SUMMARY

Business Analyst with a strong track record of delivering actionable insights and optimizing business processes across finance, healthcare, and agriculture industries. Skilled in using SQL, Python, R, and SAS to extract and analyze complex datasets, driving strategic decisions that enhance business outcomes. Adept at managing projects through Agile and SDLC methodologies, ensuring timely delivery of high-quality solutions. Expertise in requirement gathering, creating detailed documentation (FRD, BRD, SRS), and developing interactive dashboards using Tableau and Power BI for real-time insights. Proven ability to conduct Gap Analysis, Cost/Benefit Analysis, and optimize data pipelines, resulting in measurable improvements in efficiency and customer engagement.

SKILLS

Languages:	SQL, Python, R, SAS.
Methodology:	SDLC, Agile, Waterfall, Scrum, Kanban, Lean Six Sigma.
Documentations:	FRD, BRD, SRS, Test Plan, User Guide.
Project Management Tools:	MS Project, MS Excel, MS SharePoint, Asana, Trello, Rally.
Visualization Tools:	Tableau, Power BI, Google Data Studio.
Tracking Tools:	Jira, HP Quality Center, Rational ClearQuest, RTM.
Business Analysis:	Cost/Benefit Analysis, Impact Analysis, GAP Analysis, Risk Analysis, Root cause Analysis.
ERP Planning & CRM:	SAP, MS Dynamics Nav, Salesforce, HubSpot, Epic and Oracle.
Technical Skills:	KPI, user Acceptance Testing (UAT), Alteryx, Requirement gathering, Google Analytics, Data Analysis, MS Visio, Joint Application Development (JAD), MS Office, User Story creation, Software development & testing, Data Modelling, Database Knowledge, Business Intelligence (BI) Tools, Process Mapping, User Experience (UX) Understanding, Quality Assurance (QA) Knowledge, Prototyping.
Soft Skills:	Time management, Leadership, Management, Problem-solving, Negotiation, Decision- Making, Documentation and Presentation, Verbal communication, Sprint Planning, Sprint Reviews, Interview Sessions. SWOT Analysis.
Operating System:	Windows, Linux.

PROFESSIONAL EXPERIENCE

Business Analyst Capital One, USA	07/2024 – PRESENT
- Facilitated requirement gathering for the My Credit My Wellness portal using MS Excel, logging functional requirements and user stories. Collaborated with stakeholders in creating customized credit features that led to a 25% rise in customer engagement. - Assessed portal usage by developing SQL queries and analyzing the same through Google Analytics to track key metrics such as user flow and repayment habits. Established microloan application tendencies, resulting in a 30% rise in approval rates. - Performed daily NAV calculations to provide accurate estimates of cash, reconciliations, and reporting of income, expenses, and financial positions. - Improved UI through UX research and wireframing in MS Visio, improving design and satisfaction by 22%. - Facilitated Agile sprint planning and backlog grooming through Jira, decreasing development cycle times by 15%. - Conducted Gap Analysis in Excel and Tableau, eliminating discrepancies in financial data and improving accuracy by 20%. - Led cross-functional efforts to rationalize financial reporting, improving collaboration and data alignment. - Led UAT for key features with HP Quality Center, eradicating 40% defects post-release while ensuring product integrity. - Developed Power BI dashboards to give real-time insights into financial health and customer behavior, informing data-driven decision-making and improving reporting efficiency by 18%. - Collaborated with the development team to automate reporting processes, eliminating 10 hours of weekly manual data entry and maintaining accuracy and consistency in financial reports. [Tech Stack: SQL, Power BI, Google Analytics, MS Excel, SRS, UAT, Gap Analysis, Jira, MS Visio, HP Quality Center]	

Business Analyst Intern

CVS Health, USA

01/2024 – 05/2024

- Utilized SQL to design complex queries with JOINS, subqueries, and window functions to generate real-time reports on critical health metrics like sepsis and heart failure, reducing response times for urgent care by 30%.
- Led requirements gathering for a healthcare client managing 1 hospital and 6 clinics, collaborating with primary care physicians and county medical officers to define key metrics such as sepsis, heart failure, and acute kidney injury.
- Performed impact and cost/benefit analysis to assess the implementation of a real-time patient monitoring system, resulting in improved patient tracking by 25% and reducing ER wait times by 15%.
- Conducted gap analysis on current acute kidney injury management practices, leading to a 20% reduction in readmission rates by recommending process optimizations.
- Led user acceptance testing (UAT) for a clinical decision support system (CDSS), ensuring it met regulatory standards and achieved 99% system uptime post-launch.
- Developed Power BI dashboards using Power Query for data transformation and DAX for KPI calculations. Designed visualizations to track sepsis and heart failure, improving patient outcomes by 18% through data-driven decision-making.
- Collaborated with clinical teams and IT departments to implement an integrated electronic health record (EHR) system, improving data accessibility and reducing patient information retrieval time.

[Tech Stack: SQL, Power BI, SRS, UAT, Gap Analysis, MS Excel, DAX, Power Query, Clinical Decision Support Systems (CDSS), Business Process Modeling]

Business Analyst

Kranion Technologies, INDIA

10/2019 – 07/2022

- Led requirement gathering sessions with multiple farming clients using JAD techniques, translating complex business needs into actionable functional requirements for the farm-to-consumer supply chain initiative. This approach reduced project scope ambiguity by 25% and ensured clarity in deliverables.
- Developed process flow diagrams in MS Visio to visualize order fulfillment and crop availability tracking, reducing order processing time by 22% and streamlining communication between business and technical teams.
- Created and optimized SQL queries to extract, analyze, and clean transaction data, improving product listing and availability. Enhanced the user experience by reducing search time by 20% and increasing engagement by 15%.
- Designed real-time Tableau dashboards to monitor inventory levels, crop demand, and vendor performance, resulting in a 25% improvement in decision-making for supply chain operations.
- Conducted GAP analysis using SQL and SAS, identifying missing data links and redesigning the data pipeline, which increased repeat purchases by 10% through real-time crop availability updates.
- Analyzed consumer behavior using R and SAS, applying regression models and cluster analysis to uncover trends. This insight drove personalized crop marketing, boosting customer retention by 20%.
- Optimized database performance using indexing and query tuning. Leveraged EXPLAIN functions to reduce report load times by 15%, improving vendor access to sales tracking and data updates.
- Partnered with stakeholders, auditors, and management to resolve complex accounting issues and align on reporting standards, enhancing financial data accuracy and communication.
- Collaborated with the operations team to enhance supply chain efficiency by identifying and correcting inconsistencies in inventory and crop tracking, reducing stockouts and improving vendor reliability.
- Drafted and managed key business documents (FRD, BRD, SRS) in MS Word and Excel, ensuring alignment between business goals and technical implementation, and minimizing scope creep.

[Tech Stack: SQL, SAS, R, Tableau, MS Visio, JAD, Power BI, GAP Analysis, SRS, FRD, BRD, MS Excel, Trello, MS SharePoint]

EDUCATION

MS in Information Systems; University of Colorado
