

Srilakshmi Raghavi Velugubantla

Data Analyst

Location: TX | **Phone:** (945) 267- 6016 | **Email:** srilakshmiv395@gmail.com | <https://www.linkedin.com/in/srilakshmiraghavi/>

SUMMARY

- Accomplished around 6 years of hands-on experience as a Data Analyst, analyzing and interpreting complex datasets to derive valuable insights for business decision-making.
- Proficient in Python, R, and SQL, adept at utilizing these languages to perform various data analysis and manipulation tasks.
- Demonstrated expertise in leveraging powerful libraries such as NumPy, Pandas, Matplotlib, SciPy, ggplot2, and Dplyr within Python and R environments for in-depth data analysis, visualization, and manipulation tasks.
- Skilled in visualizing data effectively using tools like Tableau, Power BI, Microsoft Excel, and Google Analytics, enabling stakeholders to gain insights at a glance.
- Experienced in working with various databases including MySQL, SQL Server, and PostgreSQL, ensuring data integrity and accessibility for analysis purposes.
- Familiar with cloud technologies such as AWS and Azure, proficient in leveraging cloud services for scalable and secure data solutions.
- Well-versed in Agile, Waterfall, and SDLC methodologies, ensuring efficient project management and delivery of analytical solutions.
- Experienced in data cleaning, wrangling, and warehousing, ensuring data quality and integrity throughout the analytics process. Well-versed in data governance practices to maintain compliance and standardization.
- Proficient in data mining and A/B testing methodologies, coupled with strong critical thinking abilities.

TECHNICAL SKILLS

Programming & Query Languages:	Python, R, SQL, T-SQL, PL/SQL, SAS
Python Libraries & Frameworks:	Pandas, NumPy, SciPy, Scikit-learn, Matplotlib, Seaborn, Statsmodels, TensorFlow (basic), NLTK, BeautifulSoup, PySpark
Statistical & Analytical Techniques:	A/B Testing, Regression (Linear, Logistic), Time Series Forecasting, Clustering, Hypothesis Testing, Predictive Modeling, Cohort Analysis, ANOVA, Chi-square
Visualization Tools:	Power BI, Tableau, Looker Studio (Google Data Studio), Microsoft Excel (Power Query, Pivot Tables, VBA), QlikView, Plotly
Data Engineering & ETL Tools:	Apache Airflow, Talend, SSIS, Informatica, Snowflake, Azure Data Factory, DBT, Apache Nifi
Databases & Data Warehousing:	MySQL, PostgreSQL, Oracle, Microsoft SQL Server, Amazon Redshift, Azure SQL Database, BigQuery, MongoDB, Cassandra
Cloud Platforms:	AWS (S3, EC2, Lambda, Glue, Redshift, Athena, QuickSight, CloudWatch), MS Azure (Data Lake, Synapse, Databricks, Data Factory, Blob Storage)
Data Governance & Quality Tools:	Collibra (basic), Alation, Informatica DQ, Data Lineage, Metadata Management
Healthcare/Financial Tools:	EHR/EMR systems, Claims Data Pipelines, HL7, FHIR, ICD/CPT codes, HIPAA compliance Financial KPIs, GAAP, SOX reporting tools, ERP system integrations (SAP, Oracle)
Version Control & DevOps:	Git, GitHub, Jenkins, Docker, JIRA, Confluence, GitLab
Soft Skills & Practices:	Agile & Scrum methodologies, Sprint Planning, UAT Coordination, Documentation,

PROFESSIONAL EXPERIENCE

Blue Cross Blue Shield, TX, USA

Mar 2025 - Current

Data Analyst

- Analyzed claims, policyholder demographics, and provider performance data using Python (Pandas, NumPy) and SQL, identifying trends that helped reduce claim processing delays by 12%.
- Built interactive dashboards in Power BI (DAX, Power Query) and Tableau to visualize KPIs such as readmission rates, provider efficiency, and claims approval cycles, improving clinical reporting workflows.
- Executed A/B testing on healthcare outreach campaigns, comparing enrollment response rates across age segments to optimize engagement and reduce churn among high-risk members.
- Applied predictive modeling using Scikit-learn to flag potentially fraudulent claims and anticipate high-cost patients, enabling proactive care interventions.
- Transformed raw EHR, claims, and pharmacy data into clean, validated datasets, improving data reliability and supporting value-based care analytics.
- Automated recurring compliance and audit reports using SQL and Excel, reducing manual intervention by 40% and ensuring timely delivery to regulatory bodies.
- Enhanced data quality through governance protocols, outlier detection, and consistency checks, maintaining HIPAA compliance across analytics workflows.
- Used JIRA to manage data requests, maintain sprint velocity, and coordinate with BI developers, reducing backlog and improving delivery timelines for stakeholder reports.

AirBnb, India

Apr 2020 – Dec 2022

Data Analyst

- Collaborated with Airbnb’s Data Science team on host performance analytics, utilizing Python (Pandas, NumPy) to process 1M+ booking and review records, improving host quality scoring models.
- Designed interactive Power BI dashboards for tracking occupancy trends, pricing fluctuations, and seasonal demand across 300+ urban markets, enhancing revenue strategy for listing optimization.

- Conducted data mining on guest reviews using NLP techniques and Python (NLTK, TextBlob) to identify sentiment patterns, informing customer experience initiatives and reducing negative reviews by 12%.
- Leveraged Azure Data Lake and Databricks to process property listing metadata, enabling faster insights on listing performance, amenities, and cancellation rates.
- Employed SQL and PostgreSQL to automate data extraction and transformation pipelines from internal databases, reducing manual reporting time by 35%.
- Utilized ggplot2 and dplyr in R to build data visualizations for marketing analytics, supporting targeted campaign strategies across five customer segments.
- Performed A/B testing for pricing strategy experiments across different geographies, generating insights that improved average nightly rate by 8% without impacting conversion.
- Integrated Airbnb usage metrics with external datasets (e.g., weather, travel demand indexes), using Python and Excel to predict booking surges and optimize regional marketing budgets.
- Developed Excel-based KPI scorecards with advanced formulas and macros to monitor host performance metrics, enabling data-driven operational reviews.
- Participated in Agile ceremonies with engineering and product teams, aligning analytical deliverables with feature releases and improving dashboard delivery speed by 20%.
- Conducted schema audits and implemented data quality checks across key datasets, ensuring data governance and enabling consistent metrics in cross-functional reports.
- Supported the onboarding of junior analysts by creating documentation for data models, SQL queries, and BI workflows, improving knowledge transfer and collaboration efficiency.

Trigent Software, India
Data Analyst

Jun 2017 – Mar 2020

- Built and automated ETL workflows using Python (Pandas, NumPy), SQL, and AWS Lambda to streamline data ingestion for a retail analytics client, reducing processing time by 40%.
- Conducted customer behavior analysis using data mining techniques and A/B testing frameworks, enabling the client to optimize targeted marketing campaigns and improve conversion rates by 18%.
- Created interactive Tableau dashboards by blending data from Salesforce, marketing platforms, and internal SQL databases, empowering business users to monitor KPIs in real time.
- Enhanced data quality by implementing robust preprocessing workflows—handling nulls, outliers, and schema mismatches—to ensure reliable insights across 10+ product lines.
- Developed scalable SQL queries and procedures in PostgreSQL and MySQL for performance analytics, reducing query run-time from 10 to under 3 seconds on average.
- Delivered statistical modeling reports using SciPy and Matplotlib for executive presentations, supporting pricing strategy and inventory forecasting decisions.
- Designed Excel-based performance reports (PivotTables, VLOOKUPS) for the operations team, increasing visibility into daily trends across sales, customer support, and returns.
- Leveraged AWS EC2 and S3 for secure storage and scalable access to over 5TB of structured data, supporting BI teams with cost-effective compute environments.
- Participated in Agile sprints, collaborating with cross-functional teams to align deliverables with evolving business requirements and meet sprint deadlines.
- Presented actionable insights and KPI visualizations to client stakeholders, aligning data interpretations with strategic business decisions and quarterly goals.

TECHNICAL SKILLS

EDUCATION

The University of Texas at Dallas
M.S., Information Technology Management

Jan 2023 - Dec 2024

Jawaharlal Nehru Technological University, Hyderabad
Bachelor of Science, Computer Science and Engineering

Jun 2013 - May 2017

PROJECTS

2FA for Web Based Cloud Computing Services

- Developed a robust 2FA access control system enhancing security and privacy in web-based cloud services using attribute-based mechanisms and user secret key with a lightweight security device.

Efficient Authentication for Mobile and Pervasive Computing

- Introduced innovative authentication approaches for short- encrypted messages, leveraging encryption algorithms and block ciphers to enhance computational efficiency.

Big Data Ingestion and Analysis

- Executed end-to-end data processing workflows using Hadoop tools for ingestion, transformation, and analysis.
- Proficient in working with external APIs, relational databases, and streaming data for real-time and batch processing tasks.
