

SKILLS

- **Languages and Databases:** Python (NumPy, Pandas, Matplotlib, Seaborn), SQL, DAX, R
 - **Databases & Big Data:** MySQL, Snowflake, Azure SQL, Azure Databricks, ETL
 - **Data Visualization Tools:** Power BI, Tableau
 - **Cloud & Tools:** Microsoft Azure, Salesforce, Google Colab, Jira
 - **Statistics & Machine Learning:** Probability, Distributions, Hypothesis Testing, Descriptive Statistics, Supervised and Unsupervised Learning, Model Evaluation, Feature Engineering
-

EXPERIENCE

Data Analyst (Avidbots India Private Limited, Hyderabad, Telangana, India)

April 2022 – May 2023

- Engineered and optimized **SQL queries** for the Data Visualizer project, enhancing database scalability, reliability, and efficiency, which improved system performance, supported large datasets, and reduced query execution times by 35%.
- **Automated reporting** workflows using **Python**, integrating scripts with SQL and Excel to streamline recurring processes, which reduced manual effort by 45%, saved several hours of weekly reporting, and improved operational efficiency.
- Built and maintained interactive **dashboards in Power BI**, applying advanced DAX functions, visuals, and complex data modeling techniques, which delivered real-time insights, improved decision-making by 25%, and enhanced KPI monitoring.
- Developed robust **ETL pipelines** to extract, transform, and load both structured and unstructured data from diverse sources, which ensured consistency, accuracy, and reliability, while supporting business-critical analytics, reporting, and forecasting.
- Conducted detailed **data validation** and quality checks in **Excel**, leveraging pivot tables, formulas, and macros, which achieved 99% accuracy in analytics, minimized discrepancies, and ensured compliance with standards.
- Collaborated with cross-functional teams across **IT, finance**, and operations to define requirements and deliver **data-driven solutions**, which boosted productivity by 30%, strengthened decision-making, and supported strategic initiatives.

Associate Analytics Intern (RAM Innovative InfoTech, Hyderabad, Telangana, India)

Jan 2021 – Feb 2022

- Developed and maintained interactive dashboards in **Tableau, Power BI, and Excel**, streamlining **data visualization** processes, improving reporting efficiency, and reducing manual reporting time by 50% across different departments.
 - Applied **statistical** methods and managed large datasets using **SQL** and **Python** to ensure accuracy, consistency, and reliability, which enhanced overall data quality and improved business decision-making efficiency by 15%.
-

PROJECTS

Patient Feedback & Satisfaction Analysis (Excel, SQL, Power BI, Python)

- Collaborated with the quality assurance team and conducted workshops to define metrics like NPS, wait time satisfaction, and doctor-patient interaction quality, ensuring alignment with hospital-wide patient experience goals.
- Utilized **Excel** for detailed survey data cleaning, validation, and preliminary analysis, ensuring accurate patient response tracking while preparing datasets for integration into **SQL pipelines** and subsequent sentiment analysis workflows.
- Developed **SQL pipelines** to aggregate patient responses with hospital records, enabling comprehensive data consolidation and ensuring accuracy, reliability, and consistency across multiple hospital departments for performance monitoring.
- Applied **Python-based** sentiment analysis to open-text feedback, uncovering hidden trends, and designed interactive **Power BI dashboards** that provided leadership actionable insights, driving a measurable 20% improvement in satisfaction.

Inventory Management Dashboard (Excel, MySQL, Power BI)

- Designed and implemented a centralized **MySQL database** to manage inventory, sales, and supplier records, ensuring structured storage, reliability, and accessibility of critical operational data across multiple business functions.
 - Utilized **Excel** for efficient data entry, validation, and quick stock analysis, enabling accuracy in reporting while streamlining workflows and reducing manual errors that often impacted inventory tracking and operational reliability.
 - Built interactive **Power BI dashboards** to visualize stock levels, reorder points, and supplier performance, improving management visibility into critical supply chain processes and enhancing proactive decision-making capabilities.
-

EDUCATION

Webster University (M.S. in Cyber Security Operations, San Antonio, Texas)

Jul 2023 - Aug 2025

Guru Nanak Institutions Technical Campus (B.Tech in Electrical and Electronics Engineering, India)

July 2018 - May 2022

CERTIFICATIONS

- Certified **Data Science Professional**, OdinSchool (Certificate No: ODIN1005189)
