Education

University of Texas at Dallas, Richardson, TX

Aug 2021 – May 2025

Bachelor of Science in Finance

Relevant Coursework: Financial Modeling and Valuation, Intermediate Financial Management, Investment Management, Business Finance, Quantitative Business Analysis, Database Fundamentals

Professional Experience

Marsh McLennan Agency

Dallas, TX

Financial Analytics Intern

June 2023 – Nov 2023

- Applied cash and accrual accounting fundamentals to complete client financial statement packages, ensuring all receipts, disbursements, and funding requests were accurately recorded.
- Created and posted over 200 journal entries per month in **Excel**, reconciling variances and maintaining strict compliance with **GAAP** and internal controls.
- Aggregated data from multiple systems to generate and validate financial reports, reducing discrepancies by 15% and improving overall reporting accuracy.
- Performed monthly variance analysis and delivered KPI summaries to the CFO and regional finance leads, uncovering a \$200K operating expense gap and recommending forecast adjustments that enhanced quarterly accuracy.
- Automated monthly revenue reporting workflows using **Power Query**, **Excel macros**, and pivot tables, reducing manual data preparation time by 40% and ensuring consistent, timely delivery to leadership.

Resilience Inc.

Plano, TX

Finance & Data Solutions Intern

May 2022 – Aug 2022

- Prepared monthly client financial statement packages, posting journal entries for expenses, owner distributions, and funding requests in accordance with internal policies.
- Built dynamic **Excel** models and leveraged **Power Query** to cleanse and consolidate multi-source data for reporting, cutting preparation time by 40%.
- Generated comprehensive financial packages and responded to management and vendor inquiries.
- Partnered with product and operations teams to integrate usage data into quarterly performance reviews, providing actionable insights that enhanced customer retention strategies.

Leadership & Projects

Financial Data Analysis – Capstone Project

Jan 2024 – May 2024

- Extracted and validated simulated transaction data using **SQL** joins and aggregates to support P&L analysis.
- Employed **Python** for time series forecasting and variance analysis, presenting insights via **Tableau**.
- Built a forward-looking forecast in **Excel**, dynamically linking the income statement, balance sheet, and cash flow statement to enable holistic scenario analysis.

Kappa Theta Pi – Finance Lead

Aug 2022 – May 2025

- Managed chapter budgeting and financial controls; prepared monthly variance reports and presented to executive board.
- Automated budget tracking in **Excel**, improving forecast accuracy and reducing manual adjustments by 30%.
