

SRILAKSHMI YELAMACHARLA

+1-443-739-4921 | srilakshmiyelamacharla2@gmail.com

PROFESSIONAL SUMMARY

Data Engineer with 3+ years of experience in SQL Server, PostgreSQL, and cloud platforms like AWS and Azure. Skilled in designing optimized databases, building scalable data pipelines, and developing ETL workflows to support analytics and reporting. Proficient in Python, Java, Scala, and Shell scripting for data transformation and automation. Experienced in data modeling, governance, and visualization using Power BI, with a focus on delivering secure, high-quality data solutions that enable data-driven decision-making.

TECHNICAL SKILLS

Big Data Technologies: Apache Spark, Hadoop, Snowflake, Pig, Hive, Databricks, Kafka, Cassandra

Programming & Scripting Languages: Python, Java, Scala, SQL, Shell Scripting

Databases: SQL, MySQL, PostgreSQL, MongoDB

ETL & Data Integration Tools: Talend, Apache NiFi, Informatica

Data Warehousing & Storage: RDBMS, NoSQL, MongoDB

Data Processing & Machine Learning: Pandas, NumPy, SciPy-Learn, Supervised Learning, Unsupervised Learning

Data Orchestration & Containerization: Docker, Kubernetes

Cloud Platforms & Services: Amazon Web Services (AWS), Microsoft Azure, GCP

Data Visualization: Tableau, Power BI

Version Control & Collaboration: Git, GitHub

Development Tools: PyCharm, Jupyter Notebook, VS Code

Methodologies: Agile/Scrum, WaterFall

Data Security: Encryption, Secure Access

WORK EXPERIENCE

Goldman Sachs Global

Data Engineer

Jan 2024 - Present

- Designing and developing ETL/ELT processes for extracting, transforming, and loading data into cloud platforms like Snowflake and AWS Redshift, ensuring data quality and consistency.
- Building real-time data ingestion frameworks with Apache Kafka, Spark Streaming, and AWS Kinesis, processing millions of records daily for dynamic, event-driven architectures.
- Orchestration complex data workflows using tools like Apache Airflow and AWS Glue, improving scheduling and management of data pipelines.
- Enhancing machine learning model performance with Spark MLlib and TensorFlow, driving improvements in key areas such as customer retention and fraud detection.
- Developing advanced data workflows using Azure Data Factory (ADF) and PySpark on Databricks, enabling sophisticated data transformations and seamless integrations with cloud platforms.
- Optimizing CI/CD workflows with Jenkins, Bitbucket, and Git, accelerating deployment activities and ensuring version control across multiple projects.
- Creating interactive dashboards and visualizations using Power BI and Tableau, providing actionable, real-time insights to business stakeholders.
- Managing data security and access controls through encryption and secure protocols to safeguard sensitive data.

Coforges

Data Engineer

Jun 2020 - Jul 2022

- Utilized AWS Redshift for extracting, transforming, and loading data, enabling efficient data integration from multiple sources to support business analytics.
- Designed and implemented tables and stored procedures with T-SQL, providing timely, actionable data insights for stakeholders.
- Managed data lakes on Azure Data Lake, optimizing storage, retrieval, and processing of large-scale datasets for advanced analytics and reporting.
- Collaborated with data scientists to build machine learning pipelines using Spark MLlib and TensorFlow, improving fraud detection and reducing fraudulent transactions by 15%.

- Led data migration projects from on-premise systems to GCP, enhancing system performance and reducing operational costs by 20%.
- Optimized ETL workflows and Spark jobs, achieving a 30% reduction in data processing times and improving data accessibility for business intelligence.
- Designed Star and Snowflake schema data models to enhance reporting performance, supporting BI initiatives and business decision-making.
- Implemented data security measures including encryption, secure access policies, and compliance with industry standards to ensure data protection.
- Optimized data pipeline performance and ensured scalability through the use of cloud-native technologies and orchestration tools like Apache Airflow.
- Delivered real-time data integration solutions with Apache Kafka, improving data flow and enabling faster decision-making for critical business operations.

EDUCATION

University of Maryland

M.S., Data Science

Vardhaman College of Engineering

Bachelors, electronics and communication Engineering

CERTIFICATIONS

AWS Certified Data Engineer - Associate
