Dynamic and Results-driven Information Systems graduate with a strong Computer Science and Engineering foundation. Proficient in SQL, Python, Tableau, and Power BI, skilled in big data analysis by transforming complex data into valuable insights and creating impactful visualizations to support data-driven decision-making.

SKILLS

- Data Analytics & Visualization: Tableau, Power BI, RStudio, Pandas, NumPy, PySpark, ETL, Snowflake
- Programming & Scripting: Python, SQL, R, Java, JavaScript, C, HTML, CSS
- Database Management: MySQL, SQL Server, Oracle, Microsoft Access
- Data Modeling & Tools: MySQL Workbench, Microsoft Office Suite (Excel, PowerPoint), Celonis
- Cloud Platforms: Google Cloud Platform (GCP), AWS, Microsoft Azure
- Version Control & Collaboration: Git, VS Code
- Operating Systems: Windows, Linux, macOS
- Core Competencies: Strong communication, fast learner, team building, analytical thinking, presentation, leadership

WORK EXPERIENCE

Graduate Teaching Assistant | Central Michigan University, Michigan, USA August 2023 – December 2024

- Analyzed performance and engagement data for 700+ students using Excel, Tableau, and SQL, creating visual reports to identify trends and optimize grading efficiency.
- Managed databases for attendance and assignments, providing data-driven insights to enhance instructional strategies and decision-making.

Intern (Remote) | Snap Inc., Michigan, USA September 2024 – November 2024

- Designed and developed immersive Augmented Reality (AR) lenses, utilizing a comprehensive set of tools and 2D/3D assets for innovative user experiences.
- Applied principles of digital storytelling to create engaging AR experiences while gaining a thorough understanding of the AR landscape and technologies.

Intern | Nestlé, Dhaka, Bangladesh September 2020 – October 2020

- Participated in professional development programs and training to maximize learning and career advancement.
- Contributed to a culture of ongoing development and innovation driven by over 2,000 leading brands.

Undergraduate Teaching Assistant | North South University, Dhaka May 2019 – May 2021

- Analyzed student performance data from quizzes and assignments, providing insights to improve problem-solving and academic strategies for 800+ undergraduates.
- Maintained and compiled data on student assessments using Excel and SQL, supporting accurate grading and assisting professors in refining instructional approaches.

EDUCATION

Master of Science in Information Systems | Central Michigan University, USA December 2024

- Cumulative GPA: 3.86/4.00

Bachelor of Science in Computer Science & Engineering | North South University, Bangladesh January 2021

- Cumulative GPA: 3.64/4.00

PROJECTS

Smart Laundry Management System with Real-Time Dashboard | Final Capstone Project December 2024

- Designed a multi-user system with Python, SQL, Flask, and MySQL, featuring real-time dashboards and role-based permissions.

- Developed a responsive web app using HTML5, CSS3, and JavaScript, improving user interaction by 25% with real-time updates and alerts.
- Built a scalable backend with Django, achieving 98% success in real-time data processing and deployment via VS Code.

Analyzing Airbnb Seattle Sales Data on Tableau | Summer 2024

June 2024

- Analyzed Airbnb Seattle sales data in Tableau to optimize pricing strategies.
- Created dashboards highlighting price per bedroom, revenue trends, and listing counts.
- Delivered actionable insights to help hosts improve competitiveness.

Road Accident Dashboard using Tableau | Fall 2023

December 2023

- Created a Road Accident Dashboard in Tableau to analyze incidents, fatalities, and injuries.
- Used geospatial visualizations to identify high-risk areas and inform safety improvements.
- Conducted severity and correlation analysis by vehicle types and weather conditions for enhanced safety insights.

Road Defect Detection using Image Annotation | Capstone Project

August 2020

- Applied AI for road defect detection in Bangladesh using image annotation.
- Implemented and compared Inception-v3 and ResNet-32 models for optimal performance.
- Utilized machine learning techniques to improve accuracy in detecting road defects.

Smart Bin Indicator using Raspberry Pi and Ultrasonic Sensor and Mobile Android App | Jr. Year Project.

May 2019

- Developed an IoT-based smart bin system using Raspberry Pi and ultrasonic sensors for efficient waste management.
- Created a mobile Android app for real-time bin status monitoring and notifications.
- Applied machine learning to optimize waste collection scheduling.

RELEVANT COURSEWORK

Business Decision Modeling, Business Data Analytics, Information Systems, Data Visualization, Database Management for Business Systems, Information Systems Capstone Project, Project Management Fundamentals, Systems Analysis and Design, Enterprise Systems for Management using SAP Software, Application Development, and Applied Lean Six Sigma.

PROFESSIONAL DEVELOPMENT

Lean Six Sigma Green Belt | College of Business Administration, Central Michigan University

May 2023

- Learned DMAIC principles & necessary tools for eliminating defects to cost reduction & reducing process variation.
- Knowledge of root cause analysis, 5 why, 5S, control plans, & creating a decent SOP for continuous improvement.

CERTIFICATIONS

- Google Cloud Data Analytics Certificate by Google June 2024
- Data Analytics and Visualization Job Simulation by Accenture March 2024
- Process Mining – From Theory to Execution Issued by Celonis April 2023
- Celonis Foundations Issued by Celonis March 2023

AWARDS, HONORS, AFFILIATIONS, AND LEADERSHIP EXPERIENCES

- Graduate Teaching Assistantship Award with tuition waiver by CMU from August 2023 to December 2024
- The Annual 11th ERPSim Competition Award for 4th position by CMU, CBA, March 2023
- Vice-President of the Bangladeshi Student Association (BSA) at CMU from January 2023 to January 2024
- Volunteered in CMU College of Business Administration Student Outreach and ISO Events, CMU
- Merit scholarship from North South University from August 2017 to January 2021
