Professional Summary

Senior Software Development Engineer with over three years of experience at Tata Consultancy Services, delivering scalable, full-stack solutions for global clients in consumer and financial technology. Proficient in Python, JavaScript, Java, and AWS, with expertise in designing and developing high-performance systems using React, Node.js, and Spring Boot. Skilled in DevOps practices, including CI/CD with Jenkins and GitHub Actions, containerization with Docker and Kubernetes, and operational excellence. Adept at collaborating with Product Managers, business stakeholders, and cross-functional teams to define requirements and launch innovative features. Passionate about building customer-focused solutions, optimizing system reliability, and thriving in Amazon's inclusive, fast-paced environment.

Education

Clemson University, Clemson, SC August 2023 – May 2025

Master of Science in Computer Science, GPA: 3.80/4.00

Sreenidhi Institute of Science and Technology, Hyderabad, India July 2016 – August 2020

Bachelor of Technology in Computer Science and Engineering, GPA: 9.51/10.00

Technical Skills

- **Programming Languages:** Python, JavaScript, TypeScript, Java, SQL, Bash
- **Frontend Technologies:** React, Angular, HTML, CSS, Tailwind CSS
- **Backend Technologies:** Node.js, Django, Spring Boot
- **Cloud and DevOps:** AWS (Lambda, S3, EC2, RDS, DynamoDB, API Gateway), Docker, Kubernetes, CI/CD (Jenkins, GitHub Actions), Terraform
- **Databases:** MySQL, PostgreSQL, MongoDB, DynamoDB
- **Frameworks and Tools:** Apache Spark, Kafka, REST APIs, GraphQL
- **Software Practices:** Agile, DevOps, Test-Driven Development, SOLID Principles, Code Reviews, Source Control (Git)
- **Security:** OWASP, OAuth, JWT

Professional Experience

Tata Consultancy Services, Hyderabad, India August 2020 – June 2023

Senior Software Development Engineer

- Collaborated with Product Managers and business stakeholders to design and develop full-stack features for Deutsche Bank's consumer technology platform, processing 100 million daily transactions with 99.9% reliability.
- Architected and implemented scalable microservices using Node.js, React, and AWS (Lambda, S3, DynamoDB), improving customer experience for CitiBank's financial systems by 20%.
- Led end-to-end development of seller infrastructure features, integrating REST APIs and Spring Boot, reducing onboarding time for e-commerce sellers by 25%.
- Implemented CI/CD pipelines with Jenkins and GitHub Actions, incorporating automated testing and security checks, accelerating release cycles by 30%.

- Designed high-availability systems with Docker and Kubernetes, optimizing resource utilization on AWS and reducing infrastructure costs by 15%.
- Conducted code reviews and mentored junior developers in Agile practices and coding standards, enhancing team productivity by 10%.
- Provided operational support for production systems, resolving critical issues within SLAs to ensure seamless customer experiences.

Triant Software Solutions, Hyderabad, India
Software Engineer Intern

January 2020 – July 2020

- Developed full-stack web applications using Python, Django, and React for e-commerce platforms, reducing page load times by 25%.
- Built CI/CD pipelines with GitHub Actions, streamlining deployments and improving delivery efficiency.
- Collaborated with cross-functional teams to gather requirements and deliver user-friendly features, enhancing system usability.

Projects

Consumer Technology Recommendation Engine 2022
Python, React, Node.js, AWS Lambda, DynamoDB, Apache Kafka

- Designed and developed a scalable recommendation system for an e-commerce platform, serving personalized content to 50,000 daily users.
- Integrated Kafka for real-time data streaming and React for dynamic front-end, improving user engagement by 30%.
- Collaborated with Product Managers to define feature requirements, delivering end-to-end solutions within Agile sprints.
- Deployed on AWS with CI/CD pipelines, ensuring high availability and operational excellence.

Operations Technology Transportation Planner 2021
Java, Spring Boot, Angular, AWS S3, Docker, Kubernetes

- Built a transportation planning tool to optimize logistics for 100 fulfillment centers, reducing delivery times by 20%.
- Developed REST APIs and Angular-based dashboards, enabling operators to monitor and manage logistics workflows.
- Implemented containerized deployments with Docker and Kubernetes, achieving zero-downtime updates.
- Worked cross-functionally with business stakeholders to refine requirements and ensure scalability.

Open Source Contributions

2020 – 2023

- Contributed to Apache Kafka plugins for improved real-time data streaming performance.
- Enhanced open-source React components for better accessibility and performance.
- Optimized Java-based microservices in Spring Boot projects, increasing throughput by 15%.

Certifications

- AWS Certified Solutions Architect
- Udemy Certified in Full-Stack Web Development with ReactJS
- Google Certified in Cloud Data Engineering
