

SRINANDHA KAMINI | Data Analyst

MA, USA | +1 (443)-322-6990 | nandha.kamini@gmail.com | [LinkedIn](#)

Summary

Data Analyst with expertise in SQL, Python (Pandas, NumPy), and data visualization tools (Tableau, Power BI, Qlik). Skilled in data cleaning, exploratory data analysis (EDA), and predictive analytics using machine learning. Proven track record of improving data accuracy and operational efficiency through ETL processes and data modeling. Passionate about delivering actionable findings to drive data-driven decision-making and optimize business performance.

Skills

Programming Language:	Python, SQL, R
Data Analysis & Manipulation:	Data Cleaning, Data Wrangling, Statistical Analysis, Exploratory Data Analysis, A/B Testing, Pandas, NumPy, Excel
Data Visualization:	Tableau, Power BI, Matplotlib, Seaborn, QlikView, Excel Charts
Databases & Data Pipelines:	MySQL, PostgreSQL, Microsoft SQL Server, SQL for ETL tasks, Python Scripting, Alteryx, Talend, Apache Nifi
Machine Learning Basics:	Regression Models, Clustering, Decision Trees
Methodologies & Project Management:	SDLC, Agile, Waterfall, Scrum
Cloud Platforms & Version Control:	AWS, Google Cloud Platform (GCP), Microsoft Azure, Git, GitHub
Advanced Analytics:	Time Series Analysis, Forecasting, Text Mining
Operating Systems:	Windows, UNIX, Linux, Mac

Education

Master of Science in Data Analytics	May 2024
Clark University, Worcester, MA	
Bachelor of Technology in Electrical Engineering	Jun 2022
NIT Warangal, Telangana, India	

Experience

Business Intelligence Analyst	Jun 2024
Instyle Fragrance's	
- Collected, preprocessed, and analyzed complex datasets, including sales, inventory, customer transactions, and employee schedules, using SQL, Python, and Excel to derive actionable observations and improve business strategies. - Generated real-time and historical reports to support strategic decision-making, enhance financial performance, and optimize operational efficiency, ensuring data-driven business outcomes. - Structured, developed, and optimized interactive dashboards in Tableau, Power BI, and QlikView, incorporating custom visualizations and data models to track KPIs, inventory levels, financial performance, and overall business operations. - Applied machine learning models and statistical techniques with Python and R to forecast sales trends, predict inventory needs, and model customer behavior, enabling more accurate, data-driven decisions. - Managed and automated ETL processes using tools like Alteryx, Talend, and Apache NiFi, ensuring efficient extraction, transformation, and loading of data for reporting and analysis. - Collaborated with cross-functional teams using Agile methodologies to ensure timely delivery of business intelligence solutions, optimizing business performance and aligning with fast-paced market demands.	
Data Engineer	Jan 2024 – Apr 2024
Cerebral Technologies	
- Designed, implemented, and maintained efficient ETL processes using SQL, Python, and Apache NiFi, enhancing data accessibility and usability for analytics, and improving decision-making capabilities. - Constructed, optimized, and tuned databases like MySQL & PostgreSQL to ensure data integrity and high-performance queries, enabling faster results and seamless integration with business intelligence tools. - Developed scripts and automated data workflows using Python, streamlining data processing tasks and improving operational efficiency for marketing and business analytics teams. - Managed and integrated big data technologies like Hadoop and Spark, supporting large-scale data processing and advanced analytics for better business intelligence and customer conclusions. - Engaged with data scientists and analysts to understand organizational data needs, providing tailored technical solutions that empowered data-driven decision-making across departments. - Ensured compliance with data privacy and security standards, implementing necessary measures to safeguard sensitive information and maintain the integrity of customer and business data.	
Junior Data Researcher	Sep 2020 – Jul 2022
Add on Systems Information Technology Services	
- Collaborated with senior researchers and analysts to gather and document data requirements, supporting data-driven decision-making processes. - Collected, cleaned, and interpreted large datasets using Python (Pandas, NumPy) and SQL, ensuring high levels of data accuracy and integrity.	

- Refined interactive dashboards and visual reports in Tableau, Power BI, and Qlik, making key insights accessible to stakeholders.
- Conducted Exploratory Data Analysis (EDA) to identify trends, patterns, and correlations, applying statistical techniques for actionable insights.
- Created and maintained data models and process documentation in Excel and Visio, improving data flow understanding across teams.
- Applied machine learning techniques for predictive modeling, enhancing the organization's ability to forecast trends and optimize processes.
- Controlled data quality and validation processes, developing automated Python scripts to reduce errors and improve data reliability.

Projects

Employee and Product Data Management System

- Designed a data management solution for employee and product datasets, improving data processing, reporting, and querying efficiency.
- Performed comprehensive data cleaning and standardization, ensuring accuracy by resolving duplicates, missing values, and inconsistent formats.
- Built dynamic dashboards and SQL-based reporting views to deliver real-time insights into employee performance and product metrics, supporting strategic decisions.

Advanced Visualization of Vaccine Adverse Events

- Generated an interactive visualization platform for a large dataset of vaccine adverse events, enhancing data comprehension for healthcare stakeholders.
- Conducted extensive data preparation to improve data accuracy, addressing missing values and duplicates to ensure high data integrity.
- Created interactive visual reports that highlighted trends in age-specific adverse events, supporting informed decision-making in healthcare.
