

Srikanth Nakka

Java Full Stack Developer

EDUCATION

University of Bridgeport,
Connecticut, USA
Masters / Computer Science
(Sep 2022 - May 2024)

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Java/J2EE, SQL, PL/SQL.
- **Java APIs:** EJB, J2EE, JSP, JSTL, Custom Tag Libraries, JAX-RS, JDBC, Servlets, JNDI, JMS, JAXB, JUnit, Mockito, AWT, Spring MVC, Spring AOP, Spring DAO, Spring Core, Spring Security, Spring actuator, Spring Boot, JPA, Hibernate, Spring JDBC, Spring Data JPA, Spring Data REST, Log4j, Slf4j, ActiveMQ, RabbitMQ, Apache.
- **Frameworks:** MEAN Stack, MERN Stack.
- **Scripting Languages:** JavaScript, TypeScript, jQuery.
- **Web Technologies:** Angular, HTML/HTML5, CSS/CSS3, Bootstrap, JSP, Ajax, XML, JSON, Redux, NodeJS, Express, ReactJS.
- **Databases:** Oracle, MySQL, DB2, SQL Server, PostgreSQL, Amazon Aurora, MongoDB, Cassandra, DynamoDB.
- **Version Control:** CVS, Clear Case, SVN, Git.
- **Cloud Technologies:** AWS, Azure, GCP.
- **Security/Compliance:** HIPAA, PHI Data Encryption (AES-256), RBAC, IAM.
- **Build Tools:** Maven, Gradle.
- **Operating Systems:** Windows, Unix, Linux

ABOUT ME

Driven and seasoned Java Full Stack Developer with over 4+ years of hands-on experience in designing, developing, and delivering robust web applications. Committed to delivering high-quality solutions that merge exceptional user experiences with efficient and scalable backend architectures.

SUMMARY DETAILS

- Full Stack Software Developer with 4+ years of experience in **backend services** and full stack development, specializing in designing scalable systems. Skilled in **AWS**-powered architectures and enhancing service delivery.
- Extensive experience in developing web applications using **Java, J2EE, JSP, Servlets, EJB, JDBC, Struts, Spring MVC, Spring Boot, Hibernate, JMS, JSF** and **XML**.
- Experience in using Reacts Components, Forms Events, Key, Router, plus **Redux**, Animations and **Flux** Concept. Proficient in utilizing **AWS Lambda** to build serverless architectures and improve application scalability and efficiency.
- Expert developer using **Spring Boot** for radically fast building of **Microservices** and develop Cloud based Micro service applications with very less configuration.
- Experience in using maven and gradle for building **Java** applications as well as **Jenkins** for **CI/CD**. Experience in the development of service-oriented architecture applications, good understanding of Object-Oriented Design and Design Patterns.
- Strong experience on various version control systems like **Git, GitHub, CVS** and **SVN**.
- Experience in designing and developing **J2EE** compliant systems using IDE tools like **Eclipse, MyEclipse, RAD, NetBeans, WebSphere Portal**.
- Thorough knowledge of IDE like RAD, IntelliJ, **PyCharm, Vscode, WSAD** and **Eclipse**.
- Experience with complete **Spring** framework- **Spring Boot, AOP**, Transactions, Security, Auto-wiring, **ORM, MVC, Spring Data**, Webflow and **Spring** integration with **AWS**.
- Performed **unit testing** with **JUnit** and created integration **test templates**. Experienced with **Waterfall, Agile, SCRUM, Kanban**, and **SAFe** methodologies.
- Strong knowledge and hands-on experience of deploying applications using Kubernetes, cloud native application development, pivotal cloud foundry, JavaScript, Kendo UI, **Java/J2EE technologies & RDBMS**. Experience in using Core Technologies **Java, J2EE, Servlets, JSP, JDBC, JavaBeans, JavaScript, JNDI, HTML**
- Having good experience in writing Joins, clauses, store procedures, triggers, cursors using **PL/SQL** in **JDBC**, ODBC and WebLogic server. Implemented **PL/SQL** scripts, triggers, store procedures and views.
- Developed responsive, high-performance front-end components using **Angular (version 14)**, integrating seamlessly with REST APIs and back-end microservices.
- Experience in various web application servers like **WebLogic, Apache Tomcat** and **JBoss**.
- Used various **Core Java** concepts such as Exception Handling, Collection **API's** to implement various features and enhancements.

PROFESSIONAL EXPERIENCE

Java Full Stack Developer - Horizon Blue Cross Blue Shield of New Jersey Newark, New Jersey, USA

June 2024 - Current

Horizon Blue Cross Blue Shield of New Jersey is a not-for-profit health insurance corporation. As a Java developer Implementing CI/CD principle using platforms like Jenkins, GitHub Actions, or Azure DevOps to automate software build and deployment processes. Developing middleware solutions to integrate various services and ensure smooth data flow within the system.

Key Responsibilities:

- Deployed static websites and several supporting **APIs (Node.js)** following a server less architecture in **AWS** (API Gateway, **AWS Lambda** & **Lambda @Edge**, **Cloud Front**, **Dynamo DB**, **S3**, and more).
- Designed high-level architecture and delivered high-quality code implementations using **Java 11** and **Spring Boot** for **scalable microservices**, leading to a 40% increase in API throughput and 30% reduced deployment time.
- Involved in integrating **Microservices** into an existing system architecture using Clojure.
- Created various **MongoDB** collections and wrote services to store and retrieve user data from for the application on devices and used **Mongoose API** in order to access the **MongoDB** from **Node.js**.
- Engineered user interfaces using **React** and **Angular**, enhancing user experience and ensuring data accuracy.
- Upgraded **Angular** front-end to **v16**, implementing lazy loading and standalone components, reducing initial load time by 35%.
- Implemented a **CI/CD** pipeline using **Docker**, **Jenkins**, and **GitHub**, where new branches automatically trigger Docker container builds with **AMI** integration.
- Implemented authentication and authorization for the application using **Spring Security** and **Oauth2**.
- Involved in Unit Testing and Bug-Fixing and achieved the maximum code coverage using **JUnit** test cases.
- Worked on **Angular** to augment browser applications with **MVC** capability.
- Designed event-driven architectures using **Kafka** for real-time data processing.
- Developed **REST API's** using **Spring MVC** and **Spring Boot**, hosted all **micro services** on **PCF**.
- Upgraded legacy APIs to **Spring Boot 3.0**, increasing throughput by 40%.
- Experience working with **Docker** to improve our **(CD)** Continuous Delivery framework to streamline releases
- Designed high-performance **Oracle SQL queries**, built scalable **AWS** systems, and developed **REST APIs (XML/JSON)** for async data workflows.

Technologies Used: Angular, Apache Cassandra, AWS, AWS Lambda, Cassandra, CI/CD, DevOps, Docker, Git, GitHub/Bitbucket, Hibernate, Java, Java 8, Jenkins, Jira, JMS, JSON, JUnit, TestNG, Kafka, Microservices, OpenShift, MongoDB, Mongoose API, MQ Series, MVC, Node.js, Oracle, PCF, S3, Redux, Spring, Spring Boot, Spring IOC, Spring MVC, Spring Security, SQL, XML.

Java Full Stack Developer - PBF Energy Inc. Parsippany, New Jersey, USA

May 2023 - May 2024

PBF Energy Inc. is a petroleum refining and logistics company that produces and sells transportation fuels, heating oils, lubricants, petrochemical feedstocks, and other petroleum products. Created and managed the web services, including RESTful APIs and SOAP services, to facilitate seamless communication between different application components.

Key Responsibilities:

- Experiencing in setting up **RBAC** roles (**OOB**) and Custom RBAC roles to Subscription level, or Resource Manager Level to manage **Azure** Resources. Experience in Object Relational Mapping frameworks such as **Hibernate**
- Building cloud **Microservices** and implemented back-end using **Spring** Boot. And Authored application using **Spring Cloud** services. Wrote many shell scripts in Unix to call routines.
- Used **Node.js**, **React**, and Backbone.JS **MVC** framework for developing the Single Page Application (**SPA**).
- Responsible to Design and develop the web pages from the scratch by using **React**. Used **Log4j** for validate functionalities and **JUnit** for unit testing. Setup **CI/CD** pipeline process for the application using the **Jenkins**.
- Involved in Requirements gathering, Analysis, Design, Development and Testing of application using **AGILE** methodology (**SCRUM**) in a Test-driven Development (**TDD**) approach.
- Used **Angular** directives, **Angular controllers**, **Angular custom filters** to perform instant search of available description of particular loan programs.

- Developed the UI with extensive use of **HTML, CSS, JavaScript, JSON** and Ajax.
- Used **Angular** controllers to update entity models, and **Angular** custom filters to provide better search experience and used **Angular** service for Rest API calls. Extensive experience in Pivotal Cloud Foundry (**PCF**).
- Worked with marketing stakeholders to define requirements and provide technical guidance for designing scalable and fault-tolerant systems using **Kubernetes** and **Docker**.
- Used **Oracle** as database and involved in the development of **PL/SQL** backend implementation.

Technologies Used: Angular, Azure, CI/CD, CSS, Docker, Git, Hibernate, HTML, Java, Java 8, JavaScript, Jenkins, Jira, JMS, JSON, JUnit, Bitbucket, Kubernetes, Log4j, Microservices, MVC, Node.js, Oracle, PCF, PL/SQL, React, RESTful, Spring, Spring Boot, Spring Cloud, Spring MVC, SQL, Web Services, XML

Java Full Stack Developer - (Persistent Systems) BlackRock

Mumbai, India

Jan 2022 - Jul 2022

BlackRock, Inc. is an American multinational investment company. Utilized the Java and J2EE environments to build and maintain applications. Participated in Agile/Scrum meetings and contribute to sprint planning and retrospectives. Configured jobs on Jenkins an open-source tool for Continuous Integration (building, testing and deploying) of java projects.

Key Responsibilities:

- AWS Lambda was utilized for serverless implementations, where the functions were triggered when the database tables were updated and **AWS** Cloud Watch was utilized for alarms.
- Implemented **Microservices** into existing system architecture. Developed **Microservices** business components and **RESTful** service endpoints using **Spring Boot**.
- Worked on **Jenkins** for continuous integration with **Gradle** and **GitHub**.
- Have experienced developing web applications using **Bootstrap**, Code Mirror, Brackets and **Ember.js**. Worked with advanced **MVC** framework such as **Spring-IOC, AOP, MVC** and Batch which is used for implementing backend functionality.
- Developed **Angular 8.0/Spring Boot services** with Node.js auth and dynamic role-based menus using **JSON**.
- Build and maintain **SQL** scripts, indexes, and complex queries for data analysis and extraction.
- Used **Amazon CloudWatch** to monitor **AWS** services and **Amazon CloudWatch** logs to monitor application.
- Worked on Core **Java** for multi-threading, collections and **GUI AWT**.

Technologies Used: Angular, AOP, AWS, AWS Lambda, BDD, Bootstrap, CI/CD, Ember.js, Gherkin, Git, GitHub, Gradle, Hibernate, HTML, IntelliJ, Java, Jenkins, JSON, Microservices, MVC, Node.js, RESTful, Spring, Spring Boot, SQL

Java Developer - (Vsoft Technologies Private Ltd) Anuh Pharma Limited

Mumbai, India

June 2020 - Dec 2021

Anuh Pharma Limited is an India-based bulk drug manufacturing company. Crafted the user interfaces using modern frameworks such as React.js and Next.js, with a focus on performance and scalability. Developed application specific Restful API's leveraging distributed storage technologies like Apache Kafka, Amazon S3.

Key Responsibilities:

- Generated **Hibernate** Objects and used **Hibernate ORM** for **SOTI** Publisher application.
- Worked on creating batch jobs using **Autosys** as the job scheduler and technologies like **SQL** invoker, UNIX shell scripting and core java. For version control management used **CVS** software.
- Design and implementation of web applications in **Java** and **HTML5/JavaScript** using **Eclipse**.
- Implemented logging and admin support using **Spring Boot** to enhance the web development.
- Good Experience in **React** for creating interactive UIs using **one-way data flow, Virtual dom, JSX**
- Implemented configured **Jira** issue tracking software with **Agile** plug-in across all the company functions.
- Used **JMS** for the asynchronous exchange of critical business data and events among **J2EE** components and legacy system.
- Developed charts (Bar, Pie, Line, etc.), cross-tabs, and conditional styling in reports by using Jasper Reports.
- Converted a monolithic app to **Microservices** architecture using **Spring Boot** using 12-factor app methodology.
- Developed **SPAs** with **Angular 7, HTML5, CSS3**, and **Angular** Material. Used **Jenkins** pipelines for **Microservices** builds, deploying **Docker** containers to **Kubernetes**.

Technologies Used: Agile, Angular, Autosys, core java, CSS, CSS3, CVS, Docker, Eclipse, Hibernate, HTML, HTML5, J2EE, Java, JavaScript, Jenkins, Jira, JMS, Kubernetes, Microservices, React, Spring, Spring Boot, SQL
