EDUCATION

Texas A&M University, College Station Master of Science in Computer Science	August 2022 - May 2024 GPA: 3.77/4.0
Manipal Institute of Technology, Manipal Bachelor of Technology in Computer Science and Engineering with specialization in Big Data	July 2018 - July 2022 GPA: 3.8/4.0

SKILLS

- Programming Languages: C, C++, Java, Python, Go
- Databases: Postgres, Microsoft SQL Server, MySQL, MongoDB
- Frameworks and Tools: .NET, Spring Boot, Docker, React, JUnit, Git, GitHub, JIRA, Elasticsearch
- Web Technologies: HTML, CSS, REST APIs, Linux, Shell Scripting
- Coursework: Algorithms, Data Structures, Object-Oriented Design, AI, Machine Learning, Database Systems, Big Data Tools, Cloud Computing, Software Engineering, Operating Systems, Distributed Systems

WORK EXPERIENCE

Boston Financial Advisory Group Data Analyst	Remote, USA July 2025 - Present
• Analyze and transform large datasets using SQL, Python, and Excel to extract insights, improve data quality, and support decision-making • Design and develop Tableau dashboards and visualizations to present trends and key metrics, collaborating with cross-functional teams to ensure accurate reporting and clear communication of findings	
Texas A&M University Student Research Assistant	College Station, TX May 2023 - Feb 2024
• Orchestrated 60% surge in user engagement metrics by spearheading enhancements to <u>Lacewing Digital Library website</u>, integrating innovative features, resolving bugs, optimizing database operations in Microsoft SQL Server, implementing SSIS • Collaborated closely with Entomology Department to identify opportunities for improving and increasing website's features and 25+ functionality, effectively addressing user requirements, applied rigorous testing processes for seamless data-driven system • Implemented robust web development solutions using .NET, HTML, and CSS while aligning with defined project goals; executed thorough testing processes resulting in a significant reduction of bugs reported post-launch by 80%	
Ericsson Software Developer	Bengaluru, India Jan 2022 - June 2022
• Collaborated with team of 6 to develop Trigger Handler- Java/Spring Boot application for real-time data streaming via Kafka, Postgres, and Elasticsearch, monitored by Prometheus, resulting in 45% higher throughput, ensured consistency with Docker • Enhanced the Trigger Handler for Ericsson Platform with IoT team, achieving an 85% efficiency increase to meet stakeholder objectives by solving complex testing problems by designing, developing scalable test automation frameworks • Streamlined operations using JIRA, leading to a 60% efficiency improvement, and successfully deployed optimized Trigger Handler, presenting achievements to teams in India and Sweden	
Tech Mahindra Machine Learning Intern	Bengaluru, India Aug 2021 - Oct 2021
• Developed and optimized a Sentiment Analysis model using Python libraries-Pandas, Keras, Matplotlib to classify customer feedback into positive, negative, or neutral categories, achieving a 91% classification accuracy • Engineered robust Python-based ETL pipelines, structuring data workflows to streamline extraction and transformation processes; achieved a 30% reduction in processing time while enhancing accuracy of customer feedback analysis • Demonstrated effectiveness of system by promptly identifying and addressing over 800+ service complaints, facilitating improved and efficient solutions to customer queries, indicating client appreciation	

PROJECTS

Course Evaluation Summarizer	Aug 2023 - Dec 2023
• Led Agile Scrum development as Scrum Master for web application automating course evaluation summarization with OpenAI API integration, replacing manual processes, enhancing efficiency by 60% with SDLC, continuous documentation, testing • Implemented pivotal features, including seamless PostgreSQL database utilization, AI-driven file processing, Google OAuth, CI/CD system integration, reducing processing time by 90% for course evaluation data analysis	
Artificial Language Translation	Jan 2023 - May 2023
• Designed encoder-decoder seq2seq model with attention mechanisms, extensive hyperparameter tuning to significantly improve model performance, resulting in precise translations for artificial language translation, achieving 86% accuracy	
Parallel Computing with Strassen's Matrix-Multiplication Algorithm	Aug 2022 - Dec 2022
• Developed a parallel Strassen's algorithm using OpenMP for matrices (n×n) with customizable terminal matrix size k' • Evaluated algorithm performance through experiments, optimizing with varied k', presenting speedup, efficiency graphs	

CERTIFICATIONS

- Introduction to GenAI- Google Cloud Skill Boost
- Machine Learning Foundations: A Case Study Approach- (Coursera by Washington University)
- Big Data Specialization- (Coursera by University of California San Diego)
