Education

Clemson University

Aug 2023 – May 2025

Master of Science in Computer Science GPA: 3.90

Sathyabama Institute of Science and Technology

June 2019 – May 2023

Bachelors of Technology in Computer Science GPA: 9.35

Skills & Certifications

Programming Languages: Python, Java, JavaScript, TypeScript, C++

Web Development: React.js, Next.js, Node.js, Express.js, Flask, FastAPI, Django

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud & DevOps: AWS (EC2, Lambda, S3, RDS, ECS), Docker, Kubernetes, Terraform, GitHub Actions

System Design: Microservices Architecture, Load Balancing, Caching (Redis), Messaging (Kafka), API Design

Testing & QA: PyTest, Jest, Supertest, SonarQube, Snyc

Tools & Environments: Git, Postman, Swagger/OpenAPI, Linux, Bash, Jira, Prometheus, Grafana

Certifications: AWS Certified Solutions Architect – Associate

Experience

Teaching Assistant – Human-Centered Artificial Intelligence

August 2024 – May 2025

Clemson University /Dr Carlos Toxtli Hernandez, Ph.D

Clemson, South Carolina

- Collaborated with the professor in designing the curriculum, projects, and lab modules for the **Human-Centered Artificial Intelligence** course, focusing on ethical AI design, user-focused interfaces, and responsible development practices.
- Led lab sessions and technical walkthroughs covering AI-driven web applications using **React.js**, **Node.js (Express)**, **FastAPI**, and **PostgreSQL** and guided students in developing secure and accessible **RESTful** and **GraphQL APIs** with **JWT/OAuth2** and **Swagger/OpenAPI**, emphasizing usability and transparency.
- Supported project development involving real-time event streaming and human-centered system behaviors using **Apache Kafka**, **Python**, and **Java**.
- Mentored students on deploying ethical AI features on cloud using **AWS Lambda**, **Docker**, **Terraform**, and **CI/CD** with **GitHub Actions**.
- Demonstrated responsible monitoring and testing workflows using **Prometheus**, **Grafana**, **Snyk**, **SonarQube**, **Jest**, and **PyTest**.

Adroit Global Solutions

Oct 2022 – June 2023

Software Development Engineer Intern (MERN + Flask)

Remote

- Collaborated on an internal developer productivity platform using **MongoDB**, **Express.js**, **React.js**, **Node.js**, and **Flask**, supporting **2K+** daily active users with sub-second response times.
- Developed and maintained **RESTful APIs** and microservices with **Node.js (Express)** and **Python (FastAPI, Flask)**, integrating **GitHub**, **Jira**, and **AWS S3 APIs** for workflow automation and secure asset handling.
- Implemented real-time features using **Socket.io**, **WebSockets**, and **Redis Pub/Sub**, reducing notification delivery latency by **60%** for CI pipeline updates.
- Automated **CI/CD** workflows using **Docker**, **GitHub Actions**, **AWS ECS**, and **Terraform**, leveraging **NGINX** for zero-downtime deployments and **Material-UI** for scalable, reusable UI components.
- Enhanced system reliability by writing unit and integration tests with **Jest**, **Supertest**, and **PyTest**, achieving **90%** test coverage and reducing production issues by **35%**.

Projects

MultiAI Full Stack AI SaaS Platform

- Built an AI-powered web app using **React.js**, **Node.js**, **Express.js**, and **PostgreSQL (NeonDB)** for generating blog content, images, and resume reviews via LLMs.
- Designed modular **REST APIs** with **Axios**, integrated **Clerk** for secure auth, and managed sessions via **dotenv**.
- Styled responsive UI with **Vite**, **Tailwind CSS**, routed views using **React Router**, and enforced **CORS** policies.
- Deployed on **Vercel** (frontend) and **Render** (backend), automated releases via **GitHub Actions** and **CI/CD** pipelines.

ShopEase: Full-Stack E-commerce Solution

- Built a platform using **Angular**, **Django REST API**, and **PostgreSQL**, managing products and customer orders.
- Developed dynamic **Angular** components for product listings, cart, checkout flows, reducing checkout errors by **60%**.
- Automated order confirmations and inventory updates using **Celery** with **Redis**, ensuring real-time stock accuracy.
- Deployed on **AWS** with **Docker** and **AWS SES**, achieving **99.9%** uptime and reliable email notifications for customers.
