

Professional Summary

- 4+ years of experience in data analysis using Python (Pandas, NumPy), SQL (MySQL, PostgreSQL, Azure SQL), and R for statistical modeling and data processing.
- Expertise designing and managing ETL pipelines, optimizing complex SQL queries, and integrating structured and unstructured data from diverse sources.
- Proficient in developing interactive dashboards and automated reporting solutions using Power BI, Tableau, and advanced Excel functions for real-time analytics.
- Skilled in performing exploratory data analysis (EDA), data wrangling, and feature engineering to support predictive modeling and machine learning initiatives.
- Strong experience in business requirements gathering, data governance, metadata management, and workflow automation using Jira, Confluence, and Agile methodologies.

Core Skills

Language: Python, R, SQL, SAS, JavaScript
Data Analytics Tools: Power BI, Tableau, Jupyter Notebook, Regression Analysis, Classification Modeling, Statistical Inference
Management Tools: JIRA, SharePoint, Confluence, Bitbucket, GitHub
Databases: PostgreSQL, MS SQL Server, SQL Server, MySQL, Oracle, MongoDB
Big Data Technologies: Hadoop, HDFS, MapReduce, YARN, Hive, Pig
Methodologies: SDLC, Agile, Scrum, and Waterfall
Streaming Technologies: Apache Kafka, Kafka Streams, Spark Streaming
Data Manipulation & Transformation: Data Wrangling, SSIS, ETL & ELT (Extract, Transform, Load), Data Cleaning
Data Visualization and Reporting: Data Visualization, Dashboards & Reporting
Analytics and Decision-Making: Risk & Decision Analysis, Analytical Skills
Libraries: Pandas, NumPy, SciPy, TensorFlow, Scikit-Learn, and PySpark
Others: AWS, Azure, GCP, ETL, Glue, Airflow, and DBT
Operating Systems: Windows, Mac, and Linux
Modern Data Engineering Tools: Snowflake, Databricks, AWS Redshift, Google BigQuery

Experience

McKinsey & Co., USA Data Analyst	Sep 2024 – Current
- Spearheaded the design and deployment of over 20 interactive dashboards using Tableau and Power BI, providing real-time insights for sales, marketing, and operations teams, leading to a 15% increase in data-driven decisions across departments. - Managed a SQL-based database system (MySQL, SQL Server, PostgreSQL) with over 5 million records, optimizing querying processes that resulted in a 25% reduction in data retrieval time for key reporting purposes. - Led data wrangling initiatives using Python’s Pandas and NumPy libraries, processing over 2TB of raw data for a quarterly analysis, improving data quality and accuracy by 30%. - Designed and maintained a comprehensive geospatial analytics solution using PostGIS and GeoPandas, enabling location-based optimizations that enhanced route planning and reduced delivery time by 20%. - Collaborated with cross-functional teams to design cloud-based data pipelines on AWS and GCP, reducing latency by 40% in data processing tasks for real-time analytics. - Developed and maintained a data warehouse solution using AWS Glue, resulting in a 15% improvement in data accessibility for business analysts across the organization. - Applied machine learning techniques using SciKit-Learn, enabling predictive insights for customer segmentation, and improving targeted marketing campaigns by 25%. - Implemented Excel-based financial modeling that consolidated budgeting data across multiple departments, improving forecasting accuracy by 20%. - Enhanced project timelines by automating SQL queries, reducing manual data extraction time by 50%.	
Avenir Technologies, India Data Analyst	Jul 2019 – Dec 2022
Analyzed complex datasets with over 10,000 records using Python (Pandas, NumPy) and SQL, identifying key patterns and correlations that improved strategic decision-making, resulting in a 30% increase in operational efficiency and a 25% boost in revenue.	

- Engineered and maintained data integrity across MySQL & PostgreSQL databases, ensuring accurate data collection and reporting for over 200,000 records daily, reducing data discrepancies by 30% and improving system efficiency by 20%.
- Developed and optimized ETL pipelines using Talend, integrating data from 30+ sources, improving data accessibility by 40%, and enhancing data pipeline performance.
- Created 25+ interactive dashboards and reports using Power BI and Tableau, enabling stakeholders to visualize insights effectively, leading to a 35% improvement in decision-making.
- Executed data validation and performance testing, including User Acceptance Testing (UAT) and regression testing, ensuring data accuracy and reliability for business intelligence solutions.
- Utilized Jira for project tracking and backlog management, ensuring timely delivery of data analytics projects and seamless collaboration across teams following Waterfall methodology.
- Produced comprehensive technical documentation, including data dictionaries, transformation logic, and metadata records, ensuring clarity in data governance, business rules, and analytical processes.

Education

Master of Science in Business Analytics and Artificial Intelligence

The University of Texas at Dallas, Texas

Bachelor of Technology, Computer Science and Engineering

SRKR Engineering College, Bhimavaram, India
