

Srija Reddy Madumanukala

.Net Developer

Madumanukalasrijaireddy@gmail.com

(720)-703-8356

SUMMARY:

- .NET Developer with over 4 years of experience in developing multi-tier, database-driven, client-server, web, and Windows applications using Object-Oriented Analysis and Design (OOP) methodologies.
- Strong proficiency in Microsoft technologies for **WinForms, WebForms, and Web Services**, utilizing **ASP.NET, VB.NET, C#, MVC, Entity Framework, Angular, ADO.NET, AJAX, LINQ, WCF, WPF, and Blazor** within the latest **.NET Frameworks** and **.NET Core**.
- Demonstrated expertise in Microsoft .NET technologies, including **ASP.NET, C#, VB.NET, ADO.NET, Web Services, MVC, AJAX, Windows Services, WCF Services, OOP, XML, XSLT, HTML, SOAP, LINQ, IIS, DHTML, VBScript, VSS, JavaScript, and SQL Server**.
- Experience in designing and developing web applications using **HTML, CSS, JavaScript, jQuery, Angular, AJAX, Bootstrap, JSON, Node.js, and UML** for dynamic and responsive user interfaces.
- Strong experience on **MS SQL Server** using **SQL, MS SQL, SSIS and T-SQL**. Have worked on **ETL using SSIS** and **DTS** packages.
- Good experience with Agile (SCRUM) methodology, Waterfall and Test-driven development.
- Strong knowledge of **LINQ, ADO.NET Entity Data Model Framework, SQL Server Integration Services (SSIS), and SQL Server Reporting Services (SSRS)**.
- Strong understanding of Object-Oriented Analysis and Design, Agile Development, and MVC architecture.
- Knowledgeable in **ASP.NET MVC 6.2**, Configuration Management tools, and Agile/Scrum methodology.
- Experienced in mentoring development teams and assisting in software/hardware requirements.
- Performed Unit Testing (using N-Unit), Integration Testing and Performance Testing.
- Experience in creating **XML Web Services**, Consumed Web Services from both Windows forms and **ASP.NET web applications**.
- Proficient in SQL Server Database design, maintenance, T-SQL queries, LINQ queries, Stored Procedures, Views, Functions, and Triggers using SQL Server.
- Proficiency in working with databases like **Oracle, MySQL, MongoDB, NoSQL**.
- Experience in using testing Tools **JUnit, Selenium, Cucumber/Gherkin**.
- Strong background in creating rich GUI with AJAX toolkit, CSS, Master pages, Telerik controls, and jQuery in ASP.NET Web Forms using HTML5.
- Experience in configuration and version management using Sub Version (SVN), Team Foundation Server (**TFS**), **GIT** and defect tracking tools like **JIRA, Visual Studio Team Services**, Database projects.
- Strong fundamentals in architecture design, n-tier architecture, design patterns (Singleton, Factory, Repository), architectural patterns (MVC, MVP, MVVM), and algorithms (Searching, Sorting, Recursion).
- Proficient in applying an analytical and methodical approach to problem-solving and handling production issues.

TECHNICAL SKILLS:

Languages	C#.NET, SQL, PL/SQL, TypeScript, JavaScript, Python
Frameworks & Technologies	.NET 6/7/8, ASP.NET Core, WPF, Blazor, Entity Framework Core, ADO.NET, Web API, LINQ, MVVM, MVC, AJAX, WCF, PRISM
Web Development	HTML5, CSS3, Bootstrap, Angular 17, React.js, Vue.js, jQuery, Razor Pages, Typescript, Java Script, Node.JS
Database Management	SQL Server 2022, Oracle, MongoDB, Cosmos DB, SSRS, SSIS
Methodologies	Agile, Waterfall (SDLC), Iterative

Testing & CI/CD	xUnit, NUnit, Moq, Selenium, Azure Pipelines, GitHub Actions, Jenkins
Security & Performance	OAuth, JWT, OpenID Connect, Role-Based Access Control (RBAC), API Security, Redis Caching, Performance Profiling (dotTrace), OWASP Security Best Practices, Query Optimization, Load Balancing
Unit Test Tools	MS Visual Studio Test edition (Team Suite)
Other Tools	Visual Studio, GitHub, Team Foundation Server (TFS), Power BI, SharePoint, MediatR (CQRS), RabbitMQ, Kafka

EDUCATION DETAILS:

- Master's in computer science from Wichita State University, Kansas

PROFESSIONAL EXPERIENCE:

Johns Hopkins University, Baltimore, MD | Programmer Analyst | April 2024 – Present

Responsibilities:

- Created and maintained database objects like complex Stored Procedures, Tables, Views, and User Defined Functions in SQL Server 2022.
- Worked in an agile environment, applying Scrum and Test-Driven Development (TDD), and utilizing Domain Driven Design (DDD) principles.
- Built and maintained IIS web applications using ASP.NET and C# to develop and improve a multi-centre cohort study database-driven website.
- Designed and deployed ASP.NET applications, using MVC and Web API to optimize the functionality and user experience.
- Improved existing database-driven systems by revising, refactoring, and debugging code in C#, JavaScript, and SQL.
- Migrated legacy applications from ASP.NET 3.5 to ASP.NET 4.7.2, ensuring backward compatibility and enhanced system performance.
- Developed and implemented audit logging functionality to securely track password changes and store login information, ensuring compliance with security protocols.
- Extensive use of Web Services, Web API, Query String to expose the reports to facilitate the information sharing
- Created and used User Controls in developing the front-end application and multi-thread windows applications using VB.Net.
- Integrated Linked SharePoint functionality into the application, enabling seamless document management and sharing within the platform.
- Ensured system security by identifying vulnerabilities and applying remedial security measures.
- Collaborated with project managers and end-users to gather user requirements, define specifications, and translate them into technical solutions.
- Applied Model-View-Controller (MVC) design patterns in application development to ensure maintainable and scalable code.
- Designed and developed Restful Web Services using ASP.NET Web API, optimizing internal operations and client interactions.
- Integrated Angular 6 and MVC Frameworks in the development of robust web applications.
- Developed and maintained reports using SQL Server Reporting Services (SSRS) for analytical data representation.
- Enhanced and secured database operations by utilizing SQL Server stored procedures, triggers, and views.
- Provided technical support and troubleshooting for end-users, resolving web-related issues and ensuring system stability.
- Contributed to the implementation of cybersecurity measures, including security patches and system updates, to protect user data and application integrity.

- Developed and tested various system components in an agile environment, continuously improving system performance.

Environment: ASP.NET, C#, SQL Server, IIS, JavaScript, HTML5, CSS3, AngularJS, Web API, Entity Framework, Linked SharePoint, Microsoft SQL Server, Azure, TFS, SSRS, MVC, Bootstrap

Northwell Health, Lake Success, NY | .NET Full Stack Developer | June 2022 – March 2024

Responsibilities:

- Designed C# .Net application authentication using .NET Framework, Model View Controller (MVC), and IIS security model.
- Followed Object-Oriented Programming (OOP) concepts for developing application code in C#.
- Led the development of an internal departmental application for web and mobile platforms using .NET Core MVC, Web API, and Angular frameworks.
- Developed user interfaces in ASP.NET using Webforms and built Web APIs using ASP.NET Web API.
- Refactored legacy subsystems using ASP.NET Web Forms/MVC6 and LINQ to SQL.
- Implemented single page applications (SPA) using Angular JS, Mobile, Typescript, Knockout JS, React JS, Required JS, JavaScript, Bootstrap, JSON, and CSS3.
- Designed and developed views, layout pages, and partial views using C# MVC, jQuery, Typescript 2.0, AJAX, HTML5, CSS3, and Bootstrap.
- Used ADO.Net extensively for database interactions using Data Reader, Data Adapter, Data view and Datasets.
- Extensive experience in developing front-end applications using .NET MVC 6 and Razor views for dynamic rendering.
- Experienced in development work around developing interfaces into various components of client infrastructure using REST and SOAP APIs
- Used Model-View-Control (MVC) software architecture in web applications to view the html.
- Designed and developed the application to be responsive for web, mobile and tablets using Angular JS and Bootstrap (HTML5, CSS, and JavaScript) and JQuery Mobile.
- Managed project schedule, conflicts, development process, and deliverables.
- Extensively used/modified JQUERY to perform AJAX calls for creating interactive web pages on JSON response.
- Involved in designing and developing the Middle Tier using Entity Framework to perform and implement business logic, Updating/retrieving the data to/from SQL Server Database
- Used .NET Validation Controls and JavaScript for client-side validations.
- Created reports using SQL Server Reporting Services and used Bootstrap and Angular JS for web design.
- Participated in design and code reviews, providing insightful comments to improve design quality and code performance.
- Developed multi-threaded Windows applications using VB.Net and created packages in Oracle for data loading.
- Converted websites to web applications for Azure compatibility and deployed applications to the Azure Cloud.
- Developed stored procedures, triggers, and cursors in Oracle for authorization and card details database.
- Deployed applications on IIS Server and extensively used Web Services, Web API, XML, and Query String for information sharing.
- Worked on SOAP and RESTFUL Services using WEB API returning JSON data and implementing authentication and authorization security mechanisms.
- Designed incrementally adoptable platforms using VUE.JS, Python, and Microsoft .NET technologies.
- Maintained versions of source code using Team Foundation Server (TFS) and implemented application logging, email for error handling, and notifications.

Environment: .Net Framework4.5, Visual Studio, Telerik, Kendo UI, Typescript 3.0, T-SQL, AJAX Framework, ASP.NET core, Entity framework, MVC6, VB.NET, C# 5.0, Microservices, JavaScript, Mongo DB, SDK, Knockout.JS,

MySQL, HTML5, CSS3, Bootstrap, IIS, LINQ, Angular JS (v14.0), SSRS, SSIS, TFS.

Qualcomm (Remote) | .NET Full Stack Developer | March 2020 – November 2021

Responsibilities:

- Built Web based and service-oriented platforms using Microsoft .NET technologies (C#, ASP.Net, MVC, Web API, and Entity Framework).
- Designed and implemented various ASP.NET web forms, creating .NET assemblies to enhance application functionality.
- Utilized ASP.NET User Controls for streamlined event and evaluation form submissions and modifications.
- Engineered business and data access components in C#.NET, incorporating N-tier architecture and database connectivity.
- Created web services using WCF in C#.NET, optimizing communication between different application components.
- Implemented Azure Storage and Azure SQL Azure Services, contributing to the development of Azure Web roles.
- Utilized C#, .NET serialization for efficient XML object serialization and deserialization.
- Integrated WCF services to facilitate communication between various applications and components.
- Leveraged WPF to enhance graphical representation of filtered bugs. Played a key role in application enhancement and maintenance, aligning them with evolving business needs.
- Utilized IIS logs and event viewers to monitor and troubleshoot web server issues and application errors.
- Actively participated in the development of SSRS projects using SQL Server Data Tools with VB.NET.
- Developed SSIS packages for ETL processes using C#.NET in SSDT.
- Designed and developed RESTful Web APIs, adhering to SOA principles and supporting distributed computing.
- Utilized TFS for efficient version control and project management, ensuring a streamlined development process.
- Involved in designing and developing case management system web screens using ASP.Net MVC 4.0 Framework.
- Used Inject to implement Dependency Injection (DI) for MVC Architecture and developed controllers with LINQ to Entity.
- Employed VUE.JS for HTML-based template syntax and built responsive UI screens using HTML 5, CSS 3, and Bootstrap.
- Developed web screens using Responsive Web Design methodology, MVVM design pattern, jQuery, AngularJS, and LESS CSS pre-processor.
- Extensively used JavaScript, jQuery, and AJAX for client-side data verification, data transfer, and load.
- Designed and wrote standard T-SQL Stored Procedures, User Defined Functions (UDF), and Views for daily batch and business logic.
- Utilized ADO.NET objects for data retrieval and worked with ASP.Net Grid Views, Repeaters, and Data Lists for front-end display.
- Implemented security with Role-Based Authorization against Active Directory and used Web Services (SOAP) and WCF Services for data communication.
- Involved in full Software Development Life Cycle (SDLC) based on N-Tier architecture development.
- Developed client's interface in PHP in MVC modeling using code igniter framework.
- Created logical and physical data models putting to practice, concepts of normalization and RDBMS.
- Worked with AngularJS, Bootstrap, and Windows Services, deployed applications successfully, and performed unit testing and documentation.

Environment: Net Framework4.5, VisualStudio2022/2019, MVVM, C#, ADO.Net, Kendo, Telerik, WPF, Entity Framework, SQL, HTML5, CSS3, JavaScript, jQuery, Bootstrap, LINQ, SQL Server 2022, AngularJS, TFS.
