PROFILE SUMMARY

Full-stack developer with strong emphasis on front-end engineering, delivering accessible, performant, and responsive **retail/eCommerce platforms**. 2+ years of hands-on experience building customer-facing applications with **React, TypeScript, JavaScript (ES6+), HTML5, CSS3/SASS, and Node.js/Express**. Skilled in creating cross-browser, WCAG-compliant interfaces, optimizing Core Web Vitals, and enhancing SEO. Adept at integrating **RESTful APIs, OAuth2/JWT authentication, and MySQL/PostgreSQL databases** to support scalable solutions. Collaborative team player with proven success in **Agile/Scrum**, Jira workflows, unit testing, and PR reviews. Recognized for translating UX designs into production-ready code, improving LCP by ~28% (Lighthouse), and aligning engineering execution with business goals.

PROFESSIONAL EXPERIENCE

Full Stack Developer | AutoShops.com LLC | Jan 2025 – Present

- Spearheaded the end-to-end development of a full-stack automotive service platform using **React, Node.js, TypeScript, and MySQL**, aligning front-end and back-end execution with business goals.
- Partnered with Design/UX to translate Figma-level specs into accessible UI: **semantic HTML**, ARIA attributes, keyboard navigation, focus management, and color-contrast fixes targeting **WCAG 2.1 AA**.
- Improved perceived performance and Core Web Vitals via code-splitting, route-level lazy-loading, and image optimization, reducing initial bundle cost and cutting Largest Contentful Paint (LCP) by ~28% (Lighthouse benchmark).
- Implemented **SEO fundamentals** (semantic structure, descriptive titles/meta, canonical tagging where applicable) and collaborated with content owners to improve search visibility.
- Coordinated with **Product, QA, and Analytics** to scope, estimate, test, and release features on a sprint cadence; demoed work, captured feedback, and iterated quickly.
- Delivered a modular, production-ready **backend API infrastructure**, complete with **authentication middleware, service routing, database schema design, and session management** — optimized for maintainability and scale.
- Integrated with backend **REST** services and **OAuth2/JWT** flows; handled authenticated routes, error states, and data-loading skeletons for smoother UX.
- Applied state management with **React Context** and **Redux** to maintain predictable UI flows across the platform.

- Drove cross-browser QA (Chrome, Safari, Firefox, Edge) and mobile regression testing; used **Chrome DevTools/Lighthouse** to diagnose layout shifts, script costs, and paint times.
- Adapted to the fast-paced demands of **a startup-style team**, shipping production features rapidly while balancing scalability and user experience.
- Contributed to front-end standards: PR reviews, component documentation, CSS architecture (BEM/CSS Modules), and shared utilities to improve consistency and reuse.
- Collaborated on unit tests for critical UI components and flows, ensuring long-term maintainability and reliability.
- Partnered with QA/Analytics teams to validate user events and ensure **AB-test readiness** for product experiments
- Ensured end-to-end security and reliability across frontend and backend through **token based auth**, protected routes, and **CORS/session configuration** - reducing platform vulnerabilities and support load.
- Collaborated with cross-functional teams in an Agile environment to align engineering execution with business goals.

Front End Engineer | L&T Technology Services, Mysore, India | Jan 2022 – Dec 2022

- Designed and maintained interactive dashboards and reporting UIs using **HTML, CSS, and JavaScript**, improving visibility into project KPIs for cross-functional stakeholders.
- Partnered with product and engineering teams to validate data pipelines and ensure seamless integration with front-end reporting tools.
- Collaborated with Agile teams using **Jira** to track sprints, estimate tasks, and communicate progress to management.
- Enhanced usability of internal portals by simplifying workflows, improving accessibility, and reducing manual entry, contributing to faster decision-making.
- Performed QA on data-driven web components, focusing on **cross-browser consistency** and responsive layouts for internal dashboards.

Front End Engineer | Manac Infotech Limited, Hyderabad, India | Jun 2021 – Nov 2021

- Assisted in developing web-based reporting interfaces with **HTML/CSS and JavaScript**, contributing to improved user experience for internal tools.
- Implemented UI enhancements (tables, forms, filters) that improved accessibility and responsiveness, aligning with modern front-end best practices.
- Validated integration of data pipelines with front-end dashboards; ensured accuracy and usability of real-time metrics displays.
- Gained exposure to **Agile workflows** by collaborating with developers and product leads on sprint planning and task delivery.
- Supported QA testing efforts by performing browser compatibility checks and identifying UI defects early in the release cycle.

TECHNICAL SKILLS

Frontend	React.js (Hooks, Context, Redux), JavaScript (ES6+), AngularJS (exposure), Vue (exposure), Material UI, HTML5, CSS3, SASS/LESS, CSS Modules, Flexbox, CSS Grid, Responsive/Adaptive Design, WCAG 2.1 AA, ARIA
Backend	Node.js, Express.js, TypeScript
Databases	MySQL, PostgreSQL
APIs & Tools	REST APIs, OAuth2, JWT, Nodemailer, JSON Schema
Build & Dev Tools	npm, Webpack, Vite, Babel, Git, GitHub, GitHub Actions (CI-ready), VSCode, Git Bash, Chrome DevTools, Lighthouse
Testing /QA	Unit Testing (UI components), Postman, Manual QA, API validation, Cross-browser QA (Chrome, Safari, Firefox, Edge)
Workflow	Agile/Scrum, Jira (sprint boards & backlog), Sprint Planning, Retrospectives, Git version control, SDLC
Performance & SEO	Core Web Vitals (LCP optimization), Code-splitting, Lazy Loading, Metadata Optimization, SEO Fundamentals
Others	Authentication & Authorization, Session Management, Event Validation

PUBLICATIONS

"Monitoring Ripeness in Fruits and Vegetables Using the Raspberry Pi" | IEEE Conference on Applied Artificial Intelligence and Computing (ICAAIC - 2022): Presented a research paper on utilizing Raspberry Pi for automated ripeness detection in fruits and vegetables through image processing.

EDUCATION

M.Sc. in Computer Science| Saint Louis University | 2023 – 2024
