

SAKKIROLLA SRIRAAGA

+1 (972) 688-2679 | raagasakki19@gmail.com | Dallas, USA | [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven Data Engineer with 2+ years of U.S. experience (plus 1 year internship) building scalable data pipelines, optimizing data workflows, and delivering analytics solutions. Skilled in AWS (S3, Redshift, Glue, Lambda), SQL, Python, and Spark with proven ability to solve complex problems and improve system performance. Passionate about enabling data-driven decision-making by delivering high-quality, reliable datasets.

SKILLS

Languages & Tools: Python, SQL, PySpark, Java, KornShell

AWS & Cloud: S3, Redshift, Glue, Lambda, Athena, RDS, EMR, Azure Data Factory, Databricks

Big Data & ETL: Hadoop, Hive, Spark, dbt, Airflow, Informatica, SSIS, DataStage, Kafka, MLflow, APIs (REST/SOAP)

Databases: Snowflake, BigQuery, SQL Server, Cosmos DB, Postgres

Analytics & Visualization: Tableau, QuickSight, Power BI

PROFESSIONAL EXPERIENCE

Stanley Black & Decker

Irving, TX, USA

Data Engineer

March 2025 - Present

- Designed and optimized ELT pipelines with Airbyte + REST APIs, improving ingestion speed by 50% into AWS S3.
- Built 100+ dbt models to transform data in Snowflake, cutting BI reporting latency by 35%.
- Automated deployments with GitHub Actions + Terraform, reducing failures by 60%.
- Containerized Spark jobs on Docker + Kubernetes, boosting compute efficiency by 25%.
- Implemented ELK-based anomaly detection, reducing resolution time by 90%.

Tekgigz

Dallas, TX, USA

Data Engineer

August 2023 - March 2025

- Built ETL pipelines in Databricks (Azure), using patterns transferable to AWS Glue/Redshift, improving speed by 45%.
- Implemented Kafka + Spark Streaming architecture handling 1M+ events/hour with <1s latency.
- Optimized Big Query partitioning/clustering, cutting query costs by \$1.5K/month.
- Integrated MLflow for tracking 15+ predictive models with reproducibility.

Cognizant

Hyderabad, TG, India

Programmer Analyst trainee

June 2021 - August 2022

- Automated 15+ ETL processes with ADF, applying concepts transferable to AWS Glue/Lambda (99.9% success).
- Built real-time IoT pipelines with Azure Stream Analytics, reducing latency to <2 seconds.
- Managed Cosmos DB & Azure SQL scaling to 100K+ requests/day.
- Orchestrated job schedules with Airflow & ActiveBatch, improving reliability.

PROJECTS

Retail Sales Analytics Pipeline

- Designed an end-to-end ETL pipeline using AWS S3, Glue, and Redshift to transform raw sales data into curated datasets, improving reporting latency by 40% and enabling interactive dashboards in QuickSight.
- Automated ingestion of multi-source retail sales data (CSV, APIs, JSON) into AWS S3, orchestrated with Glue jobs, enabling analysts to generate QuickSight dashboards 2x faster and improving decision-making efficiency.

EDUCATION

Southeast Missouri State University

August 2022 - December 2023

Master's, Computer Science

GPA: 3.8

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900)

- Validated foundational knowledge of cloud concepts, Azure services, solutions, pricing, and governance.

Databricks Academy – Data Engineering with Databricks.

- Gained hands-on expertise in building data pipelines and managing data lakes using Apache Spark and Delta Lake on Databricks.
