SUMMARY

Full stack developer with three years of experience in Java, SQL, JavaScript, Spring Boot, React.js, and Microservices architecture. Spearheaded backend API optimization, reducing data retrieval time by 40% for Fortune 500 client Express Scripts. Supported German clients by collecting product feedback, addressing requests on incidents and tickets regarding application issues.

SKILLS

Web Development:	Spring Boot, React.js, JavaScript (ES6+), HTML5, CSS3, Microservices architecture, RESTful APIs, Spring Security.
Backend Development:	Java (JDK 8+), Kafka, Message Queues, Spring Cloud (Eureka, Config Server, Feign Client).
Frontend Development:	React Hooks, Redux Toolkit, Context API, Axios, Fetch, Formik, React-Router-Dom.
Database Management:	MySQL, H2, Hibernate, Database Indexing, SQL Optimization, Database Design.
Cloud Technologies:	AWS (EC2, Elastic Beanstalk, RDS, S3, Lambda), Docker, Kubernetes.
Testing:	JUnit, Mockito, Jest, React Testing Library.

EXPERIENCE

EXPRESS SCRIPTS | *Full stack developer Intern, Austin, Texas* Feb 2024 - Dec 2024

- Developed and deployed five RESTful APIs using Spring Boot, enabling seamless data exchange between pharmacy benefit management systems and minimizing data access duration by 40%.
- Refactored legacy code in 3 existing Spring Boot microservices, enhancing performance and reducing server costs for the organization by approximately 10% annually.
- Designed and implemented user interfaces using React.js, ensuring seamless integration with backend APIs to enhance user experience and operational efficiency.
- Engineered reusable React form components with Formik, decreasing form submission errors by 30% and accelerating development cycles by 15% due to streamlined data handling across the application.
- Spearheaded development of 80+ automated unit and integration tests using JUnit, Mockito, and Jest, achieving 95% code coverage across all microservices, leading to fewer bugs and faster release cycles.
- Optimized SQL queries and managed MySQL, reducing query response times and assisting in resolving production issues.

COGNIZANT | *Software Engineer, Chennai, India* Oct 2021 - Jul 2023

- Mastered full-stack development via intensive training, constructing RESTful APIs with Spring Boot and Python, and employing database management, resulting in a 95% project readiness score during onboarding.
- Collaborated with 8 engineers to implement Agile methodologies, which improved code quality scores by 15% and decreased the number of bugs identified during testing by 10%.
- Facilitated daily stand-ups, reviewed junior code, and pair-programmed to unblock the team, shipping features 2 weeks ahead of schedule and improving team velocity by 10%.
- Maintained operational efficiency, responding to escalated tickets within 15 minutes and resolving 90% of application issues within the first hour; minimized downtime for Merck Group.
- Diagnosed and resolved 30+ application defects weekly, leveraging client feedback from global users to improve code stability and reduce critical incidents by 15% within one sprint.

NSIC | *Summer Intern, Hyderabad, India* May 2019 - Jul 2019

- Developed a RESTful API using Spring boot, integrated with React front-end components, and reduced page load times by 40% through optimized data fetching strategies.
- Deployed Visual Studio Code extensions (Prettier, ESLint) team-wide, which standardized code formatting, minimized code review cycles by 15%, and enhanced code consistency scores by 20%.

EDUCATION

University of Cincinnati Aug 2023 - Dec 2024
Master of Science, Information Technology.

GMR Institute of Technology Aug 2017 - Aug 2021
Bachelor of Technology, Computer Science and Engineering.

CERTIFICATION

- Completed Udemy course on **Spring Boot 3 and Spring Framework 6 with Java**, mastering RESTful API development and microservice architecture to enhance backend engineering skills.
