

SRIJA GURRAM

Software Engineer

srija@worksemail.com | +1 (361) 905-5983 | Corpus Christi, TX | [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven **Software Engineer** with 4+ years of experience in **designing, developing, and deploying scalable applications** across **cloud, enterprise, and distributed systems**. Proficient in **Java, Python, JavaScript, React, Spring Boot, AWS, DevOps, and MLOps pipelines**, with strong expertise in **API development, CI/CD automation, microservices, and system performance optimization**. Adept at collaborating with cross-functional teams in **Agile/Scrum environments**, delivering innovative solutions that **improve performance, security, and business outcomes**. Seeking to leverage technical expertise in **cloud-native application development and AI-driven engineering** to contribute to organizational growth.

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript (ES6+), TypeScript, SQL, Shell Scripting, Go (basic)
Frameworks & Libraries: Spring Boot, Hibernate, React.js, Node.js, Angular, Express.js, Flask, Django
Databases: MySQL, PostgreSQL, Oracle, MongoDB, DynamoDB, Redis
Cloud Platforms: AWS (EC2, S3, Lambda, ECS, EKS, CloudFormation), Azure, GCP (BigQuery, GKE)
DevOps & CI/CD: Jenkins, GitHub Actions, GitLab CI/CD, Docker, Kubernetes, Terraform, Ansible, Helm
MLOps & Data Engineering: MLflow, Apache Airflow, Kafka, Spark, Databricks, Redshift, TensorFlow (basic)
Testing & QA: JUnit, Mockito, Selenium, Cypress, Postman, REST Assured, JMeter, LoadRunner
Version Control & Tools: Git, Bitbucket, Jira, Confluence, VS Code, IntelliJ, Eclipse
APIs & Integration: REST APIs, GraphQL, SOAP, JSON, XML, OAuth2, JWT
Big Data & Analytics: Hadoop, Hive, Tableau, Power BI, Pandas, NumPy
Security & Compliance: OAuth, SAML, SSL/TLS, IAM, Penetration Testing (basic), OWASP Top 10
Other Tools: Figma (UI review), Notion, Microsoft Teams, Slack, Zoom, Excel (Macros, VLOOKUP)

PROFESSIONAL EXPERIENCE

Software Engineer | MetLife, USA

Jan 2025 – Present

- Developed and deployed **scalable microservices** using **Spring Boot, Java, and REST APIs**, improving transaction processing by 30%.
- Built **CI/CD pipelines** using **Jenkins, Docker, and Kubernetes** to automate deployments on AWS EKS, reducing release cycles from weeks to days.
- Implemented **end-to-end data pipelines** using **Apache Kafka, PySpark, and Redshift**, streamlining insurance claims processing.
- Designed and optimized **React.js front-end dashboards** integrated with backend APIs, enhancing user experience by 25%.
- Integrated **OAuth2 and JWT authentication** to strengthen application security and regulatory compliance.
- Leveraged **AWS Lambda & Step Functions** for event-driven automation, reducing infrastructure costs by 20%.
- Wrote **JUnit and Selenium automated tests**, improving code quality and reducing production bugs by 35%.
- Enhanced **system observability** using **Prometheus, Grafana, and CloudWatch**, leading to faster incident resolution.
- Collaborated with cross-functional Agile teams for sprint planning, backlog refinement, and release management.
- Mentored junior engineers in **cloud, API design, and best coding practices**, raising overall team productivity.

Aug 2020 – Jul 2023

- Designed and implemented **enterprise web applications** using **Java, Spring MVC, Hibernate, and Angular** for Fortune 500 clients.
- Automated workflows with **REST APIs and Oracle PL/SQL procedures**, reducing manual effort by 40%.
- Built **batch processing systems** using **Python and Spark**, accelerating data validation and reporting.
- Developed **Dockerized applications** with Kubernetes orchestration for scalable deployments.
- Conducted **performance testing with JMeter** to ensure applications scaled to 50K+ concurrent users.
- Implemented **Git branching strategies** and **Jenkins pipelines** for automated builds and deployments.
- Designed **ETL jobs with Informatica and Python** to integrate data across multiple financial systems.
- Conducted **code reviews, unit testing, and regression testing** to ensure high software quality standards.
- Worked with **AWS S3 and EC2** for cloud hosting and file-based data processing solutions.
- Participated in Agile ceremonies, client demos, and stakeholder meetings to align technical solutions with business goals.

EDUCATION

Master's in Computer Science | Texas A&M University, Texas | *May 2025*
