SUMMARY

Experienced Data Analyst with a Master's in Business Analytics and strong SQL, Python, and ETL skills. Proven ability in data modeling, cleansing, and profiling, with a focus on developing scalable dashboards and automating data workflows. Adept at designing agile data solutions and extracting actionable insights to support data governance and strategic decision-making.

EDUCATION

University of Dayton

Sep 2023 - Jun 2025

Masters, Business Analytics

- **Coursework:** Machine Learning, Finance Analysis, Data Analytics, Advance Business Intelligence, Statistical Analysis for Business Decisions (Excel)

St. Peter's Engineering College

Aug 2018 - Jul 2022

Bachelor's, ECE

PROFESSIONAL EXPERIENCE

University of Dayton

May 2024 - Jun 2025

Desk Assistant - Data Analyst

Dayton, OH

- Utilized SQL Server and Python to develop flexible data models and perform in-depth analysis, ensuring data integrity and supporting data governance within academic systems.
- Designed and developed interactive Power BI dashboards to visualize academic trends and performance metrics, aligning with enterprise reporting requirements.
- Automated ETL processes to streamline data workflows, ensuring timely data ingestion and transformation for agile reporting solutions.
- Enhanced documentation practices by creating detailed reports on data processes, thereby improving overall data governance.

Amazon

Feb 2023 - Jun 2023

Transaction Risk Investigator

Hyderabad, India

- Executed large-scale data analysis using SQL and Excel to identify trends and anomalies, supporting risk management and data profiling initiatives.
- Developed real-time Tableau dashboards integrated with cloud databases, offering actionable insights for operational risk assessment and data reporting.
- Optimized anomaly detection by assisting in the creation of automated reporting solutions, reinforcing data integrity and accuracy.
- Improved team documentation practices and updated data workflow logs to support robust data governance and consistent data validation.

Techiyan Technologies

Jun 2020 - Aug 2020

Data Operations Analyst - Intern

Hyderabad, India

- Performed data validation and cleansing to resolve inconsistencies, underpinning reliable data sets for operational analytics.
- Crafted and maintained dynamic reports using Excel and Power BI to visualize key operational trends, aligning with modern data warehousing practices.
- Applied foundational SDLC principles and IT development practices to support data operations and prepare for scalable data integration projects.

PROJECTS

Stock Market Data Tracking and Analysis

- Developed a predictive model using Python to forecast stock price trends based on historical data (10 years).
- Applied time series analysis, regression models, and statistical tests to validate accuracy. Automated ETL pipelines for continuous data ingestion, enabling real-time performance tracking.
- Enabled real-time stock performance tracking, providing actionable insights into market trends.

NBA - Beat the Spread

- Developed a machine learning model in R to predict NBA game outcomes and forecast whether teams would cover the spread using logistic regression and random forests.
- Engineered features from historical NBA data, including team performance and betting odds, to enhance model accuracy.
- Achieved up to 57% prediction accuracy in R, optimizing models through cross-validation and threshold adjustments to improve betting strategies.

SKILLS

- **BI Tools:** Power BI (including DAX), Tableau, Smartsheet, Microsoft Excel (VBA, Pivot Tables, formulas, charts)
- **Programming:** Python (Pandas, NumPy, Scikit-learn), C++, VBA, R Programming (Stat models), SQL, T-SQL, HTML, CSS
- **Development Tools:** ServiceNow, Salesforce (basic), Lucid chart
- **Databases:** MySQL, NoSQL, Snowflake, Microsoft SQL Server, AWS (RDS, DynamoDB, S3), Microsoft Access
- **Process & Workflow Tools:** SDLC knowledge, JIRA, REST APIs, Linux/UNIX Commands, Microsoft Office Suite
