

Srikanth Sanne

DATA ANALYST

+1 551-310-0692 | srikanthsanne@gmail.com | [LinkedIn](#)

SUMMARY

Results-driven Data Analyst with over 5 years of experience in data analytics, machine learning, and business intelligence. Proficient in SQL, Python, R, and tools such as Tableau and Power BI for creating interactive dashboards and reports. Expertise in developing and maintaining ETL pipelines for efficient data extraction, transformation, and loading. Skilled in statistical analysis and machine learning algorithms, including regression, classification, and clustering, to forecast trends and enhance decision-making processes. Demonstrated ability to clean and preprocess large datasets from diverse sources, ensuring data integrity and readiness for advanced analytics. Experience with cloud platforms (AWS, GCP) and data warehousing solutions for scalable data management and processing.

SKILLS

Methodologies	SDLC, Agile (Scrum, Kanban), Waterfall
Programming Language	Python, SQL, R, SAS
Packages	NumPy, Pandas, Matplotlib, SciPy, ggplot2, TensorFlow, Seaborn, Scikit-learn
Visualization Tools	Tableau, Power BI, Advanced Excel, Statistics
IDEs	Visual Studio Code, PyCharm, Jupyter Notebook, IntelliJ
Database	MySQL, MongoDB, PostgreSQL, SQL Server, Oracle
Other Technical Skills	Amazon Web Services (AWS), ETL, SSIS, SSRS, EDA, Machine Learning Algorithms, Probability distributions, Confidence Intervals, ANOVA, Hypothesis Testing, Regression Analysis, Linear Algebra, Advanced Analytics, Data Mining, Data Visualization, Data warehousing, Data transformation, Data Storytelling, Association rules, Clustering, Classification, Regression, A/B Testing, Forecasting & Modelling, Data Cleaning, Data Wrangling, Jira, Git, GitHub, SVN
Operating Systems	Windows, Linux, Mac OS
Soft Skills	Time Management, Leadership, Strategy Planning, Problem-Solving, Negotiation, Decision-Making, Documentation, Presentation, Analytical Thinking, Attention to Detail, verbal, and written communication

EXPERIENCE

Data Analyst | CVS Health, Missouri, USA | Mar 2024 – Present

- Integrated diverse data sources from Electronic Health Records (EHRs) and pharmacy claims data into a unified platform on AWS Redshift. Ensured data consistency and enabled efficient query processing, reducing query execution time.
- Cleaned and transformed prescription data using Python (Pandas) and SQL. Performed data wrangling to address missing values, inconsistencies, and outliers, increasing data quality and model accuracy by 20%.
- Built ETL pipelines using AWS Lambda for real-time data processing and transformation. Computerized over 1 million records daily, ensuring high-speed data flow and reducing processing delays.
- Built and deployed machine learning models for fraudulent prescription detection, improving accuracy by 20% through feature engineering and classifier models (Random Forest, SVM).
- Conducted exploratory data analysis (EDA) to uncover anomalies in prescription data, resulting in a 30% improvement in identifying suspicious activity.
- Automated reporting and data extraction, reducing report generation time by 35%, and improving workflow efficiency for fraud detection teams.
- Collaborated with fraud analysts and data engineers to refine model performance. Implemented adjustments based on feedback, leading to a 10% increase in the team's overall productivity.
- Created a fraud detection dashboard in Tableau to visualize real-time fraud trends and performance metrics. Provided senior management with actionable insights, contributing to an 11% reduction in fraudulent prescriptions.
- Streamlined AWS infrastructure, managing over 2 TB of monthly prescription data, ensuring cost-efficiency and scalability.
- Developed SQL scripts for data extraction, transformation, and analysis. Improved queries to reduce report generation time by 35%, improving workflow efficiency for fraud detection teams.
- Managed documentation and reporting of key fraud detection metrics, enabling stakeholders to track ongoing project milestones and achieve compliance with industry regulations.

Data Analyst | Capgemini, India | Sept 2020 – Mar 2023

- Collaborated with Data Scientists to implement machine learning models (Random Forest, Gradient Boosting) using Python (Scikit-learn) to optimize investment portfolios, achieving a 15% improvement in performance.
- Conducted A/B testing with Python (Statsmodels) and SQL to evaluate portfolio strategies, resulting in a 10% increase in investment returns through optimized asset allocations.
- Cleaned and preprocessed large volumes of financial data utilizing Python (Pandas, NumPy) and SQL, ensuring data accuracy and consistency from diverse sources such as stock prices and economic indicators.
- Developed interactive Tableau dashboards to visualize key investment metrics, enhancing decision-making speed by 25% through real-time access to portfolio performance data.
- Automated financial reporting and portfolio performance analysis using Advanced Excel (Pivot Tables, VLOOKUP, Power Query), reducing report generation time by 20% and boosting efficiency during portfolio reviews.
- Analyzed the impact of marketing campaigns on investment performance by integrating financial and marketing data, leading to a 12% improvement in marketing ROI.
- Conducted risk assessments using Monte Carlo simulations and Value-at-Risk (VaR) models, improving the risk-reward ratio and decreasing potential losses by 8% compared to traditional strategies.
- Compiled data-driven insights and performance reports with PowerPoint and Tableau visualizations, supporting strategic decision-making and contributing to a 5% increase in client satisfaction.

Data Analyst | Softage Group, India | Oct 2018 – Aug 2020

- Analyzed historical sales data to identify demand trends and patterns, providing actionable insights that optimized inventory levels and improved supply chain efficiency, achieving a 25% improvement in inventory turnover.
- Designed and maintained automated ETL pipelines using Talend, ensuring consistent and accurate data flow from multiple sources to analytics platforms, enhancing overall data integrity.
- Extracted and cleaned large datasets with complex SQL queries on MySQL and SQL Server, ensuring high data accuracy and consistency for advanced analytics and forecasting models.
- Conducted Exploratory Data Analysis (EDA) using Python libraries (Pandas, NumPy, Seaborn) to identify trends, correlations, and outliers, revealing important patterns in demand seasonality.
- Developed dynamic Pivot Tables in Excel to aggregate and analyze sales, inventory, and demand data, delivering actionable insights to stakeholders for stock optimization.
- Employed Google Cloud Storage (GCS) to securely manage large volumes of historical sales and inventory data, ensuring high availability and cost-effective storage for demand forecasting.
- Created interactive Tableau dashboards to visualize key performance metrics, empowering stakeholders with real-time insights for informed decision-making.
- Managed project tasks and tracked progress using Jira, facilitating seamless collaboration between development and business teams, and maintaining visibility of project deliverables.

EDUCATION

Master of Science in Information Systems | Missouri, USA
Northwest Missouri State University

Bachelor of Technology in Mechanical Engineering | Hyderabad, India
Vidya Jyothi Institute of Technology
