spring Boot, Microservices, and modern front-end frameworks**.
- Expertise in **Spring Boot, Spring Core, Spring Batch, Hibernate ORM**, and **RESTful API** development for building high-performance, secure, and scalable enterprise applications.
- Proficient in **front-end technologies** such as **HTML5, CSS3, Bootstrap, JavaScript, TypeScript, Angular (AngularJS to Angular 2+), and Backbone.js**, delivering responsive and user-friendly interfaces.
- Experienced in developing and integrating **Microservices** and **server-side JavaScript applications** using **Node.js (Express.js, Hapi.js)** and asynchronous, event-driven design patterns.
- Solid experience with **Cloud Platforms (AWS, Azure, GCP)** — including **EC2, S3, Lambda, API Gateway, RDS, and CloudWatch** for deploying, monitoring, and scaling cloud-native applications.
- Proficient in **containerization and orchestration** using **Docker and Kubernetes**, ensuring consistent, portable, and efficient deployment of applications across hybrid and multi-cloud environments.
- Skilled in **MLOps pipelines and automation**, including **model lifecycle management, CI/CD integration, monitoring, reproducibility**, and deployment of ML models using **Jenkins, GitHub Actions, Docker, and cloud-based ML services (AWS SageMaker / Azure ML)**.
- Expertise in **RDBMS and SQL programming**, designing and optimizing **queries, triggers, stored procedures**, and schema for **Oracle, MySQL, PostgreSQL, and DB2**, integrated via **Hibernate/JPA**.
- In-depth knowledge of **Enterprise Design Patterns (MVC, DAO, Singleton, Factory, Service Locator, Business Delegate, Front Controller, Session Facade)** ensuring reusable, maintainable, and scalable system architectures.
- Strong hands-on experience in **Agile/Scrum, version control (Git, SVN), build automation (Maven, Gradle, Ant), and continuous integration/delivery (Jenkins, Docker)** for streamlined DevOps workflows.

RELEVANT SKILLS

- **Programming Languages:** Java, JavaScript (ES6+), TypeScript, SQL, PL/SQL, Node.js, HTML5, CSS3
- **Frameworks & Technologies:** Spring (Core, MVC, Boot), Hibernate, EJB (Stateful, Stateless, Entity, Message Driven Beans), JSP, Servlets, RESTful & SOAP Web Services, Microservices Architecture, Express.js, Hapi.js
- **Frontend Technologies:** Angular (2+), React.js, AngularJS, jQuery, Bootstrap, Dojo, Backbone.js, AJAX
- **Cloud & MLOps:** AWS, Azure, Docker, Kubernetes, Jenkins CI/CD, MLOps practices (model deployment, monitoring, pipeline automation), Containerization, Cloud-based scaling
- **Databases:** Oracle, Microsoft SQL Server, MySQL, PostgreSQL, MongoDB; SQL query optimization and performance tuning
- **Design Patterns & Architecture:** MVC, Singleton, Factory, DAO, Service Locator, Session Facade, Front Controller, Business Delegate, SOA, Event-Driven Architecture
- **Version Control & Build Tools:** Git, SVN, CVS, Maven, Ant, Gradle
- **Application Servers:** WebLogic, JBoss, Tomcat, Glassfish
- **DevOps & Monitoring:** Jenkins, Log4j, JIRA, Agile (SCRUM), Waterfall SDLC, CI/CD pipelines
- **Testing Tools:** JUnit, Mockito, Mock Testing frameworks
- **Other Tools & Skills:** JSON, XML, JMS, JNDI, Java Mail, Sockets, Bootstrap (Responsive Design).

RELEVANT EXPERIENCE

Java Full Stack Developer

Telephone and Data Systems - Chicago, Illinois, USA

Feb 2025 - Current

Telephone and Data Systems, Inc. is a Chicago-based telecommunications service company providing wireless products and services. Design, develop, and maintain scalable web applications using Java, Spring Boot, and related frameworks. Implement user interfaces using front-end technologies such as Angular, React, or Vue.js.

Key Responsibilities:

- Designed and developed **Java APIs and AWS Lambda functions** to manage and automate **AWS services** such as EC2, S3, CloudWatch, and VPC; implemented **serverless solutions** for cost-efficient and scalable cloud operations.
- Implemented **Microservices architecture** using **Spring Boot** following the **12-factor app methodology**, ensuring modular, independently deployable components; maintained **API documentation with Swagger** for seamless integration and testing.
- Built and optimized **end-to-end CI/CD pipelines** using **Jenkins, Docker, Kubernetes, and GitHub Actions**, enabling continuous integration, automated testing, and streamlined deployment for both **Java and MLOps workflows**.
- Developed and scheduled **batch jobs** using **Autosys**, integrating **SQL invoker, UNIX shell scripts, and Core Java** for data processing and job automation in enterprise systems.
- Collaborated on designing and implementing **data-driven solutions using Cassandra and Java**, including efficient **data modeling, partitioning, and bucketing strategies** for large-scale distributed systems.
- Created and enhanced **RESTful APIs** using **Node.js, Express.js, and MongoDB**, and developed **reusable TypeScript components in ReactJS** to consume APIs, improving UI performance and maintainability.
- Configured **containerized environments** using **Docker** (Dockerfiles, automated builds on Docker Hub) and **Kubernetes** for orchestration, achieving consistency and scalability across hybrid cloud deployments.
- Engineered **scalable MLOps pipelines** integrating **Docker, Kubernetes, Jenkins, and cloud ML services (AWS SageMaker)** for **model deployment, monitoring, version control, and reproducibility** across environments.

Technologies Used: AWS, Cassandra, CI/CD, core java, Docker, EC2, Eclipse, Git, GitHub, Hibernate, IntelliJ, Java, Jenkins, JUnit, Kafka, Kubernetes, Microservices, MongoDB, MySQL, Oracle, PCF, React, S3, Spring, Spring Boot, SQL

Java Full Stack Developer

Optum - Schaumburg, Illinois, USA

April 2024 - Jan 2025

Optum, Inc. is an American healthcare company that provides technology services, pharmacy care services and various direct healthcare services. Deployed the applications using Jenkins, GitHub Actions, or similar CI/CD tools. Managed deployments on cloud platforms

Key Responsibilities:

- Led migration of legacy applications to **Microsoft Azure**, leveraging **Azure App Services, Storage, and DevOps pipelines**, while ensuring secure, scalable, and cost-optimized cloud deployments integrated with **Pivotal Cloud Foundry (PCF)** environments.
- Architected and implemented **microservices** using **Spring Boot, Spring Batch, Spring Cloud, and Netflix Eureka**, secured through **Spring Security (ADFS)**, enabling modular, high-availability enterprise systems with seamless authentication and role-based access.
- Developed and deployed enterprise-grade solutions on **WebSphere Application Server** and **Linux environments**, automating builds and deployments via **GitLab CI/CD, Maven, and Jenkins**, and managing source control with **GitLab and SVN**.
- Designed and delivered an advertising system leveraging **Java 8, Spring Boot 2.4, JPA, MySQL, Kafka, and Docker**, integrating **RabbitMQ** for real-time event-driven messaging and asynchronous communication across microservices.
- Implemented end-to-end **MLOps workflows**, containerizing ML models using **Docker** and orchestrating via **Kubernetes**, with **Jenkins and GitHub Actions** for CI/CD automation, model versioning, and performance monitoring across cloud environments.
- Enhanced front-end and data integration layers using **AngularJS, HTML5, CSS3, jQuery, Node.js, and Express.js**, integrated with **Splunk Enterprise APIs** for real-time analytics and migrated relational data from **SQL Server to Cassandra** for high-volume, low-latency applications.

Technologies Used: Angular, Azure, Cassandra, CI/CD, CSS, Docker, Git, GitHub, GitLab, HTML, IntelliJ, Java, Java 8, JDBC, Jenkins, Microsoft Azure, MySQL, PCF, Spring, Spring Cloud, Spring Security, SQL, SQL Server, SVN.

Java Full Stack Developer

Kshema General Insurance - Hyderabad, India

August 2021 - Nov 2022

Kshema General Insurance Limited is a digital insurance provider focused on the rural sector in India. Utilized the version control systems, such as Git, to manage codebase changes and collaborate with other developers.

Key Responsibilities:

- Developed and maintained **RESTful APIs** using **Spring Boot**, ensuring high performance and reliability; implemented **unit tests (JUnit 5)** and leveraged **IntelliJ IDEA** for efficient Java development and debugging.
- Deployed and managed scalable **microservices** across **AWS Cloud** using **Docker** and **Kubernetes**, integrated **AWS Lambda** for serverless computing, and utilized **Amazon CloudWatch** for real-time monitoring, logging, and alerting of cloud resources.
- Implemented **CI/CD pipelines** using **AWS CodePipeline** and **GitHub** for automated builds, testing, and deployments, ensuring consistent delivery and collaborative source code management in distributed development environments.
- Integrated messaging systems by consuming **JMS Message-Driven Beans** with **ActiveMQ**, enabling asynchronous, event-driven communication across microservices and backend services.
- Enhanced front-end functionality by developing **interactive UI features using ReactJS** (e.g., **React-Draggable**), and collaborated in **peer code reviews via JIRA**, maintaining application stability and high-quality standards in Agile-based development.

Technologies Used: AWS, AWS Lambda, EC2, Eclipse, Git, GitHub, IntelliJ, JMS, Kubernetes, MySQL, Oracle, React, Spring, Spring Boot, SQL, SQL Server

Java Developer

Bharat Forge - Hyderabad, India

June 2020 - July 2021

Bharat Forge Limited is an Indian multinational company involved in forging, automotives, energy, construction and mining, railways, marine, aerospace and defence industries. Participated in Agile ceremonies, such as sprint planning, daily stand-ups, and retrospectives.

Key Responsibilities:

- Designed and developed full-stack web applications using **Java 8, Spring Boot, Hibernate ORM, Servlets, and JSP**, following **MVC architecture** to ensure modularity and scalability; implemented **SOA based RESTful services** using **Apache Axis**.
- Built and optimized responsive UIs with **HTML5, CSS3, JavaScript, Bootstrap, and AngularJS**, implementing **client-side validation** and dynamic data binding for enhanced performance and user experience across multiple devices.
- Implemented **CI/CD pipelines** using **GitHub Actions** and **Jenkins**, automating build, testing, and deployment of **Spring Boot microservices** to **Pivotal Cloud Foundry (PCF)**, improving delivery speed and reliability.
- Optimized **SQL queries** for data-intensive reports in **JasperReports** and integrated **Oracle BPM** workflows; leveraged **Core Java** features like **Collections, Multi-threading, Streams, and Lambda expressions** to enhance application performance.
- Developed and maintained Unix shell scripts for daily job automation, participated in **Agile/Scrum ceremonies**, performed **unit testing with JUnit**, conducted **peer code reviews**, and ensured robust application delivery across all phases of the **SDLC**.

Technologies Used: Angular, AngularJS, CSS, CSS3, Eclipse, Git, GitHub, Hibernate, HTML, HTML5, Java, Java 8, JavaScript, Jenkins, JUnit, Microservices, MVC, Oracle, PCF, S3, SDLC, Servlets, SOA, Spring, Spring Boot, SQL
