

SRINIDHI JANNAPUREDDY

Phone: 913-238-3848 | **Email:** jannapureddysrinidhi11@gmail.com

LinkedIn: www.linkedin.com/in/jannapureddy-srinidhi

Professional Summary

Detail-oriented and highly motivated Python Full Stack Developer with **over 4 years of experience** in building scalable, robust, and secure web applications. Skilled in designing and developing end-to-end solutions using Python frameworks (Django, Flask) and modern front-end technologies (React.js, Angular). Proficient in integrating RESTful APIs, implementing microservices, and deploying applications on AWS. Adept at collaborating with cross-functional teams to translate business requirements into technical solutions, optimizing performance, and ensuring high-quality code delivery. Passionate about continuous learning and delivering impactful, user-centric solutions.

Technical Skills

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Backend Frameworks: Django, Flask, FastAPI

Frontend Frameworks: React.js, Angular, Redux, Bootstrap

Web Technologies: RESTful APIs, GraphQL, AJAX, JSON, jQuery

Databases: PostgreSQL, MySQL, MongoDB, SQLite

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS), Docker, Jenkins, Git, GitHub, GitLab CI/CD

Containerization & Orchestration: Docker, Kubernetes basics

Testing & Automation: PyTest, Selenium, Postman, unit and integration testing

Others: Agile (Scrum), Jira, Confluence, VS Code, PyCharm

Professional Experience

Python Full Stack Developer | Elevance Health, USA

January 2025 – Present

Responsibilities:

- Designed and implemented healthcare portal modules using Django and React.js to enhance patient engagement and improve data accessibility.
- Built secure RESTful APIs to handle claims processing and medical data integration, ensuring compliance with HIPAA standards.
- Integrated AWS services (S3 for storage, Lambda for serverless processing, RDS for database management) to improve scalability and operational efficiency.
- Developed reusable React components with Redux for state management, improving front-end performance and maintainability.
- Automated CI/CD pipelines using Jenkins and Docker, reducing deployment errors and cycle times.
- Optimized PostgreSQL database queries and data models to enhance application responsiveness and reliability.
- Implemented advanced authentication using JWT and OAuth2, securing sensitive patient and financial data.
- Created automated test cases using PyTest and Selenium, improving test coverage and system stability.
- Participated in Agile ceremonies, providing technical input during sprint planning and retrospectives.
- Provided production support and troubleshooting, achieving high availability and improved user satisfaction.

Environment: Python, Django, React.js, Redux, AWS (EC2, S3, Lambda, RDS), PostgreSQL, Docker, Jenkins, Git, RESTful APIs, OAuth2, JWT, Agile (Scrum), PyTest, Selenium

Python Full Stack Developer | Equifax | USA**Mar 2024 – Dec 2024****Responsibilities:**

- Developed and maintained fraud detection modules using Flask and Angular, enhancing data security and analysis capabilities.
- Built microservices-based APIs to integrate external credit data providers, enabling real-time data processing.
- Designed and implemented data pipelines using Python for cleansing and transformation of large-scale credit and financial datasets.
- Optimized MySQL queries and data models to support faster analytics and improve system performance.
- Deployed applications on AWS EC2 and configured S3 storage for secure, scalable file handling.
- Containerized applications using Docker, ensuring consistency across development, testing, and production environments.
- Automated build and deployment processes using Jenkins, enabling faster and more reliable releases.
- Conducted rigorous unit and integration testing with PyTest and Postman to ensure defect-free production deployments.
- Collaborated with cross-functional teams to define technical requirements and align with business objectives.
- Contributed to application security enhancements through secure coding practices and code reviews.

Environment: Python, Flask, Angular, AWS (EC2, S3), MySQL, Docker, Jenkins, Git, RESTful APIs, Microservices architecture, Agile (Scrum), PyTest, Postman

Python Full Stack Developer | Ness Technologies | India**Jun 2020 – Jul 2023****Responsibilities:**

- Designed and developed enterprise-grade web applications using Django and React.js, improving operational efficiency for enterprise clients.
- Developed and integrated RESTful APIs to connect front-end and back-end modules seamlessly.
- Created responsive front-end interfaces using React.js and Bootstrap, enhancing user experience across devices.
- Implemented MySQL database schemas, optimized complex queries, and ensured data integrity.
- Migrated legacy monolithic systems to a microservices architecture, reducing maintenance costs and improving scalability.
- Containerized applications with Docker, streamlining deployments and simplifying environment management.
- Deployed applications on AWS EC2 and configured S3 buckets for file storage and static content delivery.
- Automated test cases and conducted UI testing with Selenium to improve code reliability and reduce manual testing effort.
- Managed version control using Git and followed Agile methodologies for iterative development and delivery.
- Worked closely with stakeholders to gather requirements, transforming business needs into technical features.

Environment: Python, Django, React.js, Bootstrap, MySQL, AWS (EC2, S3), Docker, Git, RESTful APIs, Agile (Scrum), Selenium, Jira

Education:

Master of Science in Computer Science, University of Central Missouri, USA, 2025

Bachelor of Technology in Computer Science, ACE Engineering College, India, 2022
