SUMMARY

- Java Full Stack Developer with over 5 years of experience delivering **enterprise-scale web applications, microservices, and real-time data** platforms across **banking, finance, and consumer service** domains.
- Proficient in **Java 8–17, Spring Boot, REST APIs, GraphQL**, and event-driven architectures using **Apache Kafka** for high-throughput, low-latency systems.
- Experienced in developing dynamic, responsive UIs using **React.js, Redux, Angular, JavaFX**, and **Swing**, integrated with secure backend services.
- Skilled in deploying and managing cloud-native applications on **AWS (ECS, Lambda, API Gateway, S3, CloudWatch, SNS/SQS)** and leveraging serverless and containerized architectures.
- Hands-on experience with **SQL** and **NoSQL** databases including **PostgreSQL, Oracle, MySQL**, and **Redis**, with expertise in query optimization, indexing, and partitioning.
- Strong background in implementing enterprise-grade security solutions using **OAuth2, JWT, and Spring Security**, ensuring **PCI-DSS** and regulatory compliance.
- Proficient in **CI/CD** automation using **Jenkins, Maven, GitHub Actions**, and **AWS CodePipeline** to enable rapid, reliable software delivery.
- Collaborated with **AI/ML** teams to integrate **LLM**-powered document verification, fraud detection, and predictive analytics into production systems.
- Proven track record of working in **Agile/Scrum** environments, closely engaging with cross-functional teams including product owners, **QA, DevOps**, and business stakeholders.
- Recognized for translating complex business requirements into scalable, high-performance technical solutions with a focus on quality, security, and maintainability.

TECHNICAL SKILLS

- **Languages:** Java (8–17), Python, JavaScript, TypeScript, SQL, HTML/CSS, C
- **Frameworks/Technologies:** Spring Boot, Spring MVC, REST API, GraphQL, Microservices, React.js, Redux, Angular, JavaFX, Swing, Apache Kafka, AWS Lambda, AWS ECS, AWS API Gateway, AWS SNS/SQS
- **Databases:** PostgreSQL, MySQL, Oracle, Redis
- **Cloud Platforms:** AWS (ECS, Lambda, API Gateway, S3, CloudWatch), Azure (App Services, API Management)
- **Developer Tools:** VS Code, Eclipse, Postman, Git, GitHub Actions, Jenkins, Maven
- **Testing Tools:** JUnit, Mockito, Selenium
- **Security:** OAuth2, JWT, Spring Security, Role-Based Access Control
- **AI/ML Collaboration:** LLM Integration, Fraud Detection Models, Predictive Analytics Support

PROFESSIONAL EXPERIENCE

Client: Bank Of America, Charlotte, NC

July 2024 – Current,

Role: Java Full Stack Developer

Responsibilities:

- Leading the development of a secure **digital banking platform** to streamline customer onboarding, loan processing, and real-time transaction monitoring.
- Designing and developing scalable **microservices** using **Java 17, Spring Boot, and REST APIs**, integrated with **GraphQL** for efficient data querying.
- Building dynamic and responsive **front-end** modules with **React.js** and **Redux**, enabling real-time dashboards for account insights and transaction status.
- Deployed backend **microservices** and **APIs** on **AWS ECS** and **Lambda**, using **API Gateway** for secure routing and **CloudWatch** for centralized monitoring.
- Collaborating with **AI/ML** teams to integrate **LLM**-powered document verification and fraud detection workflows, reducing manual review times by 40%.

- Optimizing **PostgreSQL** and **Oracle** queries with indexing, partitioning, and query refactoring to improve system performance and reduce latency.
- Implementing enterprise-grade security with **OAuth2**, **JWT**, and role-based access control to ensure **PCI-DSS** compliance.
- Configuring automated **CI/CD** pipelines using **Jenkins**, **Maven**, and **GitHub** Actions for build, test, and deployment processes across multiple environments.
- Integrated **AWS S3** for secure document storage and **AWS SNS/SQS** for asynchronous event-driven processing.
- Working in **Agile/Scrum** sprints alongside compliance officers, QA teams, DevOps engineers, and product owners to ensure timely, compliant feature delivery.

Client: Tata Consultancy Services, Hyderabad

Mar 2022– Aug 2023

Role: Associate Java Developer

Responsibilities:

- Contributed to the development of an enterprise-grade workflow automation platform for financial and operational processes across multiple business units.
- Developed and maintained backend services using **Java 11**, **Spring Boot**, and **REST APIs** to enable seamless integration between internal applications and third-party systems.
- Implemented asynchronous event-driven architecture using **Apache Kafka** for real-time updates and transaction processing.
- Built responsive UI modules with **Angular 12** and integrated with REST endpoints to provide dynamic dashboards and workflow management tools.
- Deployed services on **AWS EC2** with secure **API** exposure via **AWS API Gateway**, leveraging **S3** for file storage and **CloudWatch** for monitoring.
- Optimized **PostgreSQL** and **MySQL** queries, applying indexing, partitioning, and caching strategies (Redis) to improve data retrieval performance.
- Implemented authentication and authorization with **Spring Security**, **OAuth2**, and **JWT** for secure access control.
- Configured **CI/CD** pipelines in **Jenkins** and **GitHub** Actions to automate builds, testing, and deployment workflows.
- Collaborated closely with **QA**, **DevOps**, and product teams in **Agile/Scrum** sprints to deliver prioritized features on schedule.
- Worked with business analysts to gather requirements, document technical solutions, and ensure alignment with client objectives

Client: Zomato, Hyderabad, India

Mar 2020 – Feb 2022

Role: Front End Developer

Responsibilities:

- Developed and enhanced Zomato's restaurant discovery, ordering, and delivery management platform to support millions of active daily users.
- Built interactive front-end modules using **JavaFX**, **Swing**, and **Spring MVC**-backed views for dynamic restaurant listings, menus, and order tracking.
- Integrated **real-time APIs** for location-based restaurant search, delivery partner tracking, and estimated delivery time updates.
- Collaborated with backend teams to consume **REST APIs** for order management, payment processing, and user profile services.
- Optimized front-end performance by implementing asynchronous data loading, caching strategies, and efficient DOM rendering.
- Implemented secure session management, input validation, and encryption protocols for user authentication workflows.
- Partnered with **UI/UX** designers to deliver responsive and mobile-friendly layouts, improving user engagement metrics.
- Integrated payment **gateway APIs** to support multiple transaction methods, including wallets, cards, and UPI.

- Participated in **Agile/Scrum sprints**, working closely with QA, DevOps, and product teams to ensure timely feature delivery.
- Documented reusable **UI** components, **API** integration processes, and front-end performance optimization techniques for cross-team

Education:

Master of Science in Computer Science (Campbellsville University)
