Education

Texas A&M University, College Station, TX

August 2022 – May 2024

Master of Science in Computer Science **GPA 3.77/4**

College Station, TX

Manipal Institute of Technology, Manipal

July 2018 – July 2022

B.Tech in Computer Science & Engineering with a specialization in Big Data **GPA 3.8/4**

Manipal, India

Technical Skills

Languages: Java, C/C++, Python, TypeScript

Technologies/Frameworks: Linux, Spring Boot, Git, React, HTML, CSS, Docker, REST, Kubernetes

Code Management/Software Development Practices: GitHub, JIRA, Agile, JUnit, TDD, BDD

Database /ETL: SQL, PostgreSQL, Elastic Search

Coursework: Algorithms, OOP, AI, ML, Database Systems, Big Data tools, Deep Learning, Cloud Computing, Software Engineering, Operating Systems, Distributed Systems, Cryptography

Professional Experience

Texas A&M University

May 2023 – Feb 2024

Student Research Assistant

College Station, TX

- Orchestrated a **40%** surge in user engagement metrics by spearheading enhancements to **Lacewing Digital Library** website, integrating innovative features, resolving bugs, optimizing database operations with Microsoft SQL Server, and implementing SSIS solutions. Applied rigorous testing processes to ensure seamless data-driven system
- Collaborated closely with Entomology Department to identify opportunities for improving and increasing website's features and **15+** functionality, effectively addressing user requirements for API design
- Implemented robust web development solutions using .NET, HTML, and CSS while aligning with defined project goals; executed thorough testing processes resulting in a significant reduction of bugs reported post-launch by 60%

Ericsson

Jan 2022 – June 2022

Software Developer

Bengaluru, India

- Collaborated with team of 6 in development of **Trigger Handler- Java/Spring Boot** application for real-time data streaming via Kafka, Postgres, and Elastic Search, monitored by Prometheus, resulting in **20%** performance increase, **15%** higher throughput, utilized Docker ensuring consistent environments
- Enhanced the Trigger Handler for Ericsson Platform with IoT team, achieving an 85% efficiency increase to meet stakeholder objectives by solving complex testing problems by designing, developing scalable test automation frameworks
- Streamlined operations using JIRA, leading to a 20% efficiency improvement, and successfully deployed optimized Trigger Handler, presenting achievements to teams in India and Sweden

Tech Mahindra

Aug 2021 – Oct 2021

Machine Learning Intern

Bengaluru, India

- Developed and optimized a Sentiment Analysis model using Python libraries-**Pandas, Keras, Matplotlib** to classify customer feedback into positive, negative, or neutral categories, achieving a **91%** classification accuracy
- Engineered robust Python-based ETL pipelines, structuring data workflows to streamline extraction and transformation processes; achieved a **30%** reduction in processing time while enhancing accuracy of customer feedback analysis
- Demonstrated effectiveness of system by promptly identifying and addressing over **120+** service complaints, facilitating improved and efficient solutions to customer queries, indicating client appreciation

Projects

Course Evaluation Summarizer Prof. Phillip Ritchey (TAMU) - Java, Ruby, Unit Test, Heroku **Aug 2023 – Dec 2023**

- Led **Agile Scrum** development as Scrum Master for web application automating course evaluation summarization, replacing manual processes, enhancing efficiency by 60% with SDLC, continuous documentation, testing
- Implemented pivotal features including seamless PostgreSQL database utilization, AI-driven file processing, Google OAuth, CI/CD system integration, reducing processing time by **80%** for course evaluation data analysis

Artificial Language Translation Prof. Anxiao Jiang (TAMU) - Python, TensorFlow

Jan 2023 – May 2023

- Designed encoder-decoder seq2seq model for artificial language translation, achieving **86%** accuracy
- Utilized attention mechanisms, extensive hyperparameter tuning to significantly improve model performance, resulting precise translations

Parallel Computing with Strassen's Matrix-Multiplication Algorithm - OpenMP, CUDA **Jan 2023 – May 2023**

- Developed a parallel Strassen's algorithm using OpenMP for matrices ($n \times n$) with customizable terminal matrix size k'
- Evaluated algorithm performance through experiments, optimizing with varied k' , presenting speedup, efficiency graphs

Certifications

- Machine Learning Foundations: A Case Study Approach- (Coursera by Washington University)
- Big Data Specialization- (Coursera by University of California San Diego)
