

PROFESSIONAL SUMMARY

Over 3+ years of experience in Data Analytics and Data Science, leveraging advanced analytics, statistical modeling, and machine learning (e.g., Linear/Logistic Regression, Decision Trees, XGBoost, PCA) to drive predictive insights and business strategies. Proficient in Python, SQL, Tableau, Power BI, and Excel for data cleaning, visualization, and extracting insights from complex datasets and relational databases.

SKILLS

- **Programming Languages:** Python, Java, JavaScript, TypeScript, HTML, CSS
- **Data Visualization:** Tableau, Power BI, SQL Server Reporting Services (SSRS), Looker, Excel, Matplotlib, Seaborn and Pivot tables
- **Frameworks/Technologies:** React JS, Next.js, Node JS, Nest.js, Spring Boot, Flask, RESTful API
- **Cloud & DevOps:** Cloud (Azure, AWS), DevOps (Docker, Kubernetes, Jenkins, CI/CD, Git), Agile (Scrum, Kanban)
- **Databases:** SQL (PostgreSQL, MySQL, Microsoft SQL Server, SQLite, Oracle), NoSQL (MongoDB, Redis)

PROFESSIONAL EXPERIENCE

Svastha Infotech

Remote

Data Analyst

Jan 2025 – Present

- Built **25+** Tableau and Smartsheet dashboards using SQL on AWS Redshift and Oracle DB (with Excel), delivering real-time operational insights for leadership.
- Automated compliance and operations reporting using SQL stored procedures and window functions, reducing manual effort by **20%** and improving process standardization.
- Led end-to-end dashboard lifecycle: data modeling, complex calculations, advanced visualizations (Gantt, heatmaps), UAT, and Agile-based production rollout via ServiceNow.

BTF Pro LLC

Dallas, TX

Data Analyst

Jun 2023 – Dec 2024

- Built and deployed Power BI dashboards by integrating data from Azure Databricks, SQL Server, Excel, and other enterprise sources to deliver unified cross-departmental insights.
- Designed scalable data models and interactive visuals (Pie, Bar, Tree Maps, YoY/ QoQ/ MoM trends) using Power Query and DAX, improving report efficiency by **20%** and replacing legacy SSRS/MicroStrategy reports.
- Leveraged Python (NumPy, Pandas, Matplotlib) for data wrangling and exploratory analysis to enhance reporting and support business decisions.

Ridhan Technologies

Hyderabad, India

Software Engineer

Jan 2020 – July 2021

- Engineered a microservice for document ingestion and metadata extraction using Java, Spring Boot, and **AWS EC2, ECS, S3, Dynamo DB** accelerating data availability by **50%**.
- Developed advanced search and filtering features with React and TypeScript, enabling users to locate legal and financial documents in under 2 seconds.
- Automated build and deployment pipelines with Jenkins, Docker, and Kubernetes, reducing manual deployment effort and ensuring zero-downtime releases.

PROJECTS

YouTube Data Analysis Project

Mar 2023 – May 2023

- Analyzed YouTube data from Kaggle using SQL, AWS S3, Python (Pandas), R, and Power BI to extract actionable insights and built interactive dashboards to optimize content, enhance audience engagement, and boost subscriber growth.
- Applied ML models (linear regression, decision trees, random forests) with hyperparameter tuning to improve accuracy in predicting audience behavior and content performance.

Exploratory Data Analysis on 7M Companies

Sep 2022 – Dec 2022

- Conducted exploratory data analysis on a 7 million companies dataset using Python libraries such as Pandas, NumPy, Matplotlib, and Seaborn to clean data by handling missing values, outliers, and duplicates.
- Generated descriptive statistics and created visualizations to uncover patterns supporting data-driven insights.

EDUCATION

California State University, San Bernardino

San Bernardino, CA

Master of Science in Computer Science (GPA: 3.34/4.00)

Aug 2021 – Dec 2023

Amrita University

Coimbatore, India

Bachelor of Technology in Computer Science

July 2017 – July 2021

ACTIVITIES & LEADERSHIP

California State University, San Bernardino

Remote

Teaching Assistant – Data Visualization (part-time)

Jan 2022 – May 2022

- Led a team of students in Data Visualization, conducting lessons and workshops on data storytelling, chart design best practices, and visualization tools such as Tableau, Power BI, and Matplotlib.
