## SUMMARY

Supply Chain Analyst with 6+ years of experience in demand planning, procurement, logistics coordination, and ERP system integration across pharmaceuticals, IT services, and manufacturing. Skilled in leveraging SAP, Oracle ERP, Kinaxis, and advanced analytics tools (Power BI, Tableau, Python, SQL) to enhance supply chain visibility, streamline operations, and optimize decision-making. Experienced in applying Lean Six Sigma, Agile, and DMAIC methodologies to drive process improvements, reduce costs, and strengthen supply chain resilience. Recognized for strong cross-functional collaboration, stakeholder management, and strategic planning that align supply chain initiatives with business objectives and deliver measurable outcomes.

## SKILLS

- **Supply Chain Management:** Demand Planning, Inventory Management, Vendor Management, Procurement, Logistics Coordination, Warehouse Operations (WMS), Order Fulfilment, Transportation Management Systems (TMS)
- **Data Analytics & Visualization:** Power BI, Tableau, Microsoft Excel (VLOOKUP, XLOOKUP, Macros, Pivot Tables), Data Reporting, Cost- Benefit Analysis, Market Research
- **ERP & SCM Tools:** SAP (MM, PP, SD Modules), Oracle ERP, Microsoft Dynamics, Manhattan Associates, Kinaxis, JDA, Coupa
- **Process Improvement:** Lean Six Sigma (Green Belt), Kaizen, Value Stream Mapping, Root Cause Analysis (RCA), DMAIC Methodology, Continuous Improvement, ISO 9001:2015, IATF 16949
- **Programming & Databases:** Python (Pandas, NumPy, Matplotlib), SQL, R, Microsoft SQL Server, PostgreSQL
- **Logistics & Transportation:** 3PL/4PL Management, Distribution Network Design, Freight Optimization, Route Optimization
- **Methodologies:** Agile Methodology, Scrum Framework, Waterfall Project Management
- **Soft Skills:** Strategic Planning, Cross-Functional Collaboration, Stakeholder Management, Negotiation, Problem Solving, Communication

## WORK EXPERIENCE

### Cordavis

October 2024 – Present

#### Supply Chain Analyst

- Directed the Hyrimoz Commercialization and Launch Readiness, overseeing end-to-end supply chain planning for the U.S. biosimilar launch with Sandoz.
- Designed advanced demand forecasting models using market uptake and payer formulary insights to optimize safety stock and production levels.
- Negotiated with suppliers and contract manufacturers to secure compliant raw materials, reducing procurement lead time and mitigating risks.
- Streamlined production scheduling and packaging workflows to align with FDA regulatory standards and accelerate time-to-market.
- Deployed real-time shipment visibility systems with temperature monitoring to ensure biologic product integrity during transit.
- Established a nationwide distribution network through 3PL partnerships, improving service levels and on-time delivery performance.
- Implemented Lean Six Sigma practices to cut batch release cycle times by 20%, enhancing efficiency in biologics operations.
- Collaborated with cross-functional teams to align supply chain readiness with commercial objectives, enabling a successful Q1 2024 launch.

### Infosys

January 2020 – December 2022

#### Supply Chain Analyst

- Spearheaded the design and implementation of a cloud-based logistics management system, streamlining transportation and order fulfilment across the supply chain.
- Engineered a Transportation Management System (TMS) to enhance delivery coordination, achieving a 12% reduction in transportation costs.
- Integrated SAP MM and PP modules to optimize procurement and production processes, ensuring smooth operations from order creation to product delivery.
- Leveraged Kinaxis for demand and supply planning, boosting supply chain responsiveness and cutting lead times by 10%.
- Applied Advanced Excel (VLOOKUP, XLOOKUP) for in-depth data analysis, enabling data-driven decision-making and improving inventory management.
- Executed Lean Six Sigma (Green Belt) and DMAIC methodology to eliminate inefficiencies, driving a 10% improvement in delivery efficiency.
- Championed Agile (Scrum) methodology for iterative project management, allowing quick adaptation to changing requirements and efficient feature rollout.
- Optimized route planning and freight management, reducing fuel consumption by 8% and enhancing logistics performance.
- Collaborated with cross-functional teams to integrate cloud-based solutions into ERP systems, strengthening operational scalability and flexibility.

**Supply Chain Analyst**

- Oversaw the ERP Integration & Data Consolidation for Manufacturing Client, driving system unification across Oracle ERP and JDA to improve end-to-end operations.
- Merged multiple supply chain data sources into a single reporting framework, enhancing accuracy and decision-making speed.
- Rectified inconsistencies in vendor files and product codes, creating a standardized master dataset for smoother transactions.
- Constructed automated Excel dashboards with advanced formulas, macros, and pivot tables to streamline performance reporting.
- Evaluated demand fluctuations and inventory balances, supporting a 15% increase in forecasting precision.
- Shortened order cycle times by reconfiguring workflows, directly improving fulfilment agility and customer satisfaction.
- Aligned ERP system enhancements with operational priorities through active collaboration with cross-functional stakeholders.
- Prepared process documentation and facilitated hands-on training, ensuring efficient ERP adoption by end users.
- Delivered key outcomes including a 15% reduction in procurement lead time and stronger supply chain visibility.

**PROJECTS****Predictive Analytics for Retail Demand Forecasting**

- Applied Python (Pandas, NumPy, scikit-learn) and R to build regression and time-series models for retail product demand forecasting.
- Utilized Power BI to visualize sales trends, seasonal patterns, and customer behaviour for improved analysis.
- Presented recommendations on stock optimization and pricing strategies, highlighting the role of predictive analytics in supply chain decision-making.

**Supplier Risk Management System**

- Developed a supplier risk management system using Oracle ERP and Power BI, improving supplier performance monitoring.
- Applied Lean Six Sigma techniques to address high-risk suppliers, improving supply chain stability.
- Implemented a scoring framework to categorize vendors by risk level, enabling proactive mitigation strategies.

**EDUCATION****Master in Business Analytics****Jan 2023 – May 2024**

Trine University, Detroit, Michigan

**Bachelor in Civil Engineering****Jun 2013 – Jun 2018**

BVRIT, Narsapur, Telangana, India
