EDUCATION

University of Georgia
Master of Science in Computer Science

Georgia, USA
May 2025

WORK EXPERIENCE

University of Georgia
Mobile Application Developer

Athens, Georgia
August 2024 – May 2025

- Directed the end-to-end development of HomePro, an **Android-based mobile application** providing on-demand home services to customers, enabling real-time service booking, provider discovery, and order tracking utilizing sound **algorithm** designs.
- Personally resolved over **90%** of high-priority bugs during beta testing by performing hands-on debugging and regression testing, ensuring app stability and reducing crash rate before production release with a strong focus on reliability and code review practices.
- Integrated Firebase Authentication and Realtime **Database APIs**, enforcing **OTP-based user login** and verified profile creation, ensuring 100% account legitimacy and enhancing security against fraud detection.
- Built and maintained modular front-end architecture using **Java (Android SDK)** and XML layouts, applying **Agile** and iterative development practices in accordance with **SDLC** to deliver new **UI features** across bi-weekly sprints.
- Managed back-end logic with **Firebase Storage**, Firestore, and custom SQL queries for image uploads, profile updates, and service metadata storage, ensuring fast, scalable data access and supporting IT consulting needs.

Perfect Infra
Construction Data Analyst

Hyderabad, India
January 2022 – May 2023

- Conducted **10+ construction project** performance reviews using quantitative (cost, time, resource data) and qualitative (site observations, manager interviews) analysis to identify efficiency gaps and safety risks, leveraging entry-level risk assessment techniques to improve outcomes.
- Designed and deployed interactive **Power BI** dashboards and parameterized reports for project stakeholders, incorporating DAX calculations for metrics like cost variance, CPI/SPI, and productivity ratios, ensuring clarity in email communications.
- Developed and optimized **SQL Stored Procedures**, Views, and User-Defined Functions to improve the performance of construction data analytics applications and support high-volume reporting, reflecting my passion for effective financial applications.
- Applied **SQL and Power BI** to validate and profile budget, schedule, and safety data, ensuring accurate reporting and enabling reliable cost and tax forecasts.

TECHNICAL PROJECTS

L2Fuzz: Bluetooth L2CAP Fuzzing Tool – May 2025

- Developed a **Python** stateful fuzzing framework targeting **19 L2CAP** protocol states to uncover vulnerabilities in **Bluetooth BR/EDR stacks**.
- Engineered core-field mutation strategies and implemented two-phase crash validation, achieving high throughput without false positives across **1.4M+ packets**.

Online Movie booking System – December 2024

- Built a responsive front-end using **React, Redux, and Material-UI**, streamlining ticket booking and movie discovery through enhanced object-oriented programming practices.
- Reduced page load times by 4 seconds using **React Router for SPA navigation**, enhancing user satisfaction and performance.

Red-Teaming LLM Agents: ReAct and AutoScraper – December 2024

- Executed 50+ adversarial attacks on **OpenAI APIs** to expose security flaws in LLM agents and identify top vulnerabilities.
- Delivered a technical report proposing 3 defense strategies, improving **LLM alignment** and resilience to input manipulation.

SKILLS

- Programming Languages:** Java, Python (NumPy, PyTorch, OpenCV, Keras), C, C++, JavaScript, TypeScript, Kotlin
- Databases:** MySQL, SQLite, Firebase, MongoDB, PostgreSQL
- Web & Backend Technologies:** Spring Boot, RESTful APIs, HTML, CSS, React, Angular, PHP, XML, Node.js
- Mobile Development:** Android SDK, React Native, Flutter, Mobile App Architecture, UI/UX for Mobile
- Tools & Platforms:** Git, GitHub, GCP, VS Code, Android Studio, Postman, Tableau, Power BI, Google Workspace, Jenkins
- Other Skills:** AI, ETL pipeline, Prompt Engineering, Agile, CI/CD, MVC Architecture, Figma, Jira, Debugging, Version Control, Collaboration

LEADERSHIP

Marketing Coordinator — International Street Festival

- Led marketing and outreach strategy for UGA's largest cultural event, engaging 3,000+ attendees through targeted digital campaigns and campus-wide promotions.
- Collaborated with 20+ student groups local businesses to streamline logistics and ensure smooth event execution.
