[Power Bi] | [SQL] | [Python]

Graduate student with a master's degree in information systems and a strong academic background in software engineering and computer science. Proficient in programming languages such as Python, C, and Java, with a foundational understanding of system-level testing, including functional, structural, and test coverage methodologies. Familiar with code coverage tools and debugging practices. Demonstrates strong analytical and problem-solving abilities, a keen attention to detail, and the capacity to work independently or collaboratively within Agile development teams. Committed to contributing technical expertise and continuous learning in a dynamic and growth oriented environment.

WORK EXPERIENCE

[Dxc technology] - [Chennai], [India]

[Nov 2021-July 2023]

[Associate Professional Software Engineer]

- Led data analytics and reporting projects using Power BI, Python, and SQL, delivering actionable business insights and improving KPIs monitoring.
- Used Python and SQL to check data quality and fix issues before analysis, making sure the results were accurate and reliable.
- Gained knowledge of how to collect and manage wellness-related data from different sources such as surveys, assessments, and participation records.
- Understand how to create dashboards and reports to track key wellness metrics and identify trends for potential improvement.
- Learned how to work alongside HR and wellness teams to turn data insights into practical strategies for enhancing employee well-being.
- Familiar with methods to evaluate the success of wellness programs using participation data and survey feedback.
- Aware of data privacy principles, including HIPAA guidelines, and the importance of handling sensitive health information responsibly.
- Understand the value of aligning wellness efforts with broader company objectives through collaboration with cross-functional teams.
- Applied advanced data preprocessing, cleansing, and manipulation techniques to prepare datasets for predictive analysis and dashboards.
- Utilized Git and GitHub for version control and collaboration in a multi-developer environment, managing feature branches and pull requests.
- Conducted code reviews and maintained versioned releases of ETL and application codebases.
- Understanding of defect tracking and reporting using tools like **JIRA**, and the importance of collaboration with development teams to resolve bugs and improve application quality.

- Ensured repository integrity by enforcing commit standards and merge strategies.
- Collaborated with stakeholders to gather requirements and deliver custom dashboards aligned with strategic business goals.
- Created and maintained ETL pipelines for efficient data extraction, transformation, and loading, increasing data reliability and timeliness.
- Developed and maintained Power BI dashboards and Tableau reports, translating complex datasets into compelling visualizations for leadership.
- Acted as a key contributor in Agile Scrum teams, leading sprint ceremonies and ensuring timely delivery of analytics features.
- Integrated real-time data flows using Solace Pub Sub+ and PowerApps, optimizing operational decision-making processes.
- Leveraged DevOps tools such as Azure DevOps, Jenkins, and JIRA for CI/CD, source control, and sprint tracking.
- Delivered presentations to business and IT leadership, communicating data-driven recommendations effectively.

EDUCATION

[Saint Louis University] - [St Louis], [Missouri]

[Masters] – [Information Systems], [May 2025]

[Gpa: 3.74]

PROFESSIONAL SKILLS

- Data Visualization & Reporting: Power BI, Tableau
- Software Development & Programming: Python, SQL
- Agile & DevOps Methodologies: JIRA, Azure DevOps, Bitbucket, and Jenkins
- API Development & Integration: Any point Studio
- Testing & Debugging

Certifications

- Certified MuleSoft Developer – MCD Level 1
- Microsoft Azure Fundamentals – AZ900
- Certified MuleSoft Integration Associate
- Solace Certified Developer Practitioner – Level 1
- Solace Certified Solutions Consultant

Here is the recent Dashboard I worked on:
