

Srijan Bhandari, Senior Java Developer
Mobile: (334)-492-2523 | Email: srijanb94@gmail.com
www.linkedin.com/in/bsrijan

Experienced and versatile **Senior Java Developer** with around 10 years of expertise in software **analysis, design, development, and testing** of **enterprise applications** within **Banking and Finance** domains. Adept at leading **full-stack development**, implementing **micro-services architectures**, and **optimizing** high-performance applications.

- Proficient in gathering, documenting, and analyzing business requirements within **Agile (Scrum) methodologies**.
- Specialized in developing **web-based distributed and front-end applications** using **multi-tier and micro-services architecture** with technologies like **Java, J2EE, HTML, JavaScript, Ajax, JSP, Servlets, JSF, CSS, and Angular**.
- Expertise in **Spring Framework, Hibernate, and RESTful web services** (REST, SOAP, WSDL).
- Strong experience in **JUnit, Mockito, TestNG, Serenity, Cucumber** for unit and regression testing.
- Worked with **Java EE (7/8/11/17)**, MAVEN, GRADLE, Log4J, and IDEs like **IntelliJ IDEA, Eclipse, and NetBeans**.
- Hands-on experience with **databases** such as **SQL Server, MySQL, PostgreSQL, and Couchbase**.
- Knowledge of **message brokers (JMS)** for **synchronous and asynchronous messaging**.
- Expertise in **CI/CD** tools like **Jenkins, GitLab Runner, and AWS services** (CloudWatch, EC2, DynamoDB, S3).
- Extensive experience across various phases of the Software Development Life Cycle (SDLC), including design, implementation, and testing, throughout the development of software applications.
- Experience working with various operating systems, including Windows 98/NT/2000/XP/7/10/11 and UNIX.
- Experience working with WebSphere Application Server, JBoss, and Apache Tomcat Application Server.
- Experienced in developing applications using Spring Boot and various modules of the Spring framework, including Core, Data, Web, AOP, and others.
- Experience with Object-Oriented Programming (OOP) concepts such as inheritance, polymorphism, abstraction, and encapsulation.
- Strong team player with a proactive approach, excellent communication skills, and a commitment to delivering high-quality software solutions.

Education

- Bachelors in Computer Science and Mathematics from **Troy University, Alabama.**

Technical Skills

Category	Technologies & Tools
Operating Systems	Windows 11/10/7, UNIX, Linux
Programming Languages	Java, Python, C#, JavaScript, PHP, .NET, Angular
Frameworks & Libraries	Spring Boot, Hibernate, JSF, Struts, JUnit, SOAP UI
Development Tools	IntelliJ IDEA, Eclipse, NetBeans, MS Visual Studio, Spring Tool Suite
Web Services	REST, SOAP, WSDL
Database	MySQL, SQL Server, PostgreSQL, Couchbase
CI/CD & DevOps	Jenkins, GitHub, BitBucket, Docker, Kubernetes
Operating Systems	Windows 11/10/7, UNIX, Linux
Programming Languages	Java, Python, C#, JavaScript, PHP, .NET, Angular
Frameworks & Libraries	Spring Boot, Hibernate, JSF, Struts, JUnit, SOAP UI
Development Tools	IntelliJ IDEA, Eclipse, NetBeans, MS Visual Studio, Spring Tool Suite
Web Services	REST, SOAP, WSDL

Professional Experience

United States Patent and Trademark Office (USPTO) **Dec 2022 – Present**
Alexandria, Virginia.
Senior Java Developer

Project: SLIC (Sequence Listing Information Control) is intended to facilitate the acceptance of the new WIPO Standard on the Presentation of Nucleotide and Amino Acid sequence listings using eXtensible Mark-up Language (XML). The system allows patent applicants to draw up a single sequence listing in a patent application which will be acceptable for national, regional and international patent applications. It also enhances the accuracy and quality of presentations of sequences for easier dissemination of sequences, benefiting applicants, the public, and examiners. In addition to allowing for sequence data to be exchanged in electronic form, i.e., computer readable form and introduced into computerized databases, the SLIC system also facilitates the United States Patent and Trademark Office (USPTO) to accept, process, and disseminate sequence listing data in WIPO ST.26 format.

Responsibilities:

- Involved in various Software Development Life Cycle phases of the project like Requirement gathering, development, enhancements using agile methodology.
- Working with Agile, Scrum methodology with Daily scrum meetings, sprint planning, technical design sessions, sprint retrospection to ensure delivery of high-quality work with every monthly iteration.
- Developed **RESTful APIs** for **unique ID generation** and runtime **logging-level modifications**.
- Worked on **micro-services architecture** to automate the patent application workflow.
- Implemented **OAuth2 authentication** with **Okta services** in **Angular 15** and secured the back-end using **Spring Security**.
- Contributed to the development of responsive single-page application using **Angular**, enhancing user experience and achieving a 15% increase in customer satisfaction scores.
- Assisted in incremental **Angular** version upgrades from **Angular 12** until **Angular 17**.
- Involved with troubleshooting **production issues**, and improving **UI and back-end validations**.
- Set up **GitLab Runner pipelines** for automated builds and deployments.
- Migrated the system from **Spring Boot 2.7.x to 3.2.x** and contributed to documentation.
- Used GitLab to maintain the version of the files and took the responsibility for code merges.
- Worked on bug-fixes and JUnit testing.
- Assisted in completion and stabilization of automated testing framework using serenity and cucumber.
- Created and managed **MySQL tables** for data storage.
- Designed and optimized **SQL queries** to fix search functionality defects.
- Led the **Azure Virtual Desktop (AVD) transition**, documenting setup processes.
- Worked on AWS using services like CloudWatch, DynamoDB, ECS and S3 bucket to migrate the on-prem application to cloud.
- Configured **AWS EC2** virtual machines and set up **AWS synthetic monitoring** using **Terraform**.

- Utilized **Docker containerization and Kubernetes** for efficient deployment.
- Used Rally to monitor agile process, hands on experience to create, manage stories for each sprint and complete post sprint activities.

Environment: Java, Spring Boot, Hibernate, Angular, Maven, Postman, Jenkins, GitLab, GitLab runner, Serenity, Cucumber, Junit, Mockito, Amazon AWS

American Express
Phoenix, AZ
Senior Java Developer

Jan 2020 – Dec 2022

Projects: RLA (Responsible Lending Action) is a development project that manages the lending line of a corporate customer based on their past credit use and credit history. We analyzed, designed and developed functionalities and workflow to include the necessary integration of various internal systems to fulfill the lending line reduction, addition or placement requirement. Also, the ICN (Instant Customer Notification) project facilitates communication to customers when the transaction is declined due to various reasons and when the current transaction is approved but future transactions may be denied due to low balance available.

Responsibilities:

- Involved in various Software Development Life Cycle phases of the project like Requirement gathering, development, enhancements using agile methodology.
- Working with Agile, Scrum methodology with Daily scrum meetings, sprint planning, technical design sessions, sprint retrospection to ensure delivery of high-quality work with every monthly iteration.
- Integrated external systems using REST and SOAP web-services.
- Developed XSD, WSDL for SOAP web services. Used Soap UI as a web services testing tool.
- Performed unit testing by using Junit testing tool and debugged using Log4j.
- Performed design reviews with the Architects, code reviews with the team.
- Worked with automation testing using TestNG.
- Heavily used Java8 features like lambda expressions, streams and filters which will improve the code optimization.
- Worked with PostgreSQL to manage existing tables and views.
- Utilized queries and functions to troubleshoot production issues and created new PostgreSQL queries to resolve defects.

- Worked in an environment where CI/CD is extensively used (Jenkins Build pipelines, unit tests, automation tests and moving code to production quickly).
- Used GitHub and Bitbucket to maintain the version of the files and took the responsibility of code merges from branch to trunk and create new branches when new feature implementation starts.
- Used JBPM/Eclipse and IntelliJ IDE tool for application development.
- Used Rally to monitor agile process, hands on experience to create, manage stories for each sprint and complete post sprint activities.
- Unit tested the service components and participated in regression testing
- Involved in Maintenance and Enhancements for the project.

Environment: Java, SpringBoot, Web services (REST), Hibernate, JBPM, Maven, Gradle, Postman, SOAPUI, Jenkins, GitHub, BitBucket, TestNg, Junit, Mockito

Vention, New York

Jan 2016 – Dec 2019

Responsibilities:

- Worked on developing software solutions based on business requirements.
- Developed multiple micro-services to aid in the automation of workflow.
- Participated in demo sessions and attended the agile scrum ceremonies.
- Developed documentation of APIs.
- Worked on bug-fixes and JUnit testing.
- Used Jenkins to build and deploy artifacts to nexus repository.
- Worked with GitHub to maintain file versioning.
- Involved in production deployment and post deployment bug-fixes.

Key Achievements

- Piloted the **Azure Virtual Desktop** transition, creating setup documentation for team-wide use.
- Spearheaded **AWS synthetic monitoring setup** using Terraform and GitLab.
- Successfully integrated **CI/CD pipelines** for multiple projects to streamline deployments.
- Built scalable, reliable, and high-performance RESTful APIs using Spring Boot and Angular.
- Streamlined automated testing processes, minimized code redundancy, and optimized applications, resulting in a significant reduction of post-deployment defects.

Soft Skills

- Excellent communication and interpersonal skills.
- Strong problem-solving and analytical skills.
- Proactive and result-driven team player.
- Effective time management and multitasking abilities.
