

Srisatya Kapardi Budi

+1 (872) 288-5588 | bskapardi2002@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Chicago, IL

EDUCATION

University of Illinois at Chicago, United States

Master of Science (MS) in Computer Science, GPA: 4.00

May 2026(Expected)

Vasavi College of Engineering, India

Bachelor of Engineering in Computer Science Engineering, CGPA: 8.69

Jul 2024

WORK EXPERIENCE

Software Developer Intern | Oracle, Hyderabad, India

Jan 2024 – July 2024

- Optimized SQL queries to improve data import efficiency, **reducing processing time by 30%** and ensuring smooth data flow for over 5 million customer records.
- Enhanced task runner performance by identifying and **fixing 5+ critical bugs, resulting in a 25% reduction in query execution times.**
- Designed and implemented a scalable **ETL workflow on Oracle Cloud Infrastructure**, processing over 1 million customer records and reducing data inconsistencies by 22% through transformation into standardized formats.

Freelance Competitive Coder AI Trainer | Scale.Ai, Remote, India

Jul 2023 – Dec 2023

- Fine-tuned and developed algorithms for training large language models (LLMs), driving a 25% improvement in model performance through targeted adjustments and iterative testing.
- Developed **RESTful APIs** to enable seamless communication between **microservices in a distributed system**, reducing integration time by 30% and improving data flow between services.
- Performed in-depth debugging and code optimization, applying software engineering best practices like **unit testing, profiling, and code refactoring** to enhance maintainability and scalability of the codebase.

Machine Learning Intern | Ignitus, Remote, India

Mar 2023 – Jun 2023

- Conducted in-depth **customer segmentation** analysis, identifying distinct customer groups based on their behavior and preferences resulting in improved marketing and personalized campaigns.
- Implemented predictive **machine learning algorithms to forecast customer churn**, resulting in reduction of churn rate by 15% through targeted retention strategies.

ACADEMIC/PERSONAL PROJECTS

Banking Application – Microservices Architecture (Spring Boot, Eureka, RabbitMQ) | [GitHub](#)

- Built **4 scalable microservices** (User, Account, Transaction, Fund Transfer) with **Spring Boot**, improving modularity and efficiency.
- Implemented robust security with **OAuth2 (Keycloak)** and **RBAC**, ensuring secure access to sensitive financial operations.
- Established **asynchronous communication** using RabbitMQ for real-time transaction notifications and event-driven workflows.

LeetCode Job Queue System – Serverless Distributed Architecture (Redis, Node.js JavaScript) | [GitHub](#)

- Designed and deployed a **distributed job queue system** using serverless functions and Redis, enabling asynchronous code execution with low-latency processing.
- Built RESTful APIs for job submission and worker processing with **queue operations (LPUSH/RPOP)**, supporting event-driven task handling.
- Enabled global deployment with stateless architecture and **CORS support**, ensuring seamless frontend integration and real-time debugging.

Health Insurance Claim Fraud Detection (Python, Machine Learning, Scikit-learn) | [GitHub](#)

- Trained a **Random Forest model** to detect fraudulent claims with **92% accuracy**, outperforming SVM/KNN on imbalanced datasets.
- Engineered critical features (claim amount, provider history) using **Pandas/NumPy**, improving model precision by 15%.
- Visualized fraud patterns using **Matplotlib/Seaborn**, resulting in identifying high-risk claim categories.

SKILLS

Languages: Java, Python, JavaScript, TypeScript, C++

Frameworks & Libraries: Spring Boot, React, Node.js, Express

Databases & Queues: MySQL, MongoDB, Redis, RabbitMQ

Tools & Platforms: Docker, Git, Postman, Jenkins, Nginx, Gradle, Datadog

Cloud & Serverless: Serverless Functions, Oracle Cloud Infrastructure, REST APIs

Concepts & Practices: ETL Pipelines, CI/CD, Infrastructure as Code, Unit Testing, Profiling

Data & ML: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Pytorch, Feature Engineering

RESEARCH PUBLICATIONS

A study about Content-Based image Retrieval using features from Deep Neural Networks | [IEEE](#)

- Developed a deep learning-based image retrieval system using automated feature extraction and scalable architecture.

A study of Deep Learning Algorithms for Brain Computer Interface Cinematics | [IEEE](#)

- Built a neural framework to classify emotional states from EEG signals, improving performance over traditional approaches
