

Srinivas Ghanate

Java Full Stack Developer

Houston, TX, 77001 | +1 (346) 512-0282 | Shree.ms321@gmail.com

Summary

- **4+ years** of experience as a **Java Full Stack Developer**, delivering enterprise-level applications using Java, J2EE, Spring Boot, and microservices architecture, leading to a 20% improvement in application efficiency.
- Expertise in **front-end development** using **HTML5, CSS3, JavaScript, AngularJS, ReactJS, and Vue.js**, delivering responsive, user-friendly, and cross-browser compatible web interfaces enhanced user engagement by **30%**.
- Extensive hands-on experience in **back-end development** with technologies like **Spring (MVC, Security, Boot), Hibernate, JPA, and SOAP/RESTful Web Services**, ensuring high-performance and scalable applications.
- Proficient in **cloud technologies** and deployment, using **AWS services** such as EC2, Lambda, RDS, S3, and **Kubernetes** for container orchestration and horizontal scaling of microservices.
- Strong experience with **database management** and optimization using **Oracle, MySQL, SQL Server**, and **MongoDB (NoSQL)**, along with advanced **SQL queries, stored procedures, and triggers**.
- Experience with **DevOps** practices and tools, building and automating CI/CD pipelines using **Jenkins, Maven, Docker**, and deploying applications on **AWS** and **Azure** cloud environments.
- Knowledgeable in **authentication and security protocols** like **OAuth 2.0**, securing REST APIs, and implementing security layers for enterprise-level applications.
- Built and optimized scalable, fault-tolerant systems using Spring Boot and microservices architecture, improving application efficiency by 20%.
- **Version control experience** with Git, SVN, and CVS, facilitating collaborative development and efficient code management across teams.
- Experience with **ITSM** platforms for ticketing, incident management, and workflow automation, performing system administration tasks.
- Quickly adopted new technologies like React.js and Kafka, demonstrating an eagerness to learn frameworks relevant to ML and data processing at scale.
- Familiar with AWS services (EC2, Lambda, S3) and container orchestration tools like Docker and Kubernetes, providing a solid foundation for building and deploying ML pipelines.
- Familiar with **Big Data technologies** like **Hadoop, Spark, Kafka**, and working on **real-time data streaming** and **analytics** in large-scale environments.

SKILLS

Programming Languages: Java, C, C++, SQL, PL/SQL/R

Frameworks: Spring (Core, Security, AOP, MVC, Boot), Hibernate, Struts, Angular JS, Node JS, React JS

Web Technologies: HTML5, CSS3, JavaScript, AJAX, JSON, jQuery

Testing: JUnit, Mockito, Selenium WebDriver

Build Tools: Maven, Jenkins

Version Control: GIT, SVN, CVS

Databases: Oracle, MySQL, SQL Server, MongoDB

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS), Docker, Kubernetes

Application Servers: Tomcat, JBoss, WebSphere

Operating Systems: Unix, Linux

IDEs: Eclipse, IntelliJ, Spring Tool Suite

EXPERIENCE

Genie Healthcare, Houston, TX

July 2023 to Present

Java Full Stack Developer

- Optimized front-end architecture using **Spring MVC**, leveraging interceptors, filters, and dispatcher servlets, improving application efficiency by 20%.
- Delivered **XML** and **JSON** content through Spring **RESTful** web services, utilizing **Jackson Spring** for 30% faster data serialization/deserialization.
- Event-driven workflows in **Control-M**, enable jobs to start automatically based on file arrival, database updates, or application events, which enhanced responsiveness to system changes.
- Worked on dynamic web applications using **Angular** for the front end and **Spring Boot** for the back end, ensuring seamless integration through RESTful APIs.
- Optimized database query performance by integrating caching strategies, reducing API response times by **40%**, a concept utilized in AI-based recommendation systems.
- Implemented dynamic report generation with **Java Reflection**, enhancing premium calculation processing.

- Streamlined email generation and delivery using **Flex Layout, Data Grid menus**, and **Java Mail API** reducing email processing time by 15%.
- Worked closely with product managers and data teams to translate business requirements into technical solutions, participating in architecture and design reviews.
- Contributed to Android mobile application development using Java, focusing on UI components, activity lifecycle management, and REST API integration.
- Integrated **Spring IoC container** for handling bean creation, dependency injection, and transaction management.
- Leveraged Unix for command-line operations, shell scripting, and troubleshooting, optimizing application workflows and task automation.
- Configured persistence with **Spring JPA** and **Hibernate**, interacting with the Oracle database using **POJO classes** in an **ORM architecture**.
- Used **Spring AOP** for system-wide logging functionality.
- Applied advanced algorithms and data structures to optimize application logic and memory usage, leveraging Java concurrency features like thread pools and stream APIs.
- Worked extensively with Git for version control, managing branches, resolving conflicts, and collaborating with cross-functional teams using Agile methodologies.
- Collaborated with UI developers, managed version control with SVN, and deployed and tested code using Maven and JUnit.

Comerica Bank, Dallas, TX

Jun-2022 to Jun-2023

Java Full Stack Developer

- Engineered business and presentation layers using **Struts, JSP, HTML, CSS**, and **JavaScript** for validation, integrating with **Spring Bean classes** resulting in a 15% improvement in application response times.
- Leveraged **Java 8** features such as Lambda Expressions, Functional Interfaces, and Stream API to optimize collections and concurrency operations, boosting performance by 20%.
- Integrated Java-based microservices with Angular front ends using HTTP Client, implementing both two-way data binding and asynchronous data handling to optimize performance.
- Implemented **CI/CD pipelines** using **Jenkins** and **Docker**, deploying in **AWS** environment with **Git** and **Maven** for build management.
- Engaged in **UX/UI design** using **Vue.js, React.js**, and **Node.js**, developing interactive and visually appealing user interfaces.
- Worked on **Big Data integration** with **Hadoop, Spark, Kafka**, deploying **Spring Boot microservices** on **Pivotal Cloud Foundry (PCF)** using **Jenkins**.
- Contributed to the full **SDLC**, from requirement gathering to deployment, collaborating on source control with **Azure DevOps**, ensuring a 99.9% uptime across deployments.

Aspire Systems, India

Feb -2020 to Dec -2021

Java Engineer

- Translated business requirements into technical specifications for J2EE-based systems, collaborating with project managers to deliver solutions that met business needs.
- Actively participated in Daily Scrum meetings, sprint planning, estimations, and retrospectives, contributing to a 10% increase in team velocity.
- Utilized **GIT, Jenkins**, and CI/CD automation tools, ensuring seamless integration and delivery reducing deployment errors by 20%.
- Resolved pre-production and production issues in **JIRA**, ensuring timely fixes and smooth application flow.
- Built and validated RESTful web service APIs (Spring) and JUnit test cases, coordinating closely with QA to ensure 100% code coverage and robust testing.
- Led the development of **Java and Android mobile applications**, contributing to end-to-end delivery.

EDUCATION

Master of Science: Electrical Engineering

Lamar University Beaumont TX, Graduated

Bachelor of Technology: Electronics and Communication Engineering

Jawaharlal Nehru Technological University, Graduated
