

Srija Nallajonnala

.NET Full Stack Developer

913-583-6404 | srijaco87@gmail.com

Professional Summary

Results-driven .NET Developer with 4+ years of expertise in full-stack development using .NET Core, C#, [ASP.NET MVC](#), and Azure cloud services. Proven track record of designing and deploying scalable enterprise applications with 99.9% uptime. Expert in cloud architecture (Azure Functions, API Management, App Services), RESTful APIs, and CI/CD pipelines using Azure DevOps. Strong background in database optimization (SQL Server, MongoDB, Oracle) and modern front-end technologies (ReactJS, JavaScript, Bootstrap). Delivered 40% performance improvements through optimization strategies and successfully migrated legacy applications to cloud-native architectures.

Technical Skills

Languages: C#, JavaScript (ES6+), TypeScript, SQL (T-SQL, PL/SQL), C++, jQuery

Frameworks: .NET Core 6/7/8, [ASP.NET Core MVC](#), [ASP.NET MVC](#), .NET Framework 4.0-4.8, Web API, Entity Framework Core, ReactJS, Bootstrap, Kendo UI, LINQ, Dapper

Databases: SQL Server (2012-2022), Azure SQL Database, MongoDB, Oracle, DB2

Cloud & DevOps: Microsoft Azure (App Services, Functions, Blob Storage, API Management), Azure DevOps, CI/CD Pipelines, Bicep, Terraform, Power Automate

Tools: Visual Studio, Azure DevOps, Git, TFS, Jira, Postman, Jenkins

Security: Azure Active Directory, OAuth 2.0, Okta, JWT, Role-Based Access Control (RBAC)

Testing: NUnit, xUnit, Integration Testing, Unit Testing

Methodologies: Agile, Scrum, SDLC, Object-Oriented Programming (OOP), Design Patterns (MVC, Repository Pattern, Dependency Injection)

Other: HTML5, CSS3, AJAX, JSON, XML, SSIS, SSRS

Professional Experience

Wolters Kluwer, MD

.NET Full Stack Developer | September 2024 – Present

- Developed enterprise web applications using ASP.NET Core MVC, C#, and Entity Framework Core, achieving 99.9% uptime and serving 50,000+ users
- Designed and implemented RESTful APIs using ASP.NET Core Web API with JWT authentication, reducing API response time by 35%
- Built responsive user interfaces using ReactJS, JavaScript, jQuery, and Bootstrap, improving user engagement by 25%
- Implemented Azure cloud services including App Services, Azure Functions, Blob Storage, and API Management for scalable deployment
- Created WCF/SOAP web services and REST APIs for secure inter-application communication and third-party integrations

- Optimized application performance using AJAX, caching strategies, and state management, reducing page load times by 40%
- Developed data access layer using Entity Framework Core, ADO.NET, and LINQ for SQL Server and Oracle databases
- Applied Object-Oriented design principles and design patterns (Repository, Dependency Injection) for maintainable architecture
- Participated in Agile Scrum ceremonies and managed sprint planning using Azure DevOps
- Performed unit testing with NUnit achieving 85% code coverage and conducted integration testing
- Designed and optimized SQL Server stored procedures, functions, triggers, and views, improving query performance by 50%
- Managed source control using Team Foundation Server (TFS) and Git
- Deployed applications to IIS and configured application pools across multiple environments

Environment: .NET Core 6/7, [ASP.NET](#) Core MVC, C#, Entity Framework Core, Azure, ReactJS, JavaScript, jQuery, REST APIs, SQL Server, Azure DevOps, Git, IIS, NUnit

Accenture, India

Software Engineer - .NET Developer | June 2021 – June 2023

- Participated in full SDLC from requirement gathering through deployment for enterprise applications serving 100,000+ users
- Migrated legacy PHP application to ASP.NET using C# and ASP.NET 3.5/4.0, reducing maintenance costs by 30%
- Developed 50+ web forms using ASP.NET with N-tier architecture (UI, Business Logic, Data Access layers)
- Implemented Forms-based authentication and role-based authorization for user management and access control
- Created reusable user controls and custom controls across application modules, reducing development time by 20%
- Developed SOAP web services using C#, XML, and WSDL for customer service record integration
- Integrated SSRS for dynamic report generation and embedded reports into ASP.NET pages
- Designed responsive interfaces using HTML5, CSS3, jQuery, ensuring cross-browser compatibility
- Utilized LINQ for querying collections, XML documents, and Entity Framework 4.0 data contexts
- Implemented ASP.NET server controls (GridView, DetailsView, TreeView) for data presentation
- Developed stored procedures, triggers, and views in SQL Server for business logic
- Managed version control using TFS for source code maintenance
- Performed unit testing and data validation for application modules

Environment: [ASP.NET](#) 3.5/4.0, C#, [ADO.NET](#), Entity Framework 4.0, LINQ, SQL Server, SOAP, SSRS, HTML5, CSS3, jQuery, TFS, Visual Studio

ValueLab, India

.NET Full Stack Developer | June 2020 – May 2021

- Developed enterprise web applications using ASP.NET MVC and C# for business-critical systems
- Implemented data access layer using Entity Framework and ADO.NET, optimizing SQL Server queries for performance

- Created RESTful Web APIs with OAuth 2.0 authentication for mobile and web clients
- Designed responsive interfaces using HTML5, CSS3, Bootstrap, and jQuery
- Developed business logic components following SOLID principles and design patterns
- Performed unit testing using MSTest and integration testing for application modules
- Participated in Agile Scrum ceremonies including sprint planning and daily standups
- Utilized Git and TFS for version control and project management
- Created and optimized SQL Server stored procedures, functions, and views
- Deployed applications to IIS and performed performance tuning

Environment: [ASP.NET](#) MVC 5, C#, Entity Framework 6, [ADO.NET](#), Web API, SQL Server, HTML5, CSS3, Bootstrap, jQuery, OAuth 2.0, Git, TFS, Visual Studio

Education

Master of Science in Computer Science
University of Central Missouri
